

MatematikKatten

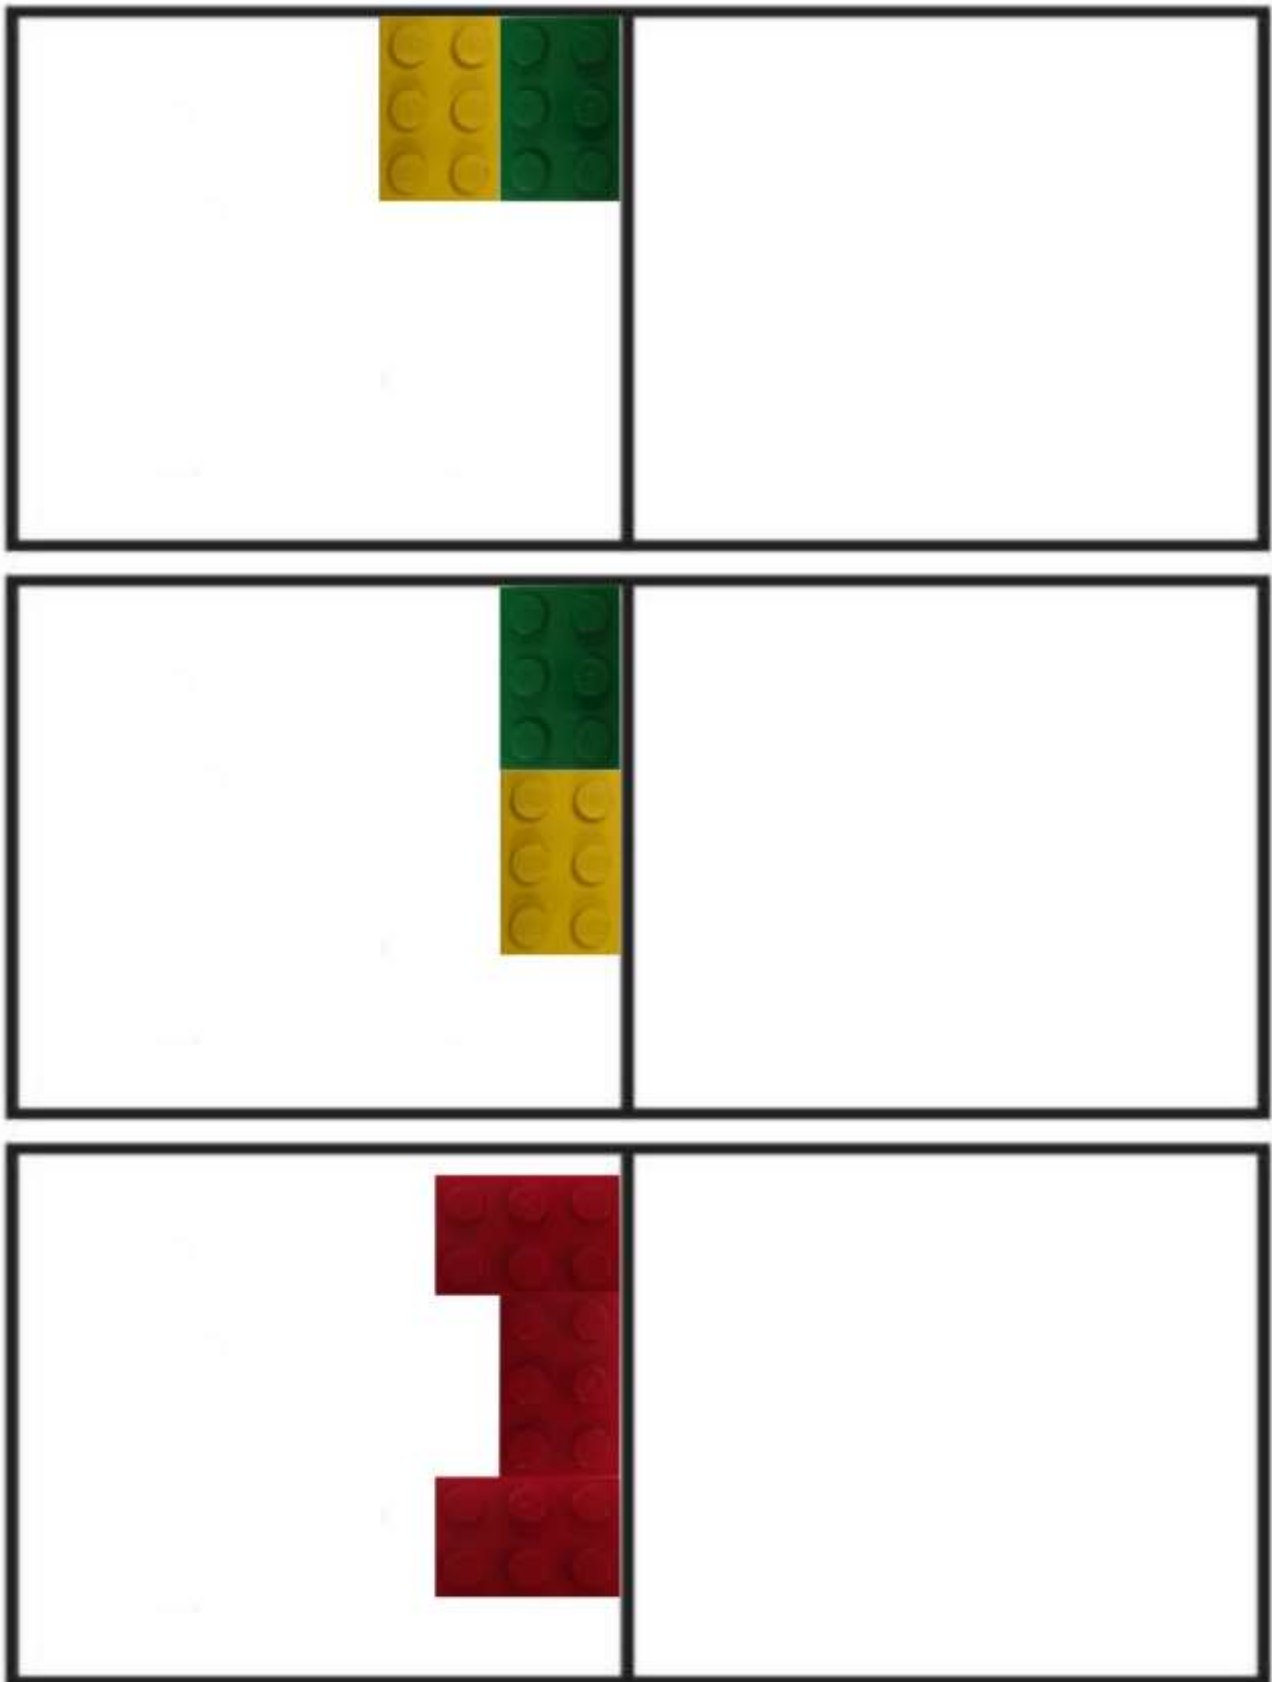

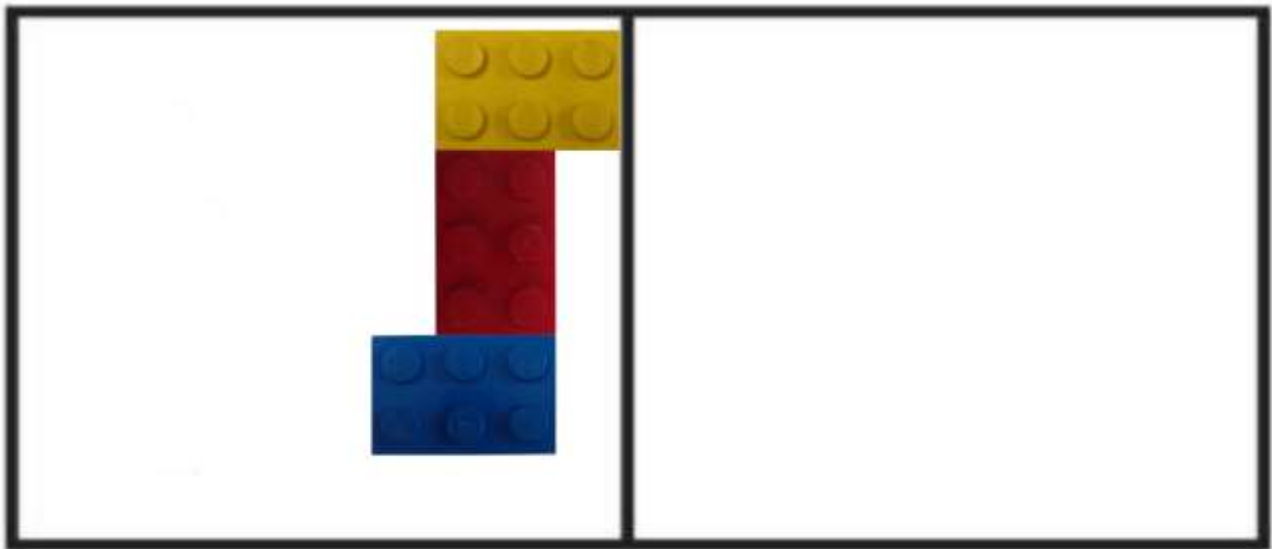

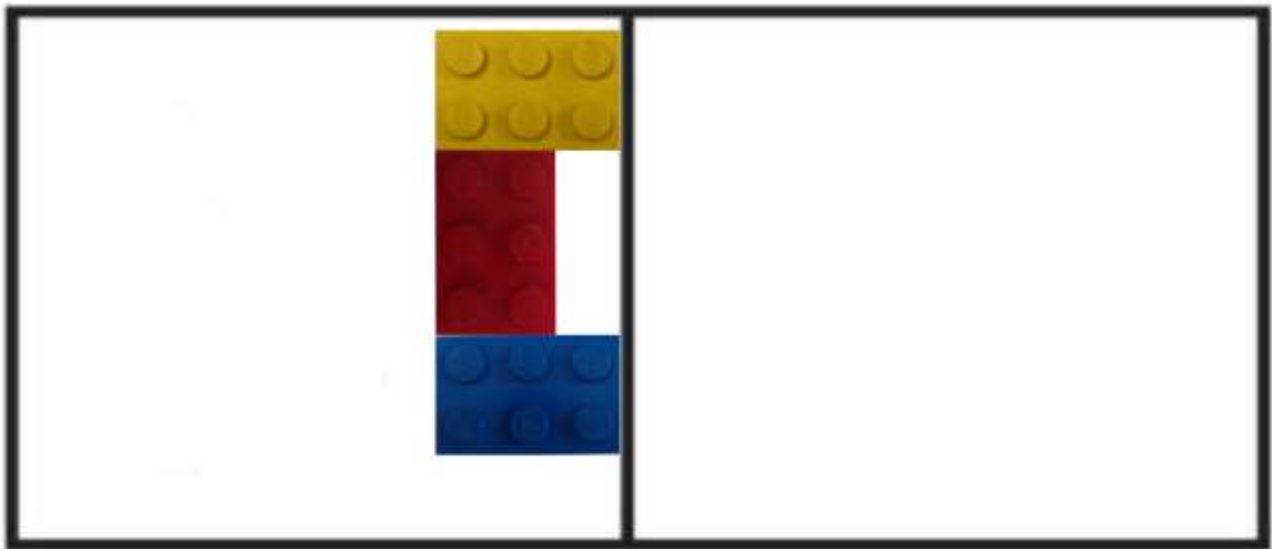

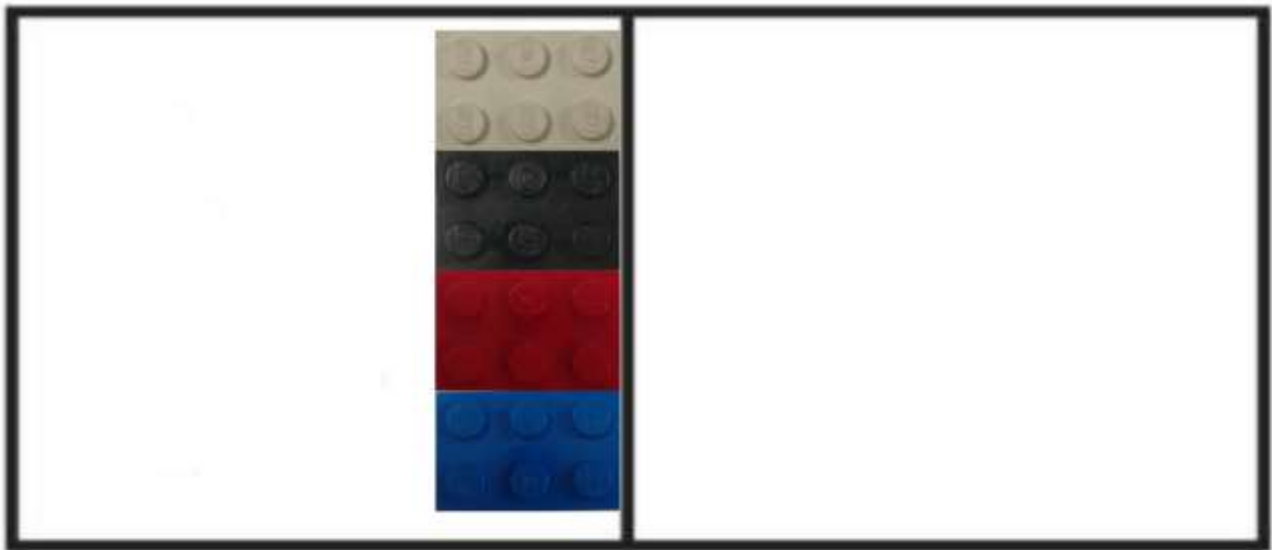

Bokmål

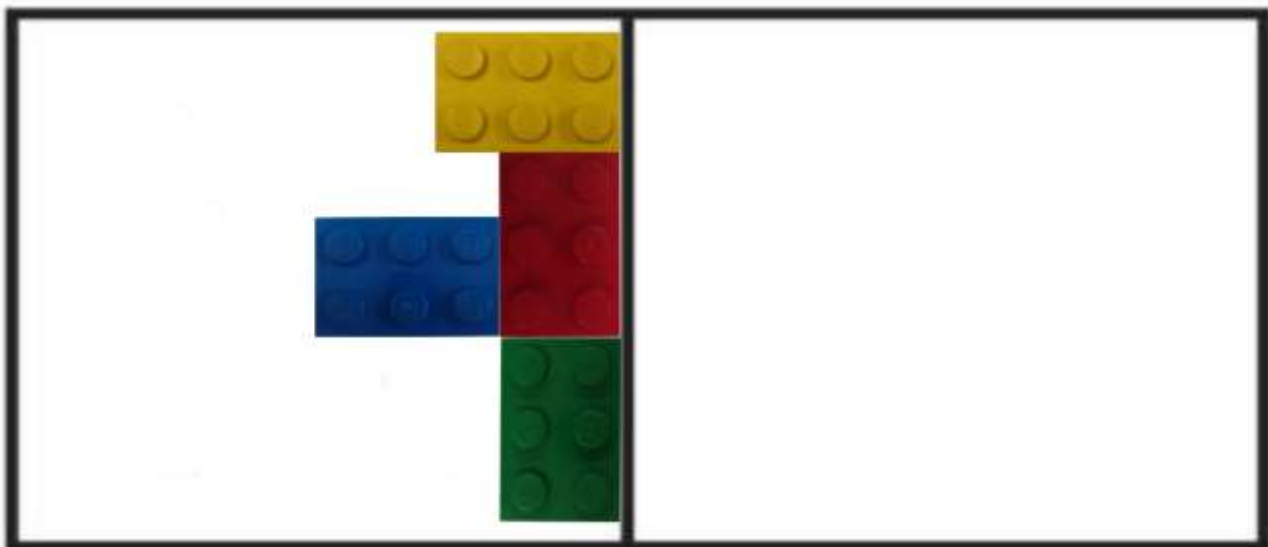

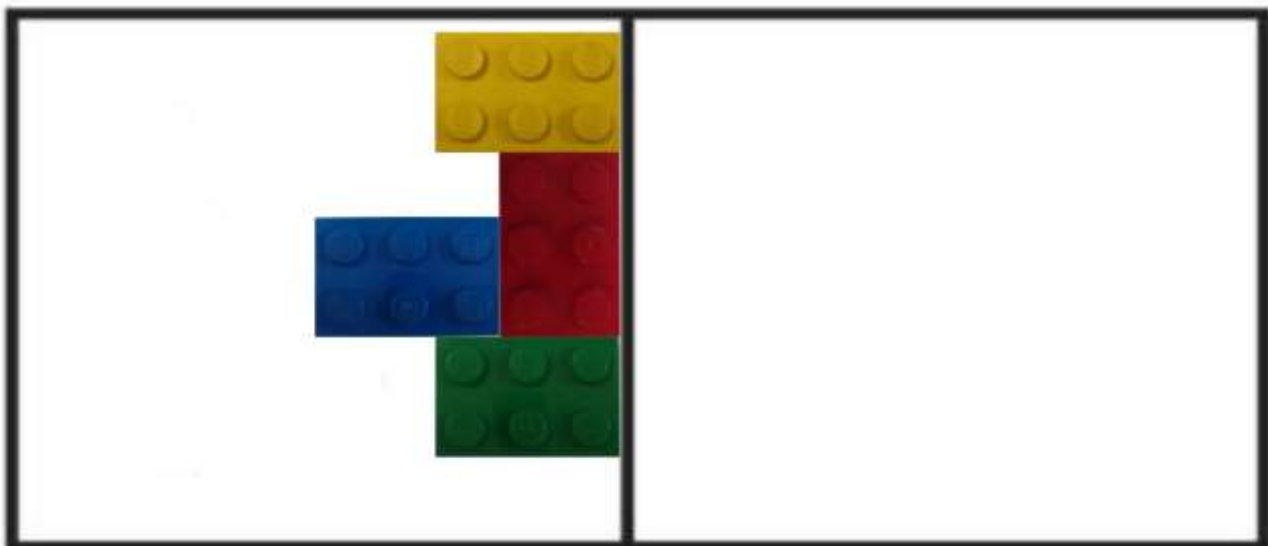

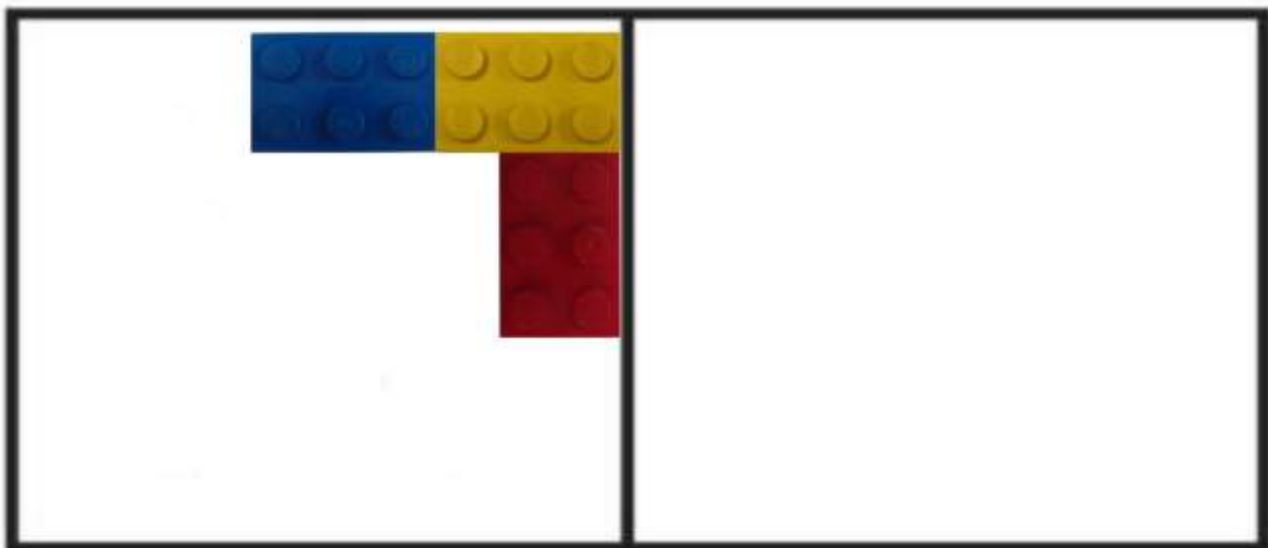

Lego
Speiling

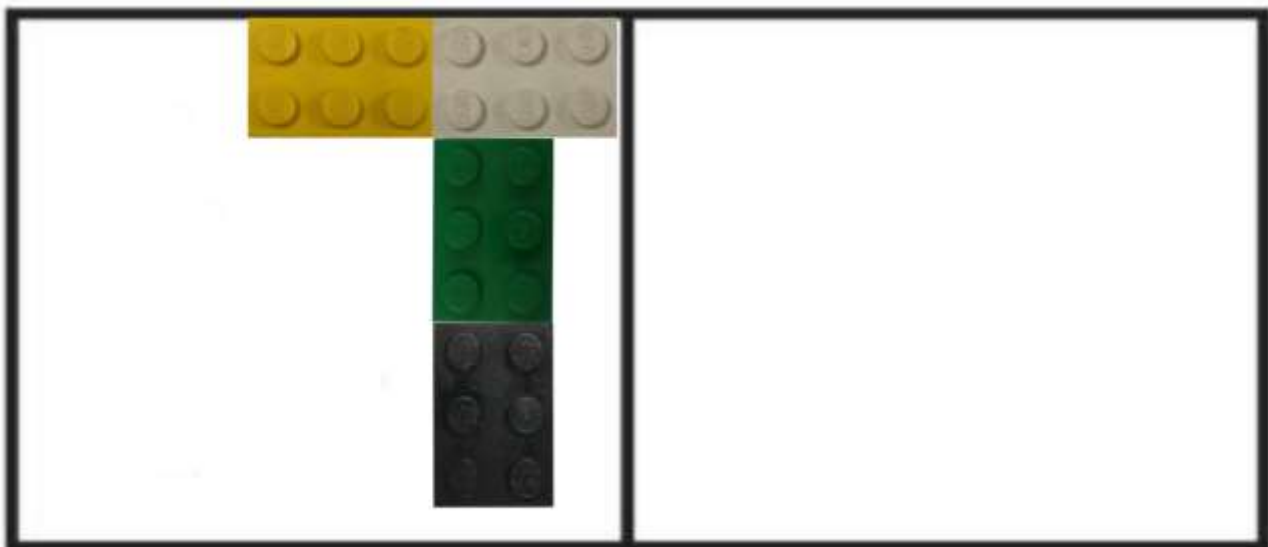

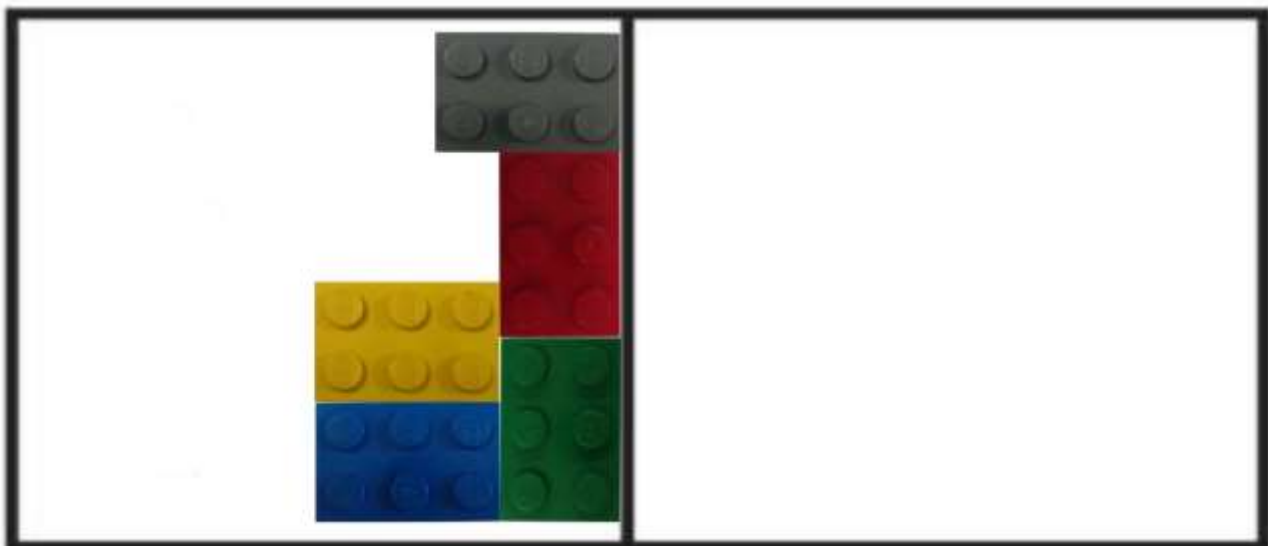

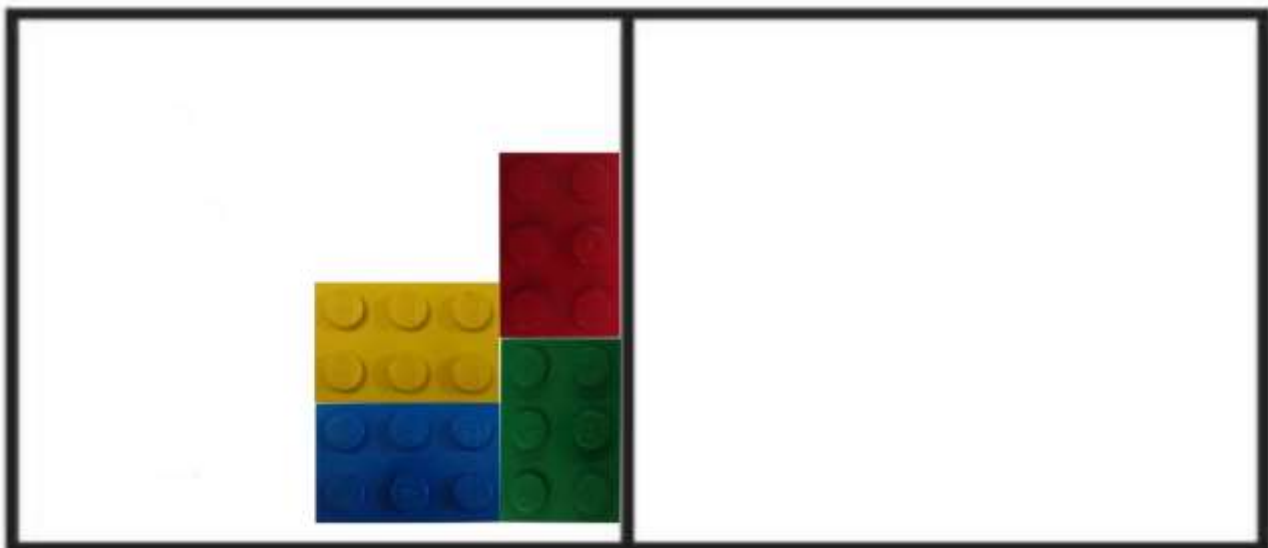

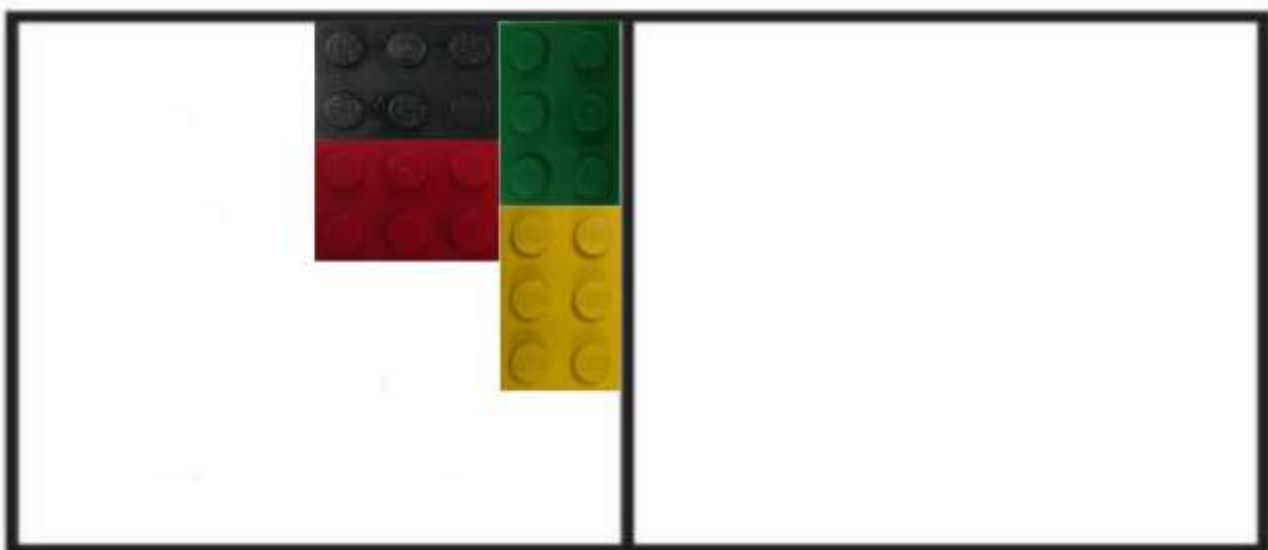

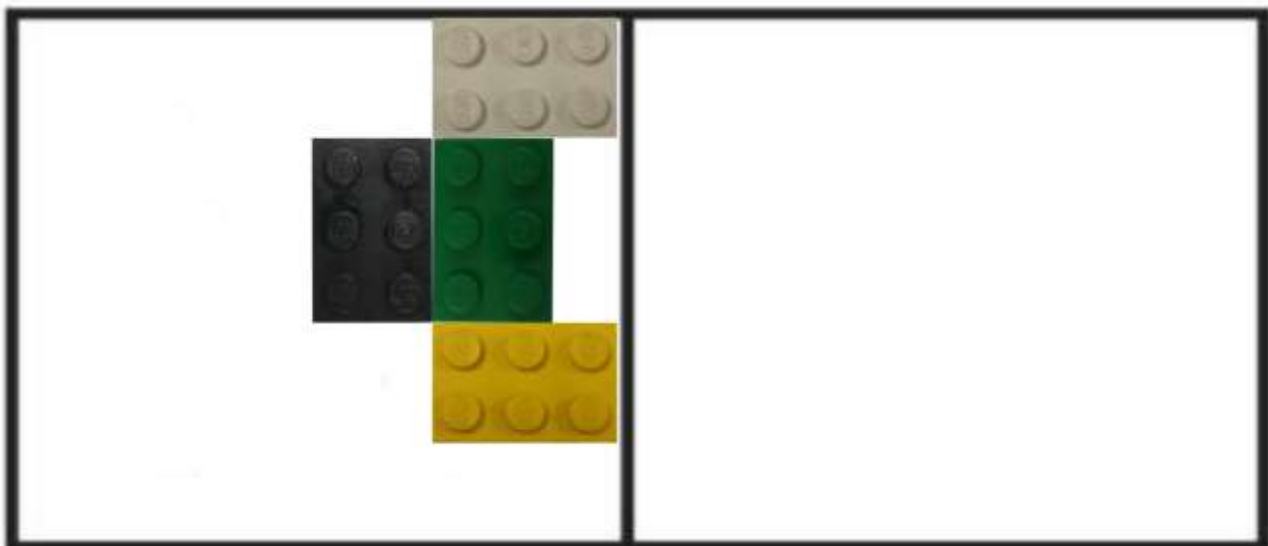

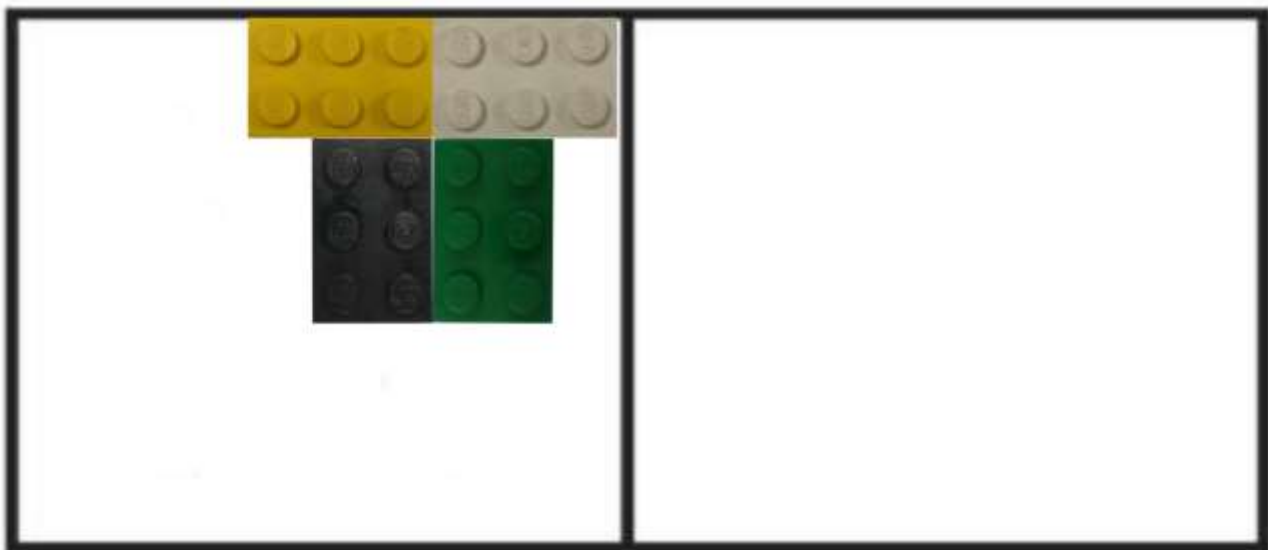

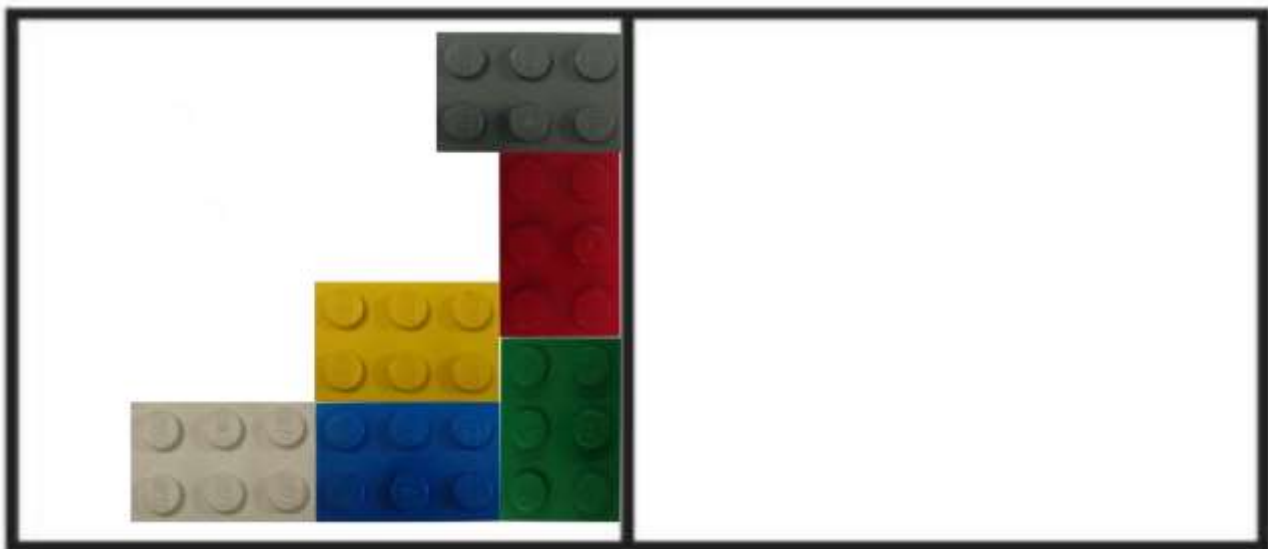

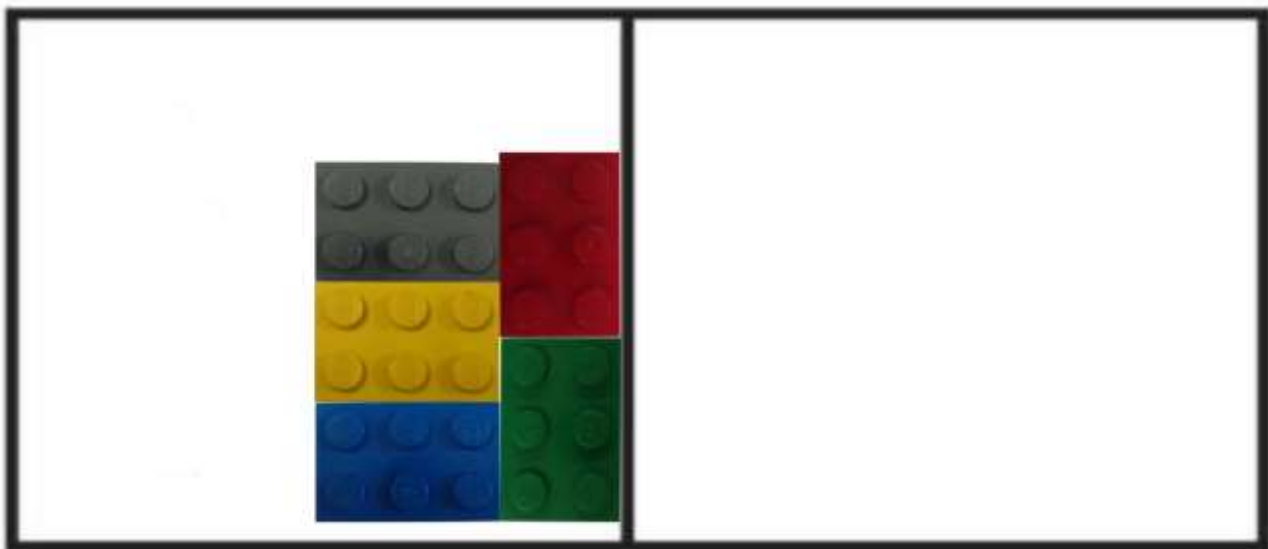

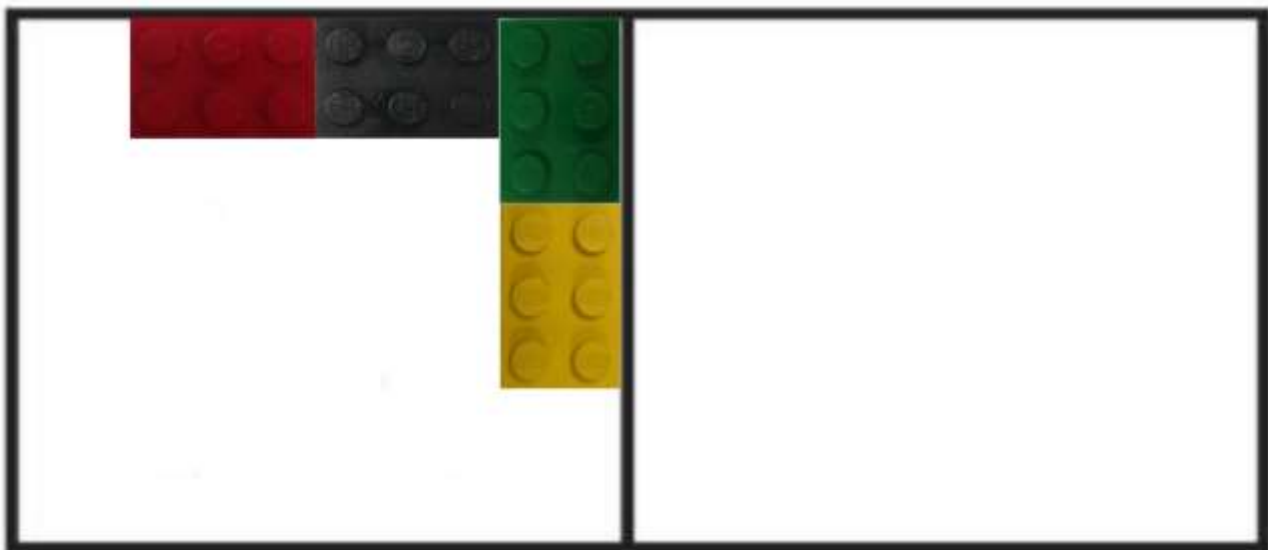

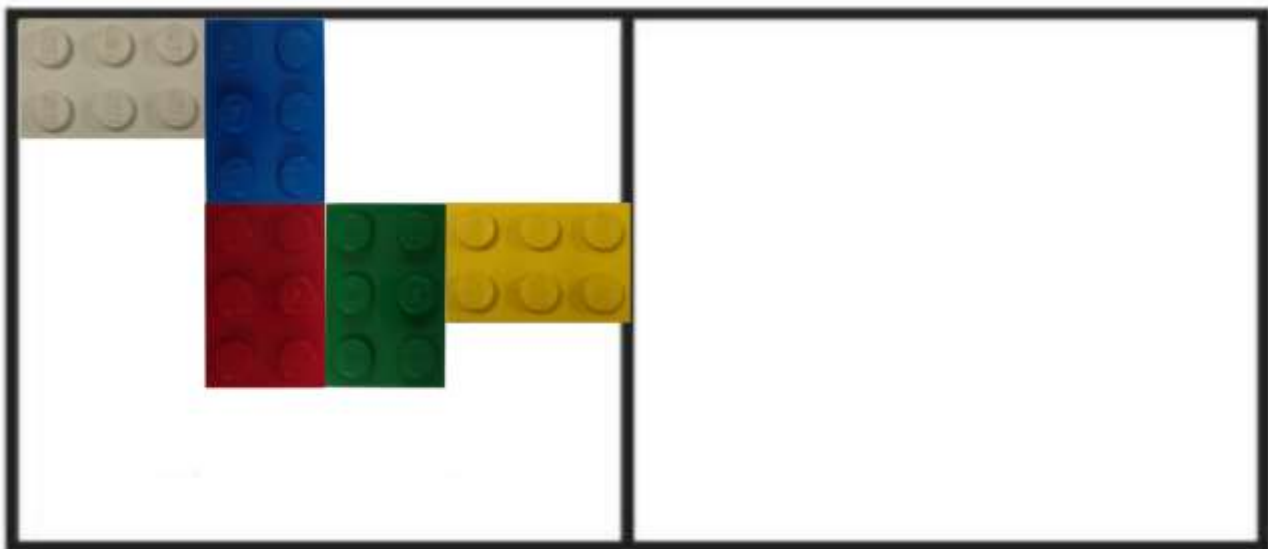

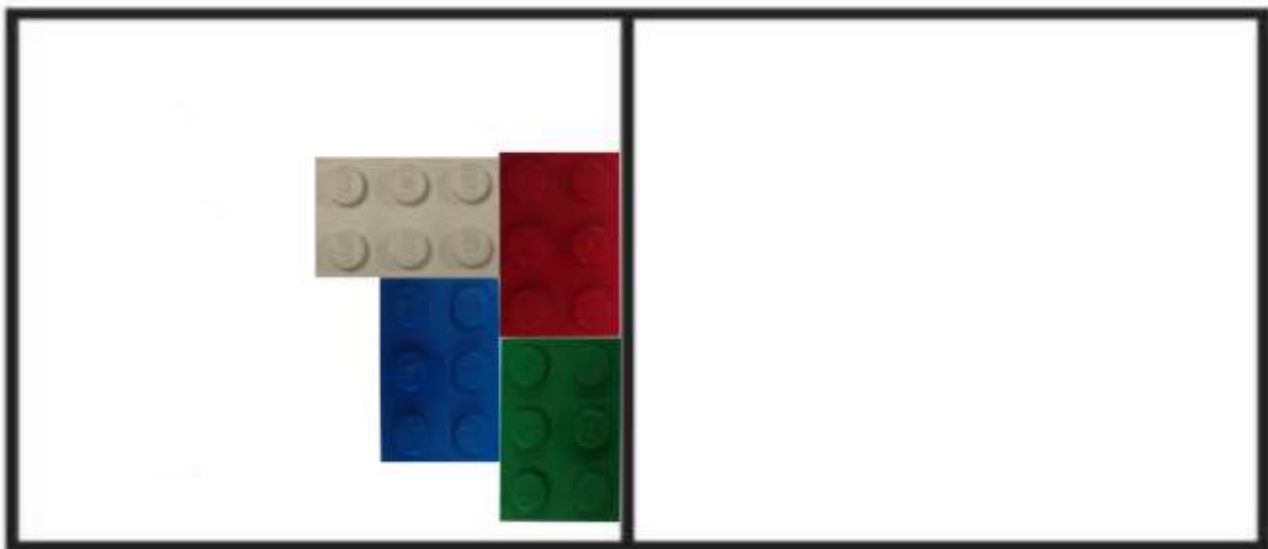

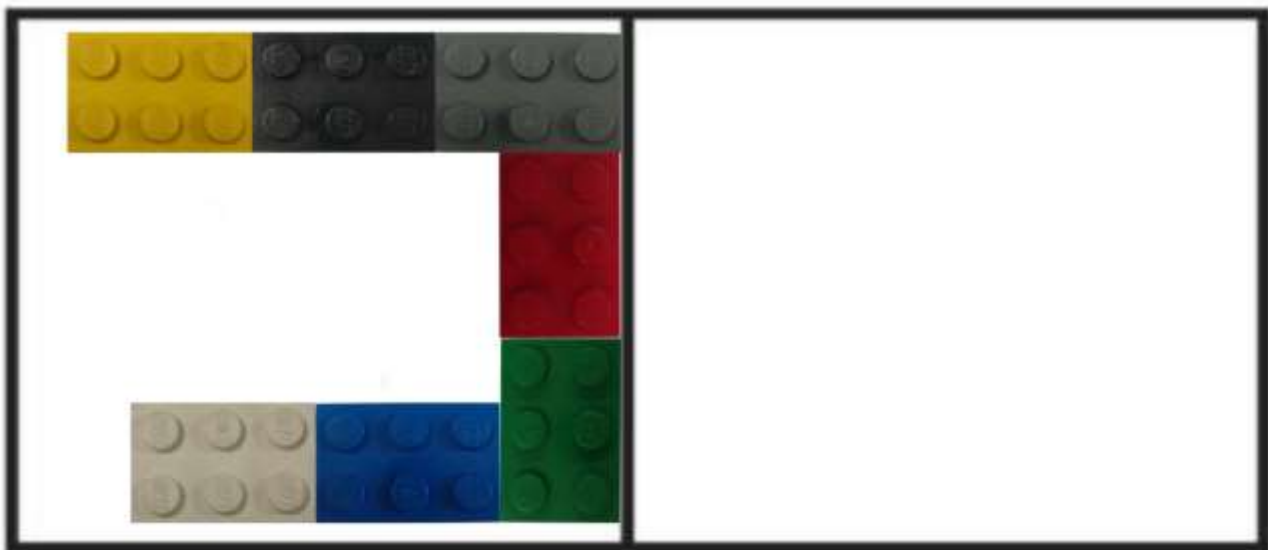

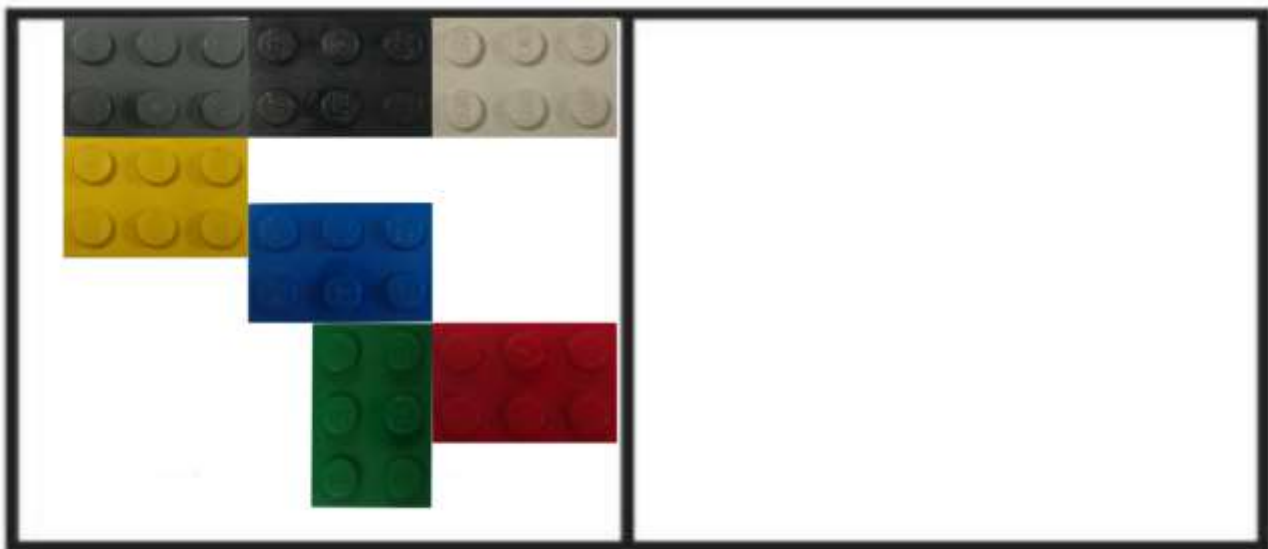

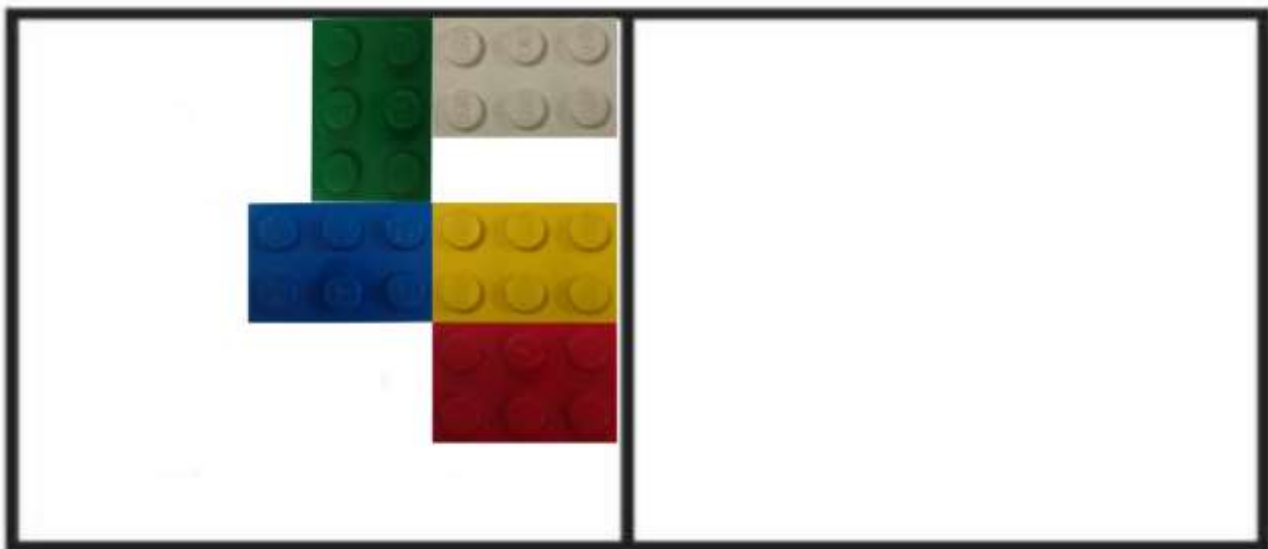

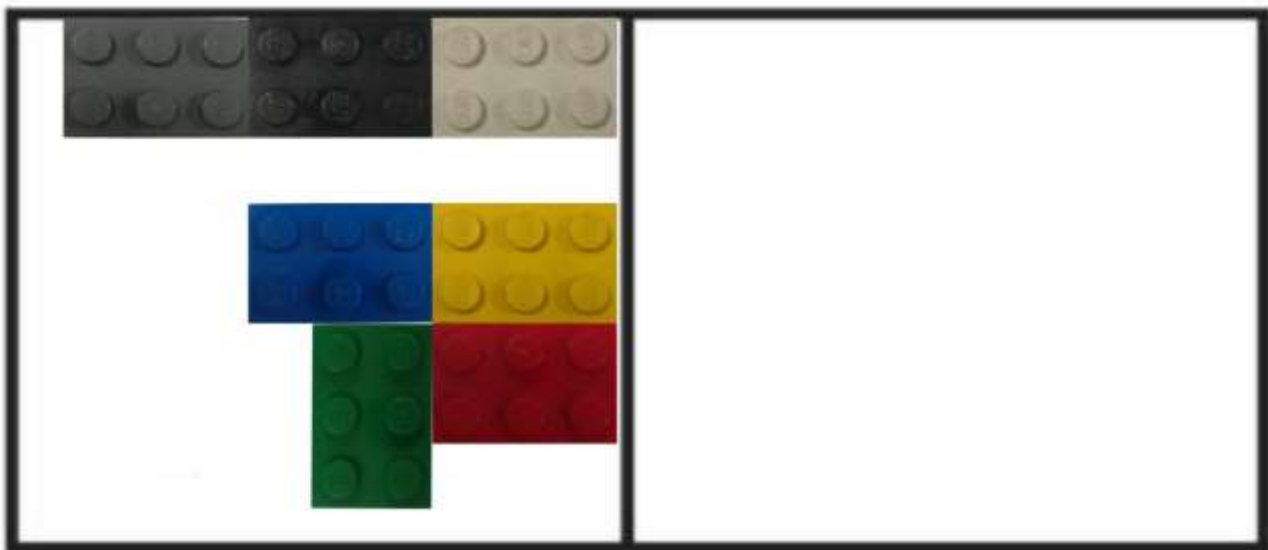

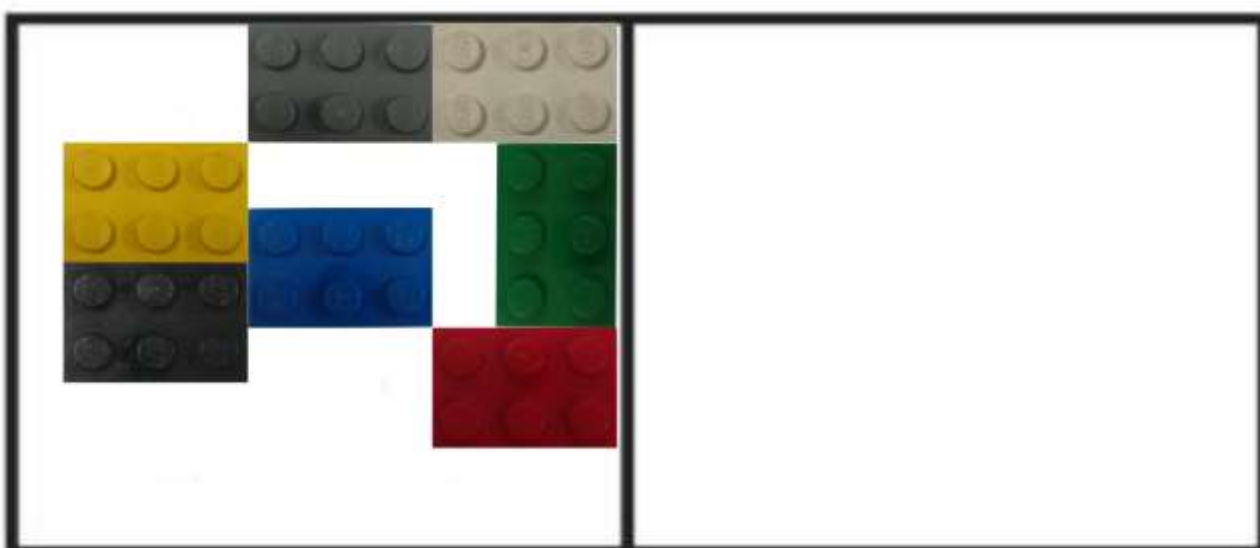

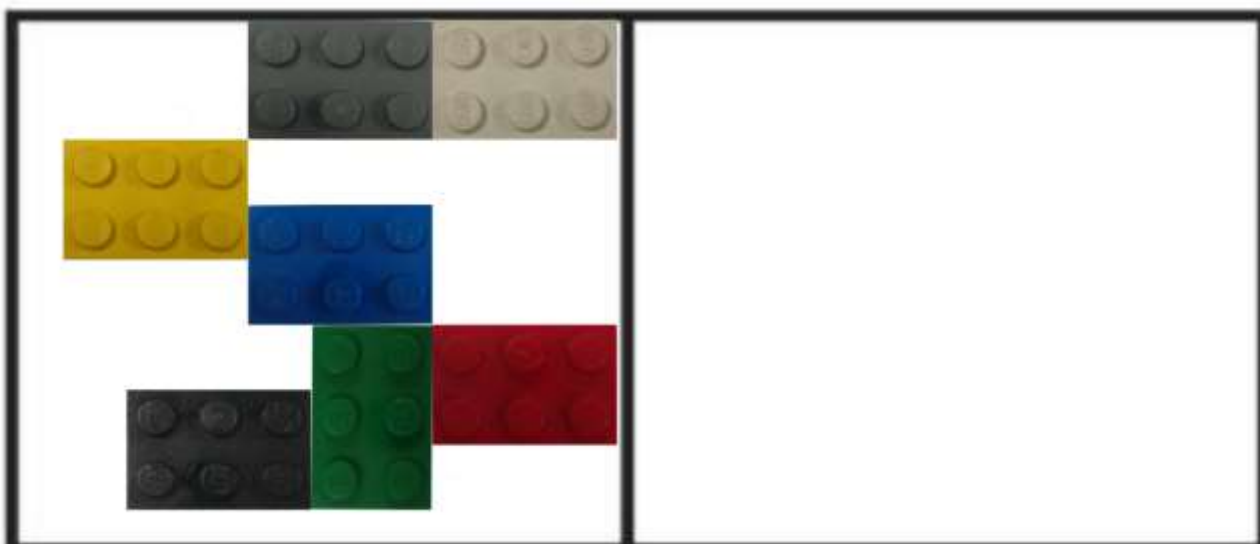

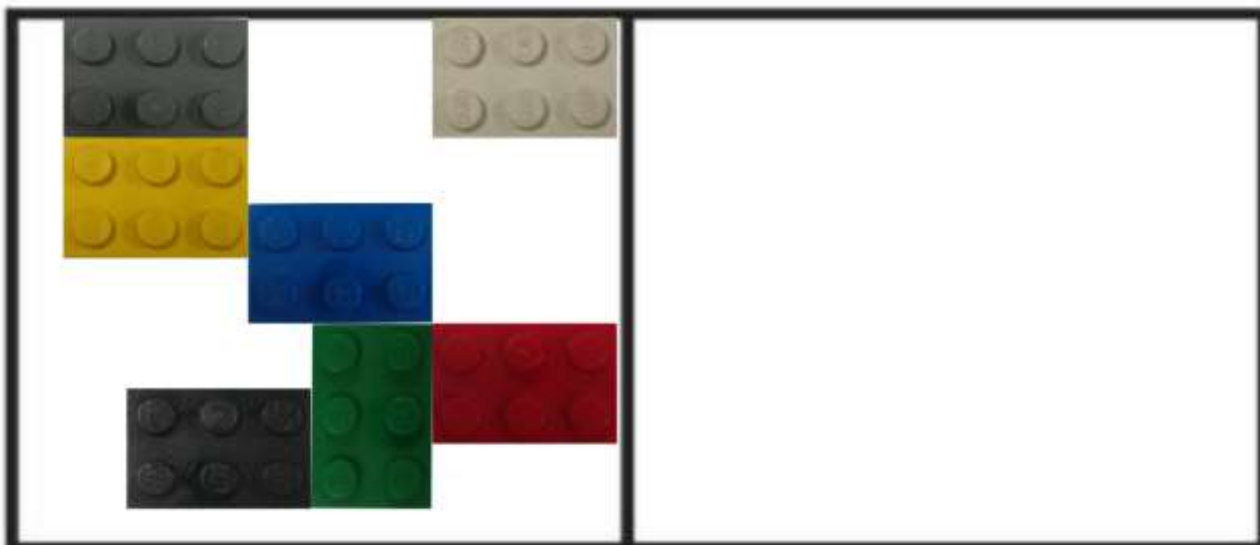

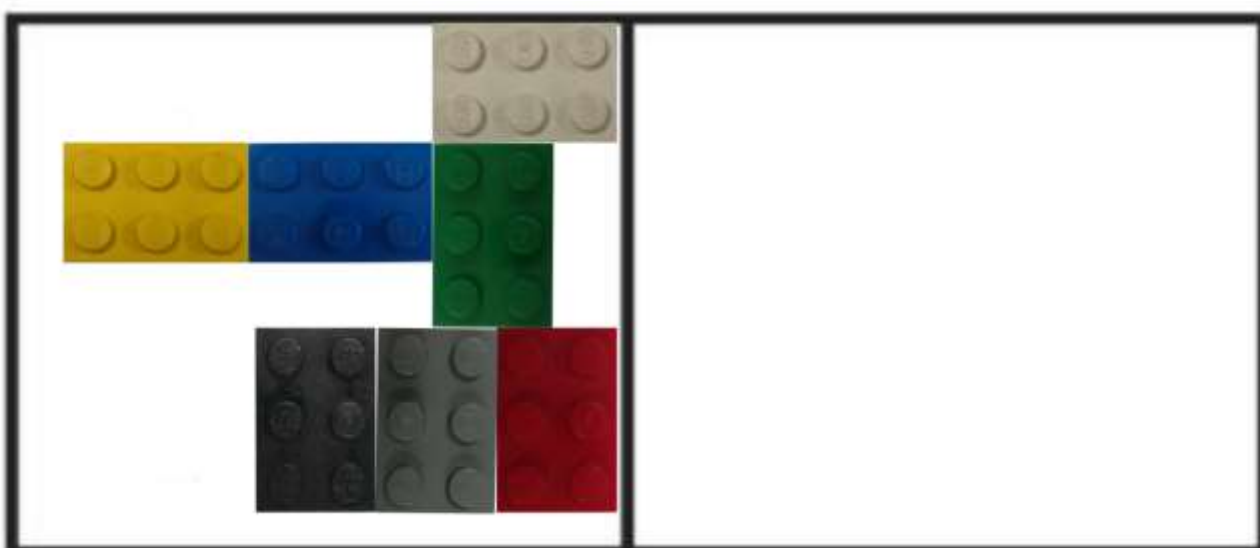

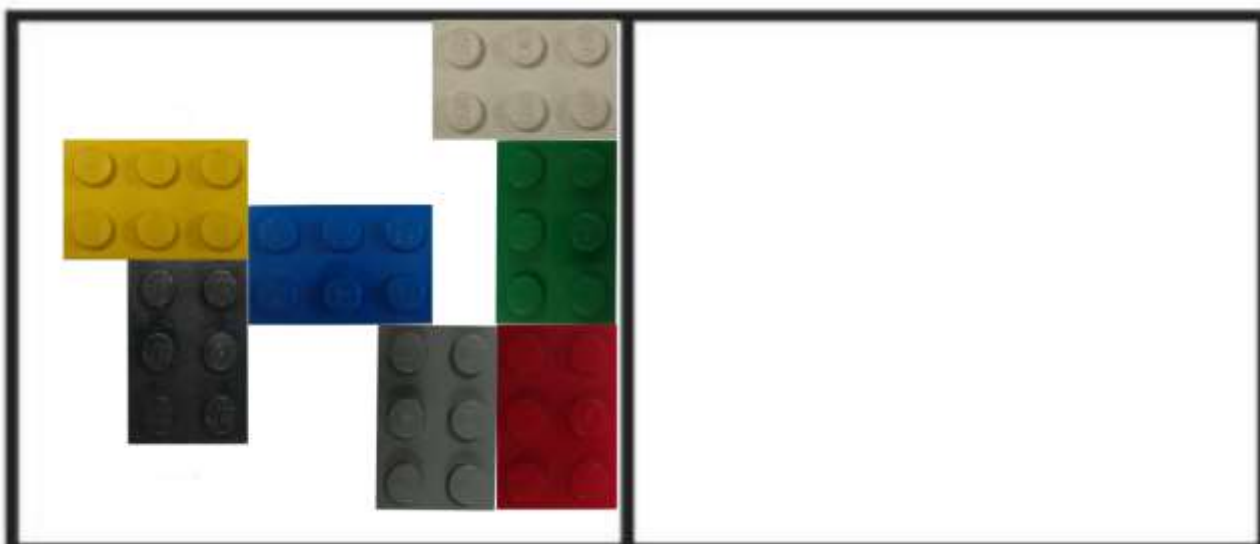

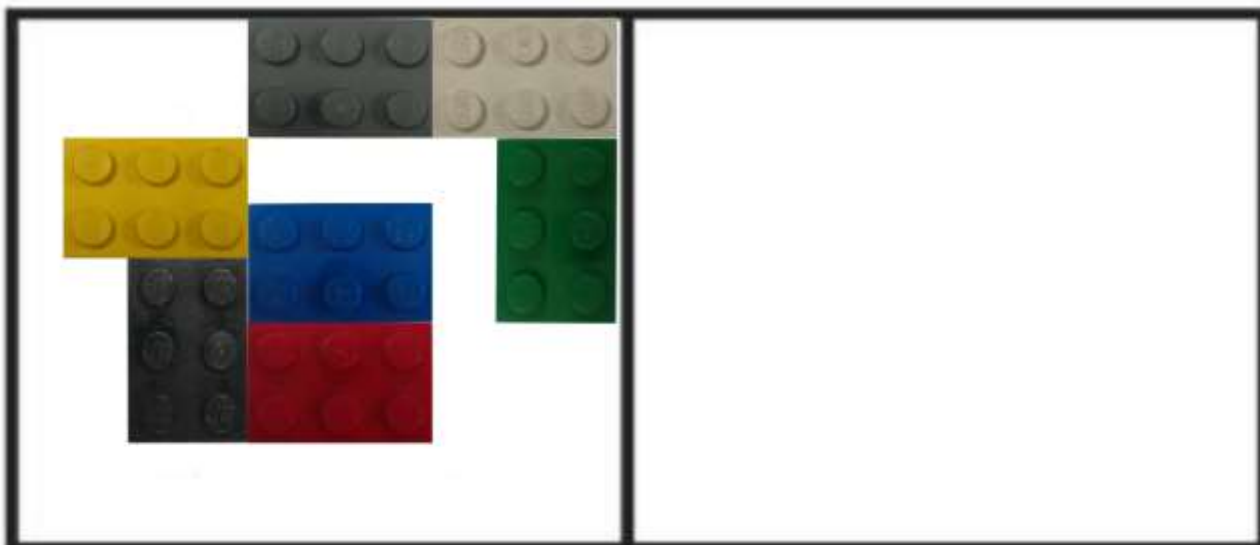

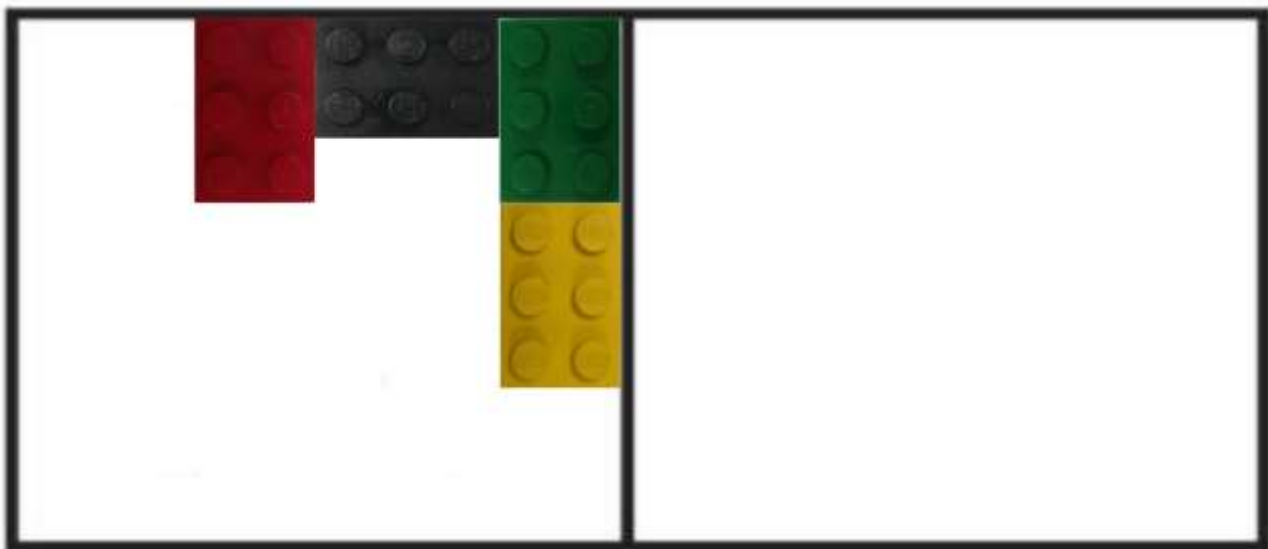

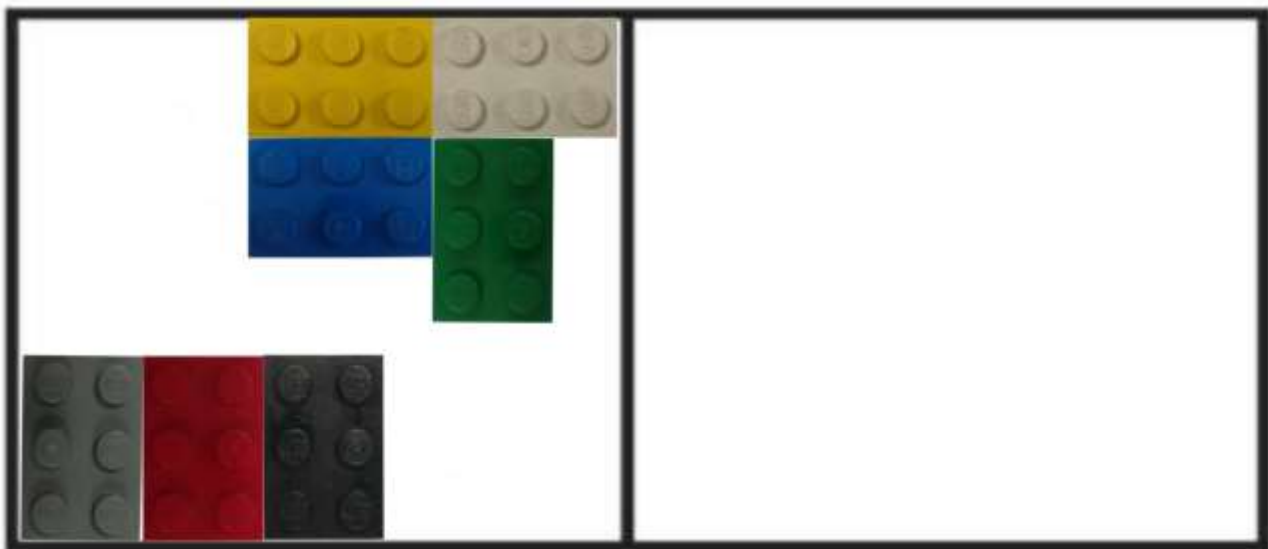

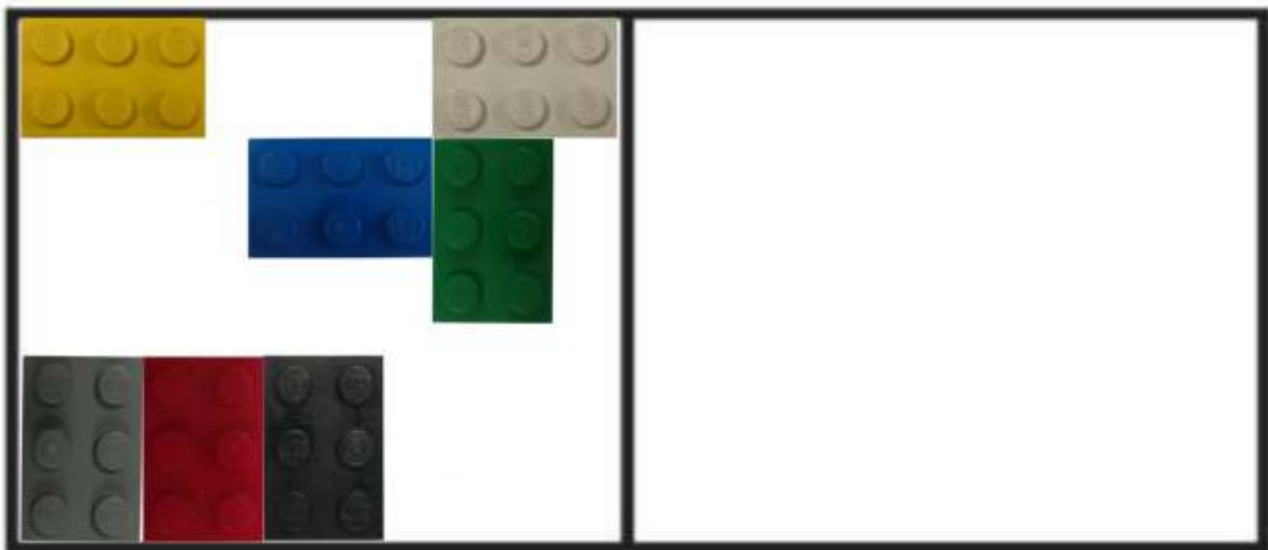

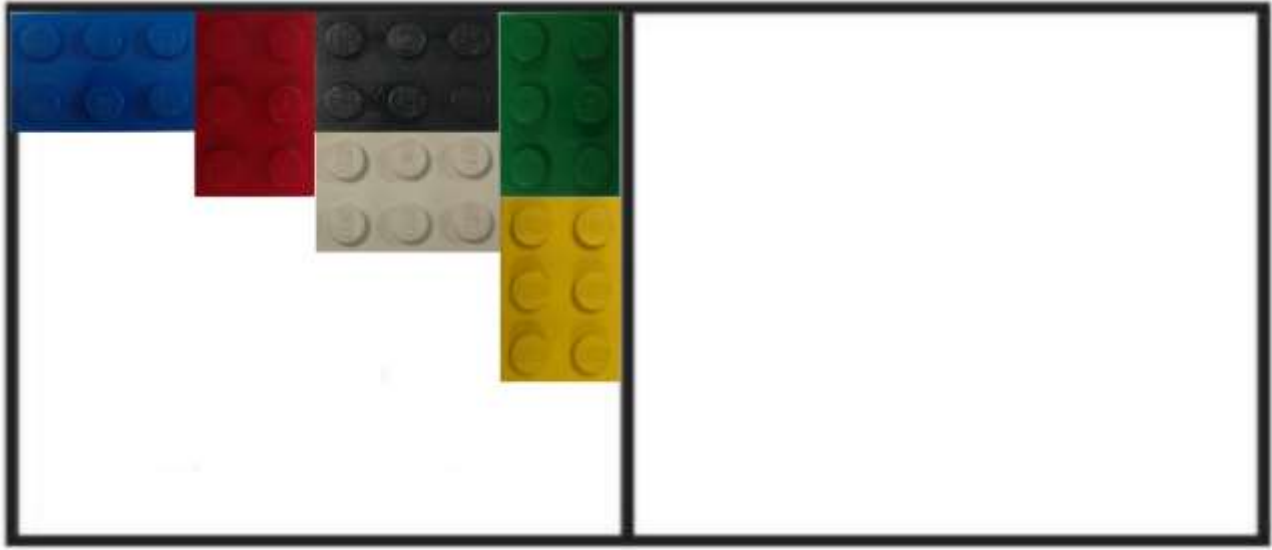

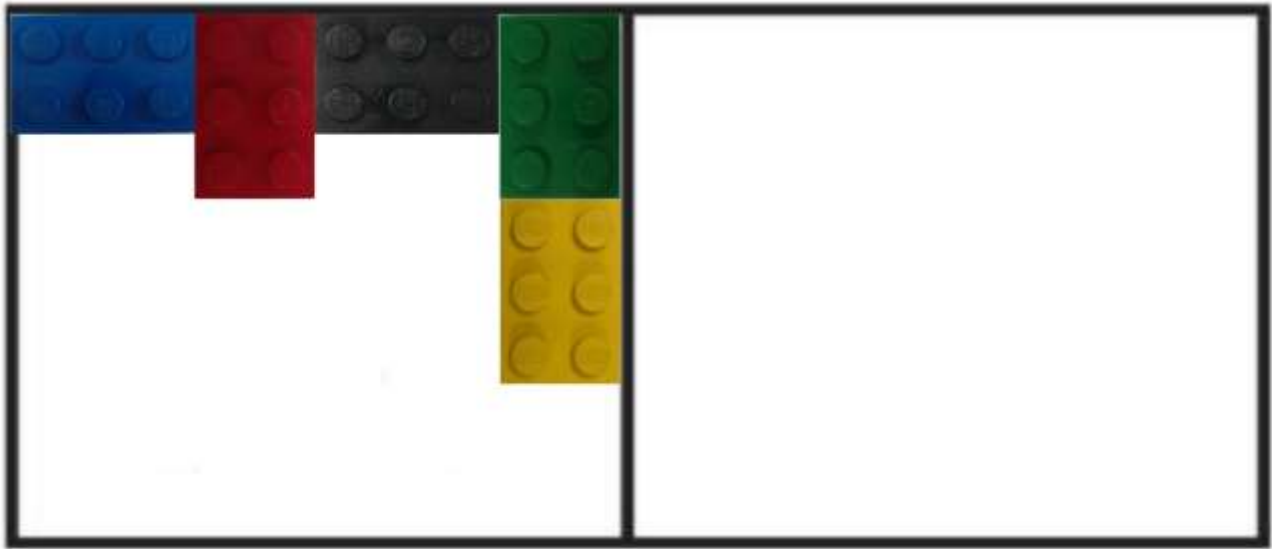

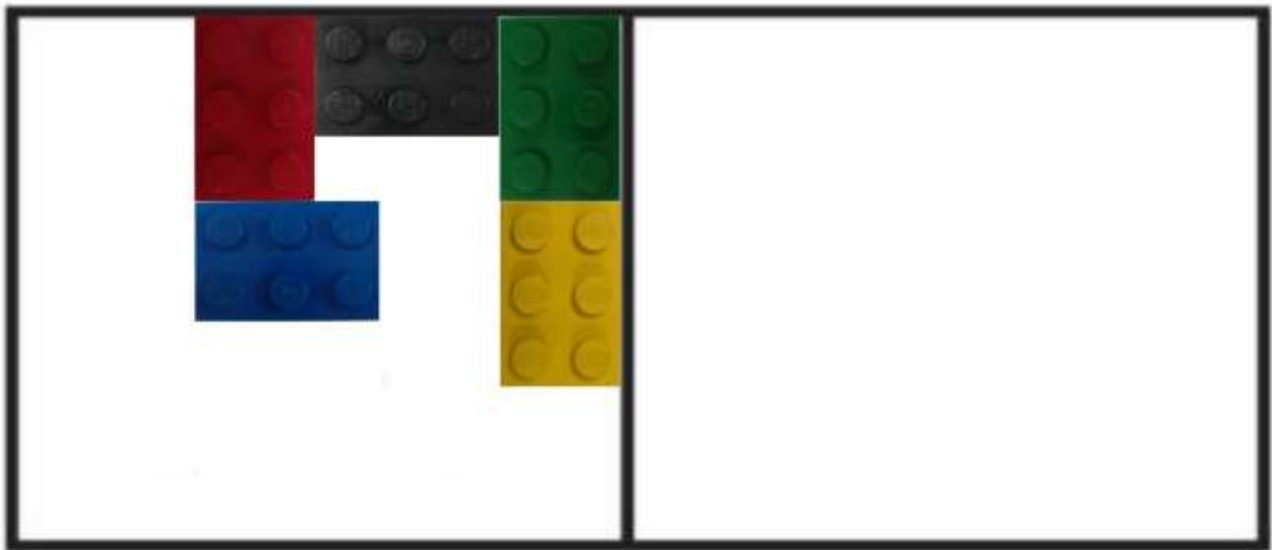

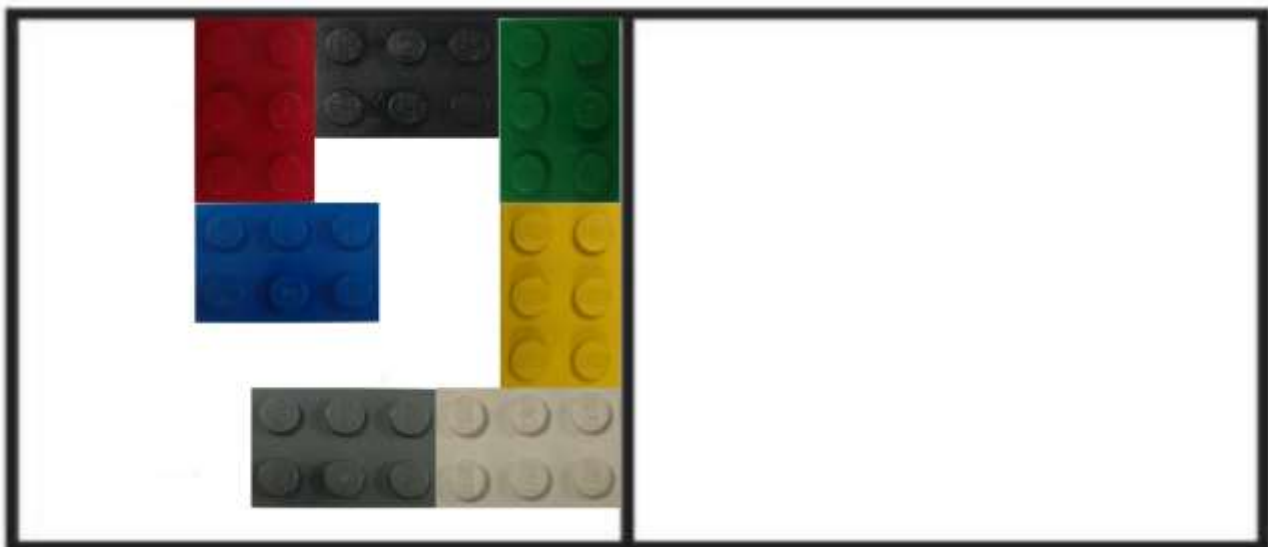

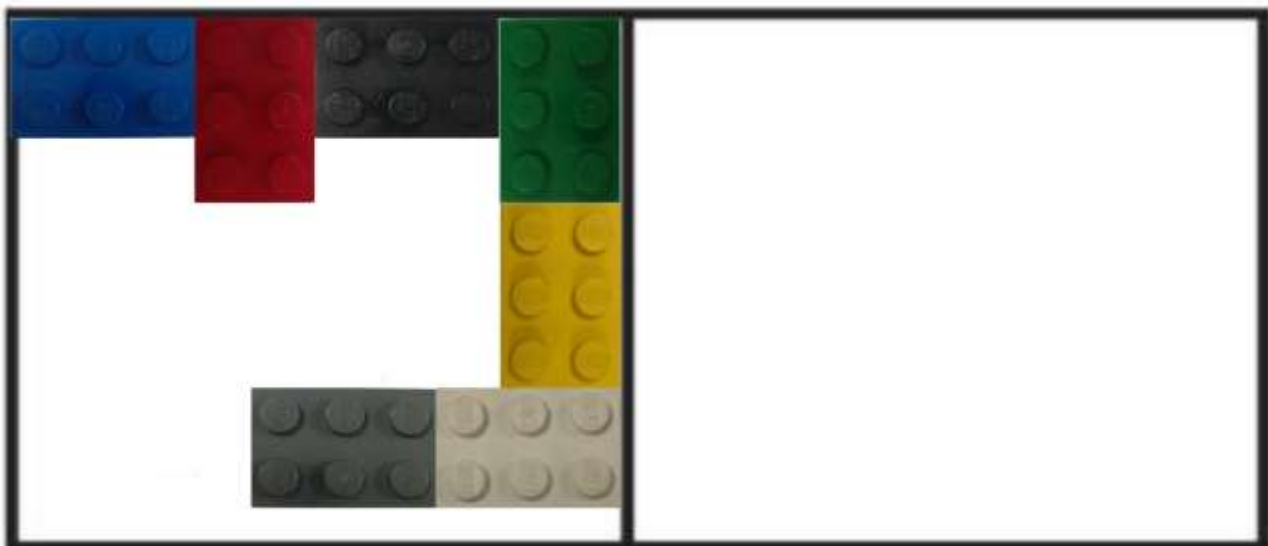

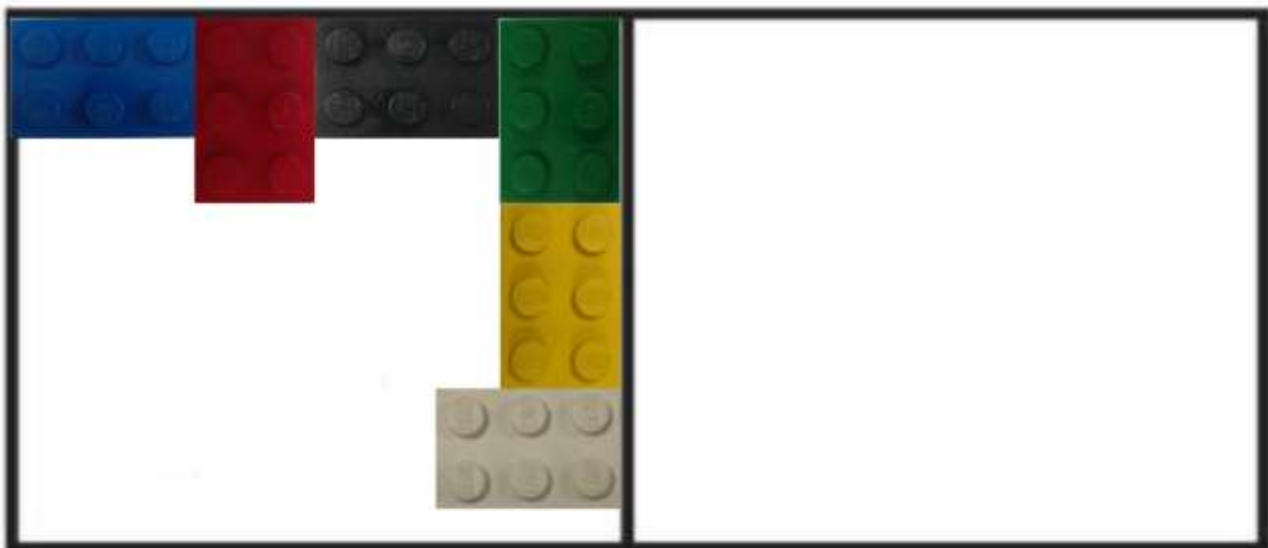

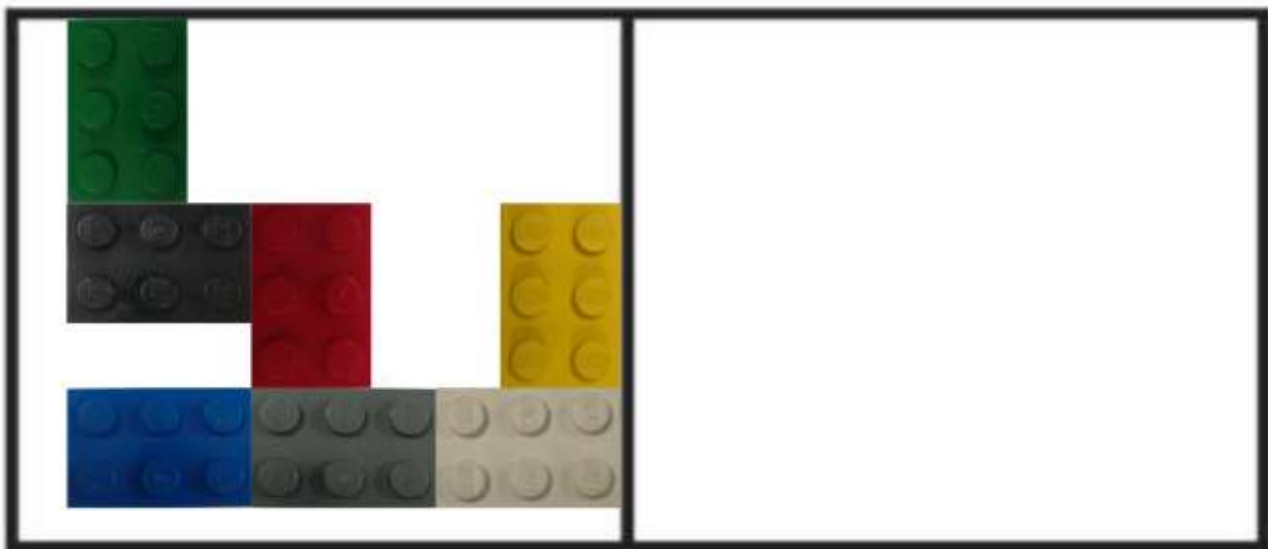

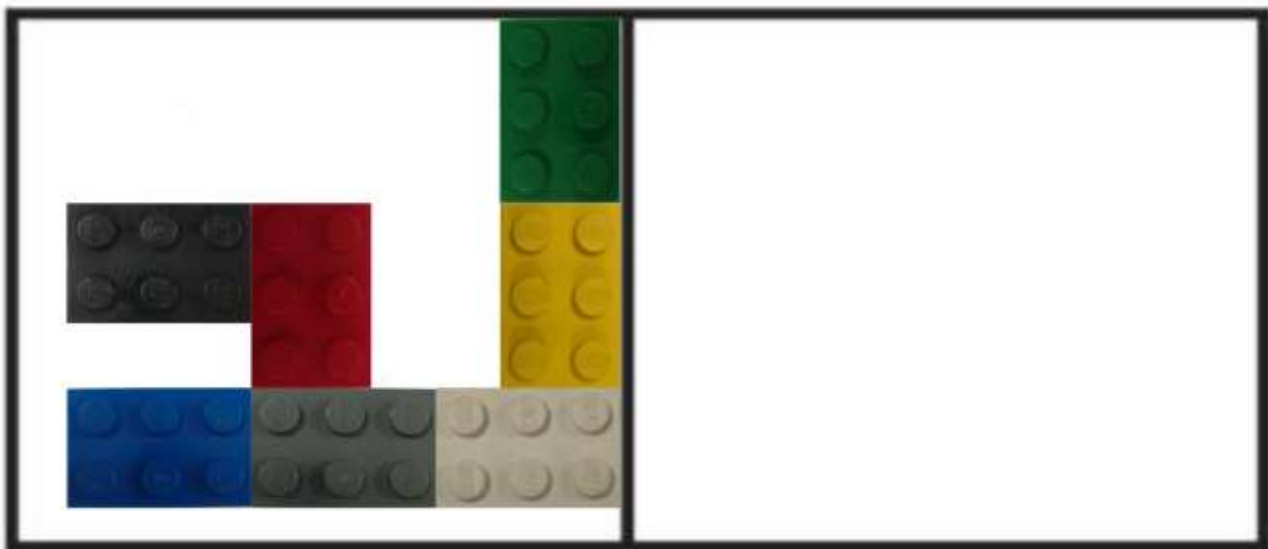

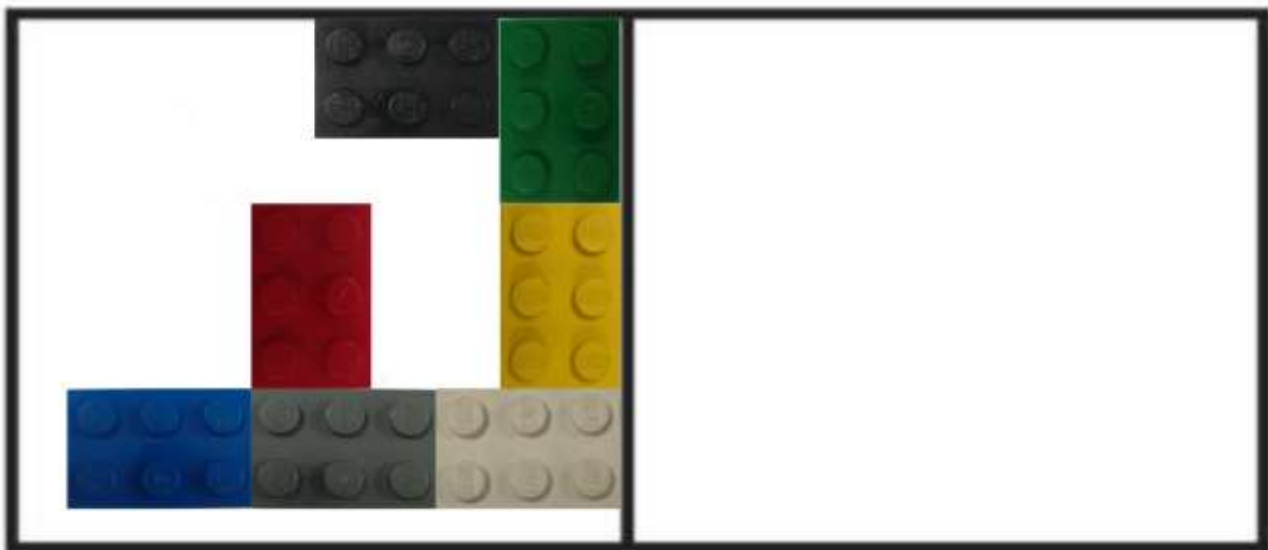

Til læreren

Heftet ”Matematikk-katten: Lego-speiling” er første hefte i serien om speiling. Heftet er laget til elever som synes at matematikk kan være vanskelig. Elever som opplever at matematikken er vanskelig trenger at oppgavene er lett gjenkjennelige og at det er gjentakelser. Heftet har derfor mange like oppgaver.

Heftet kan brukes på to måter:

1. Eleven får sitt eget hefte. Eleven setter Legoklossene i det hvite feltet, så de blir speilvendt i forhold til bildene i heftet. Etterpå kan eleven tegne rundt Legoklossene. Det er viktig at fargene på klossene er de samme som i heftet. Eventuelt kan eleven fargelegge klossene som er tegnet for å visuelt gjøre det enda tydeligere.
2. Klipp ut bildene av Legoklosser og gi bildene til eleven. Eleven setter klossene så de blir speilvendt i forhold til klossene på bildene. Eleven kan eventuelt tegne rundt klossene og fargelegge

Lykke til med å bruke heftet.

Om «Matematik i vanskeligheder»:

«Matematik i vanskeligheder» er dansk og lager produkt og undervisningsmateriell til elever som opplever at matematikk er vanskelig. Vi har en positiv filosofi om at det er matematikken som er problematisk og ikke den enkelte elev.
