Mange elever oplever, at matematikken er i vanskeligheder.

Elever som oplever, at matematikken er i vanskeligheder, har brug for genkendelighed og gentagelser.

Jeg har lavet dette redskab "KortKrig - Talkendskab" til eleverne hvor matematikken er i vanskeligheder.

"KortKrig - Talkendskab" er et nemt og brugervenligt materiale, som skal hjælpe eleven med at få udvidet sin talkendskab.

Tallene er skrevet på den måde eleverne ofte selv vil skrive dem, det gør, derfor materialet genkendeligt for eleverne.

Husk at det kun er fantasien der sætte begrænsninger for, hvordan materialet kan bruges.

Rigtig god fornøjelse.

Regler:

- Eleverne deler kortene ud til hinanden
- Eleverne samler deres kort i hver sin bunke, med bagsiden opad
- Eleverne vender nu hver et kort

- Eleverne læser tallet evt. ved at tæller sine prikker på sit kort
- Eleven der har det højeste antal vinder modstanderens kort og lægger det bagerst i sin bunke
- Den elev der til sidst har alle kortene/flest kort har vundet
- I tilfælde af to ens tal – er der Krig
- Eleverne tager 3 kort, og lægger dem ned på bordet, eleverne trækker nu hver 1 kort (et af de tre kort)
- Vinderen får alle 6 kort
- Hvis man trækker et bombekort slår den alle andre resultater, og man får derfor modstanderens kort. (Hvis modstanderen også trækker et bombekort er der igen Krig)
