Bokmål

Når tallene trøbler

Speilvending av tall

1-5

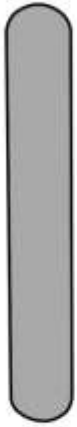

Skriv oppå tallet:

Skriv oppå tallet:

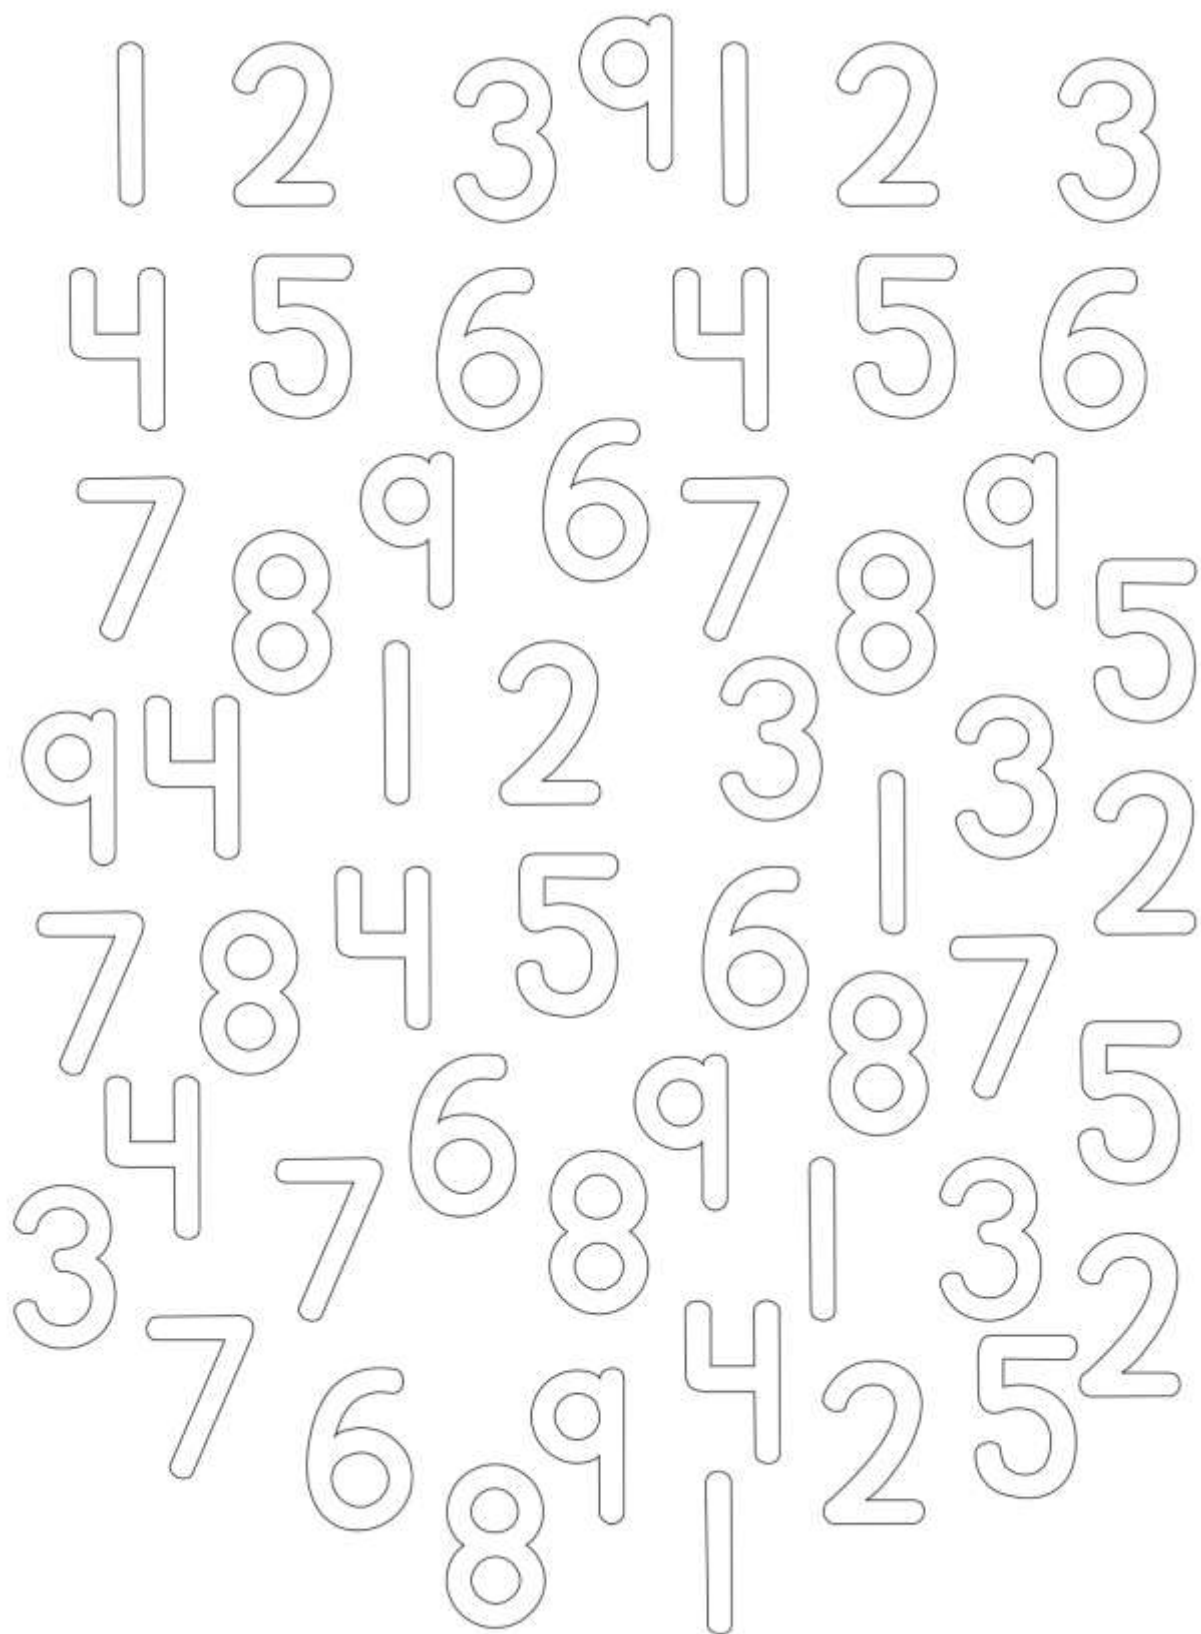

Fargelegg tallet:

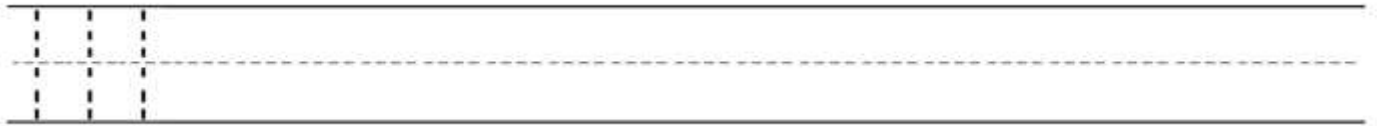

Fargelegg prikkene i tallet:

Fargelegg alle 1-tallene:

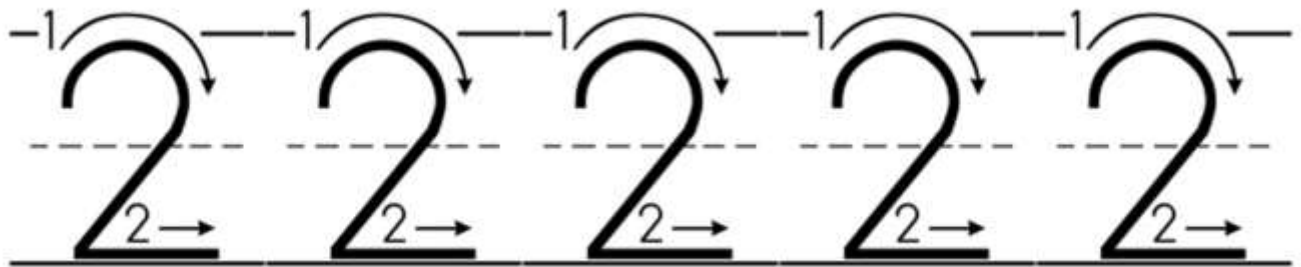

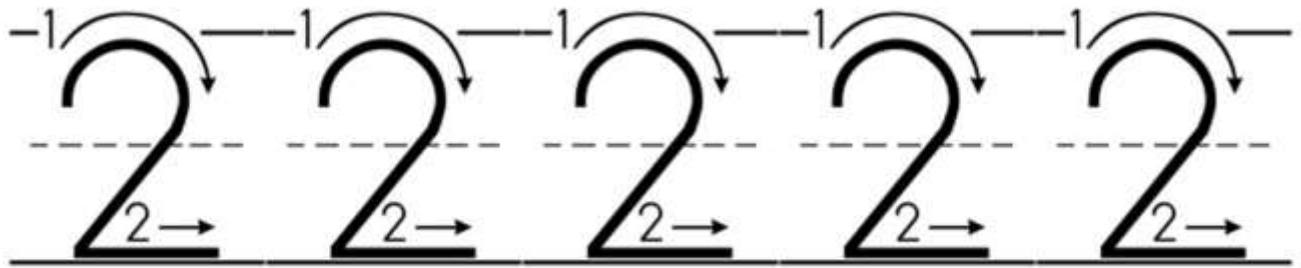

Skriv 1-tall:

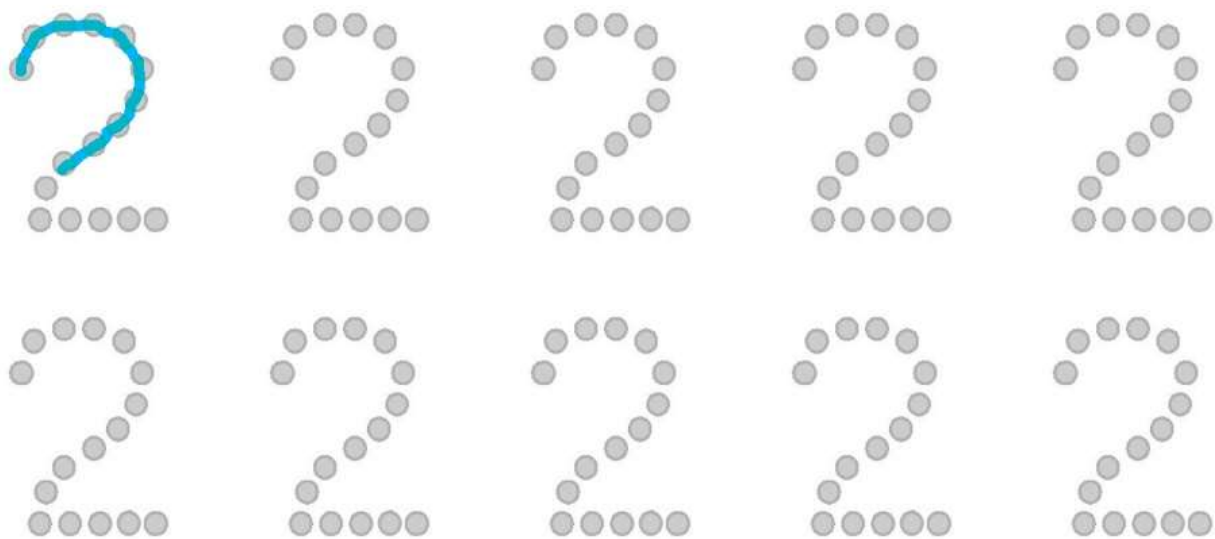

Skriv 1-tall:

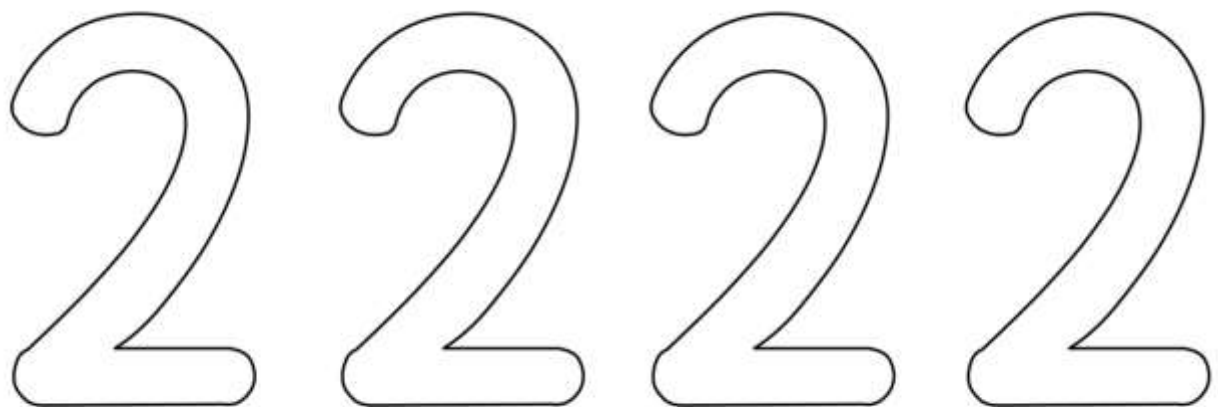

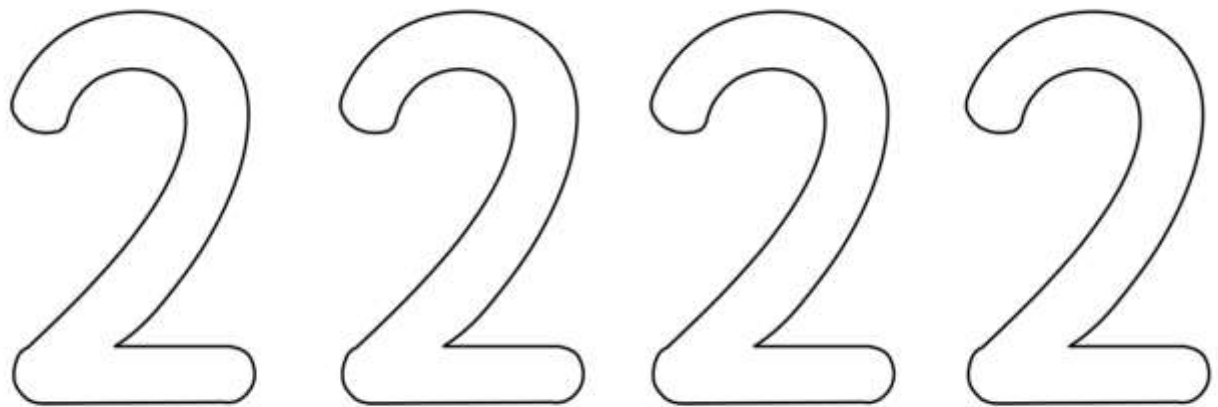

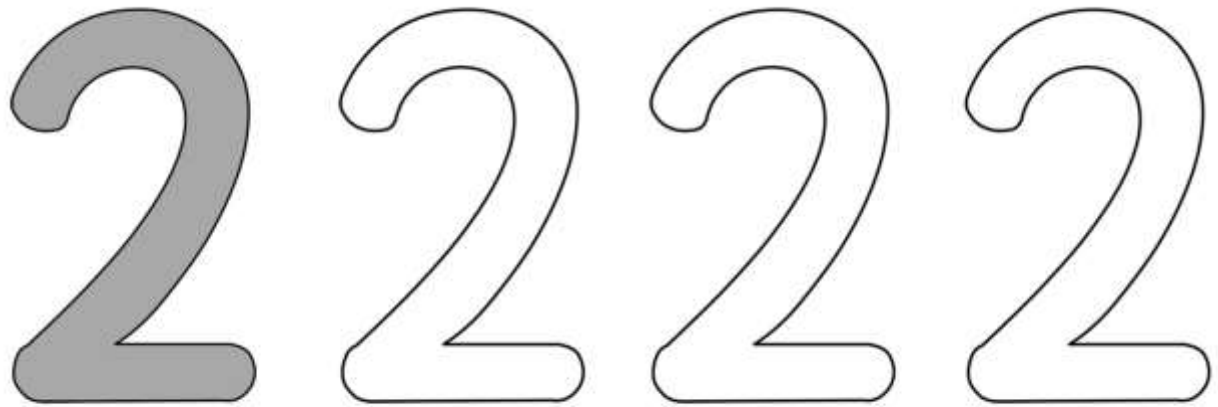

Skriv oppå tallene:

Skriv oppå tallene:

Fargelegg tallene:

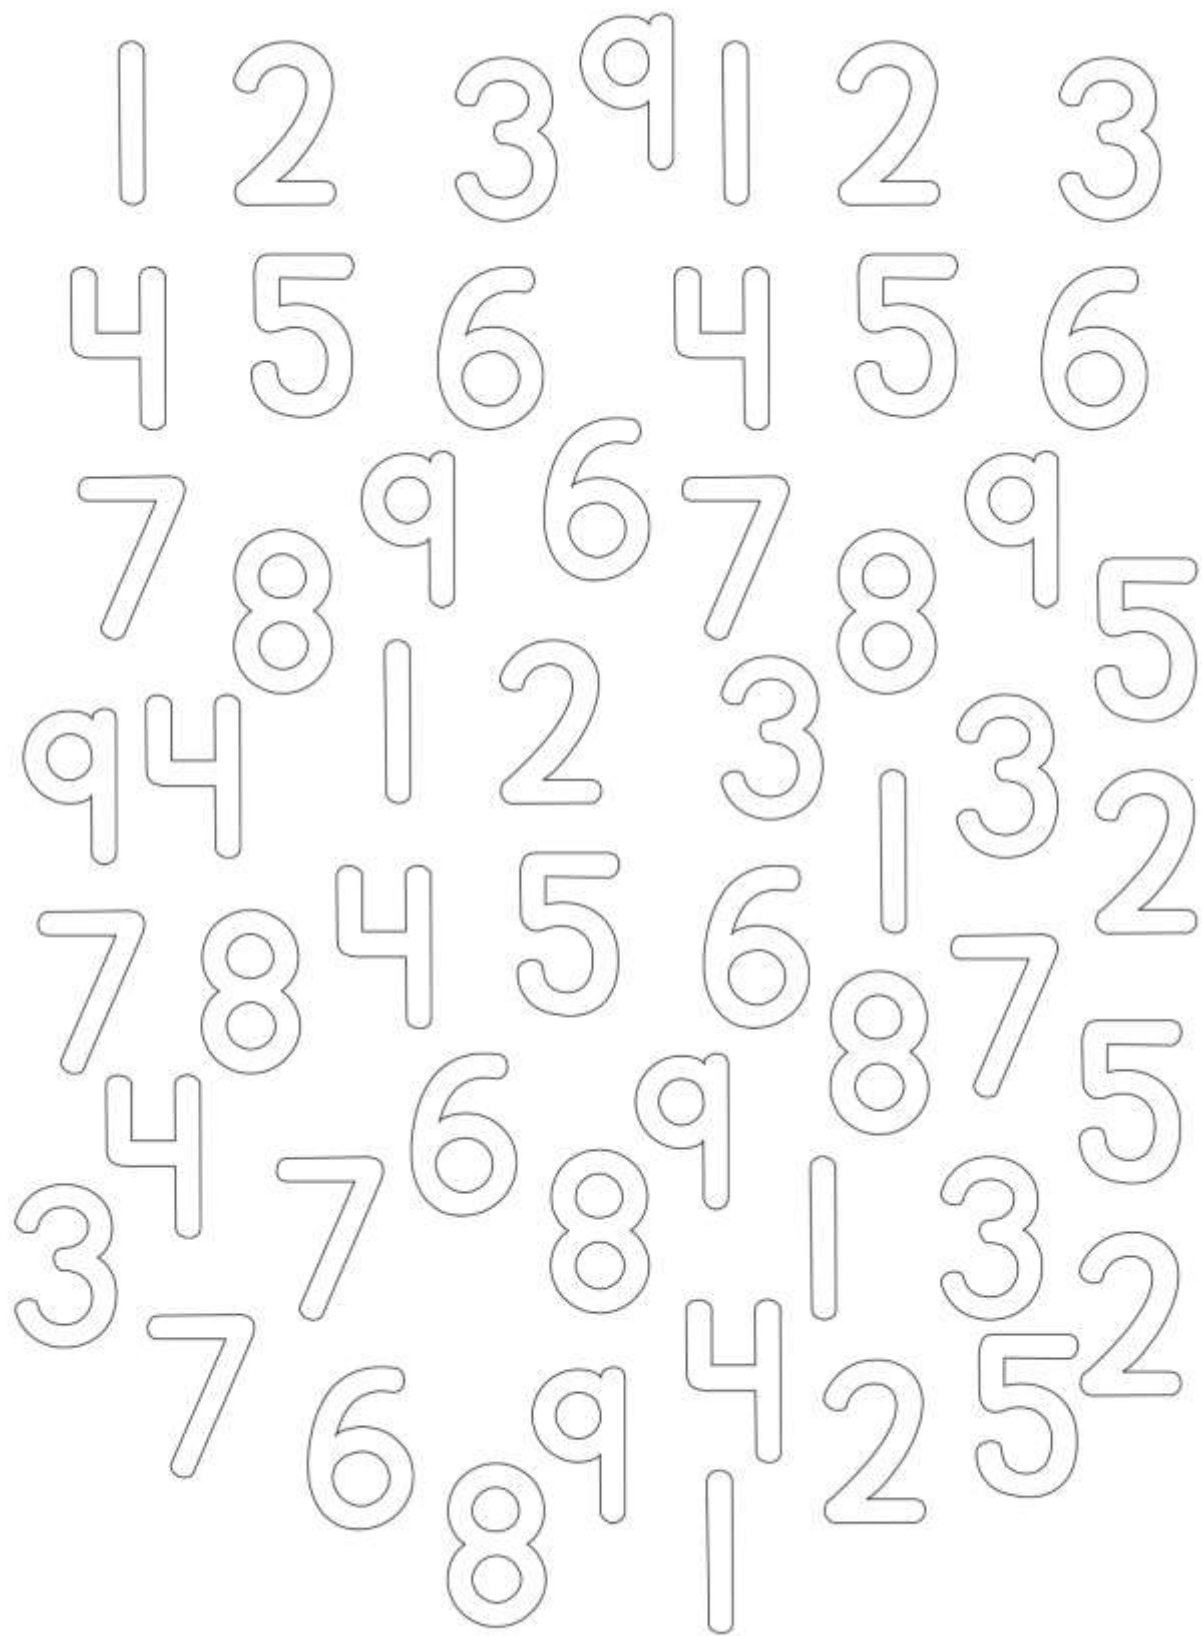

Fargelegg prikkene i tallene:

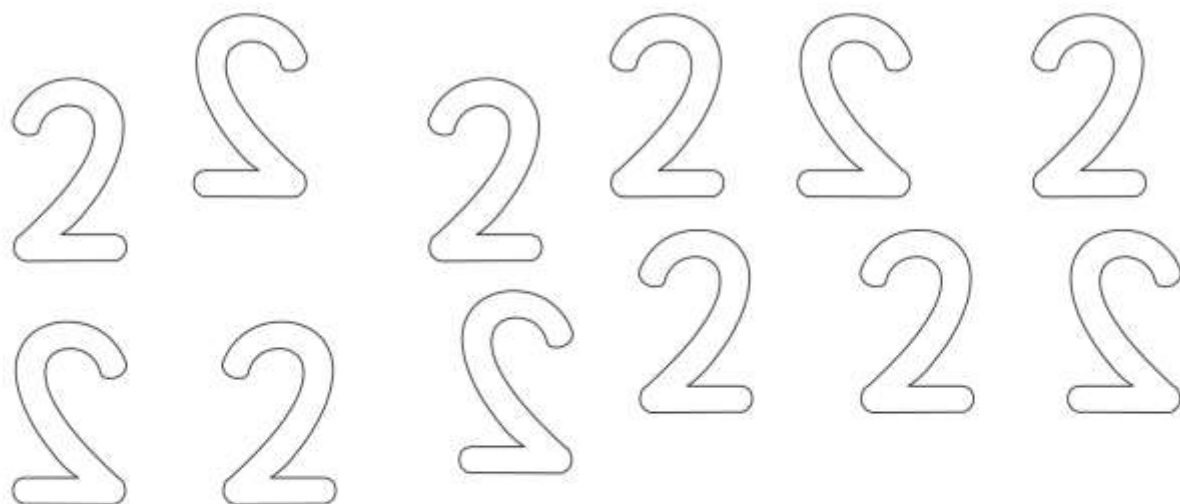

Fargelegg det riktige 2-tallet rødt og det som er feil vei gult:

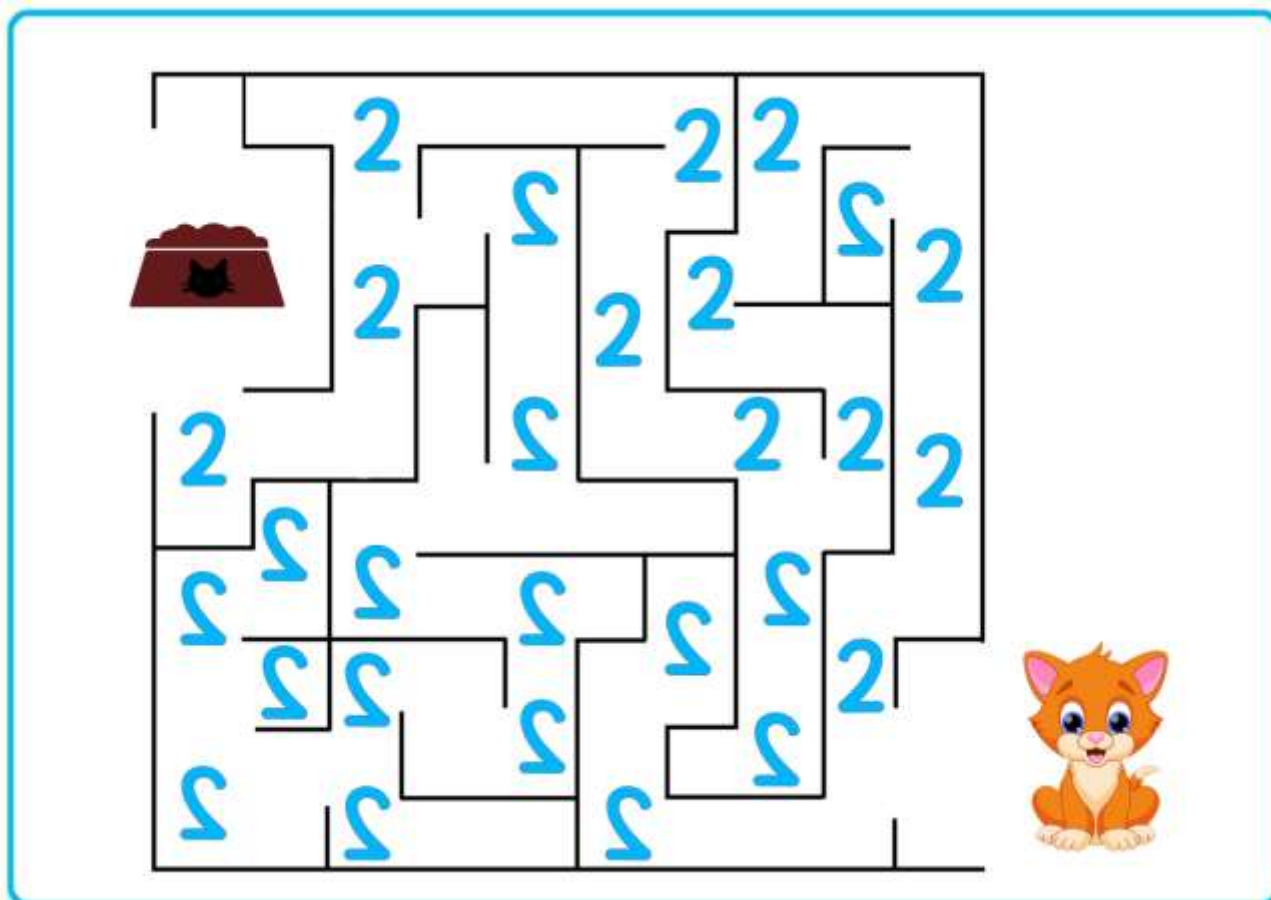

Fargelegg alle 2-tallene:

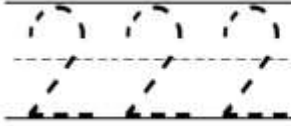

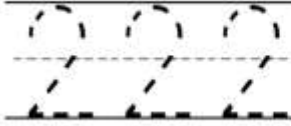

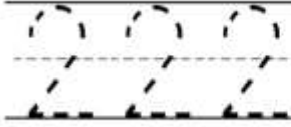

Fargelegg 2-tallene som er rett vei røde, og de som er feil vei gule:

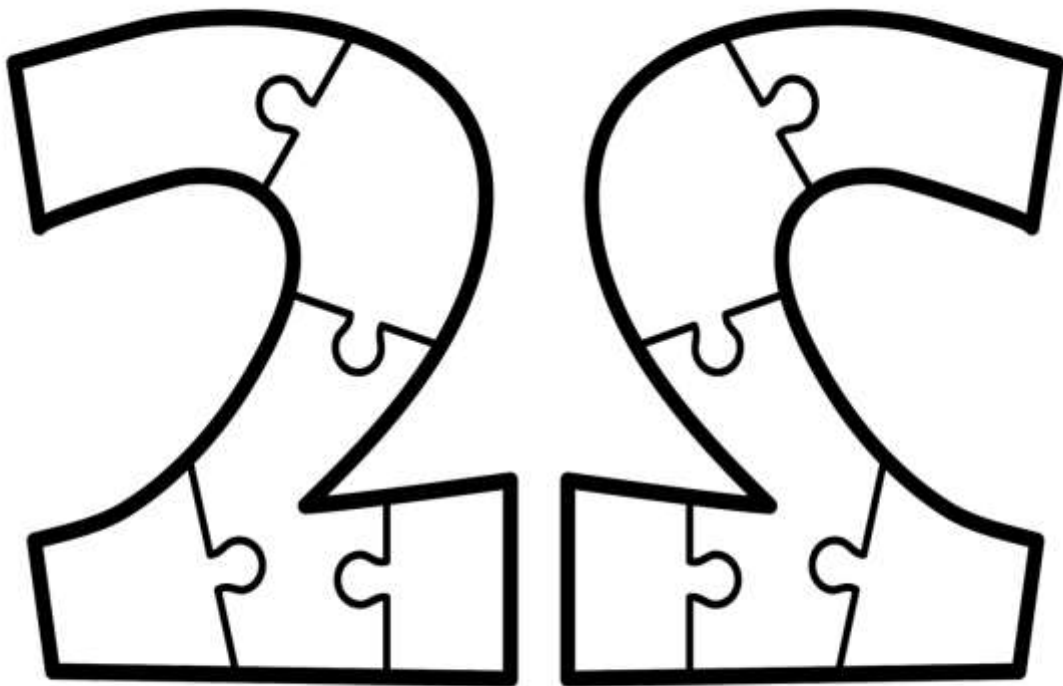

Hjelp katten ned til maten sin. Følg 2-tallene som riktige:

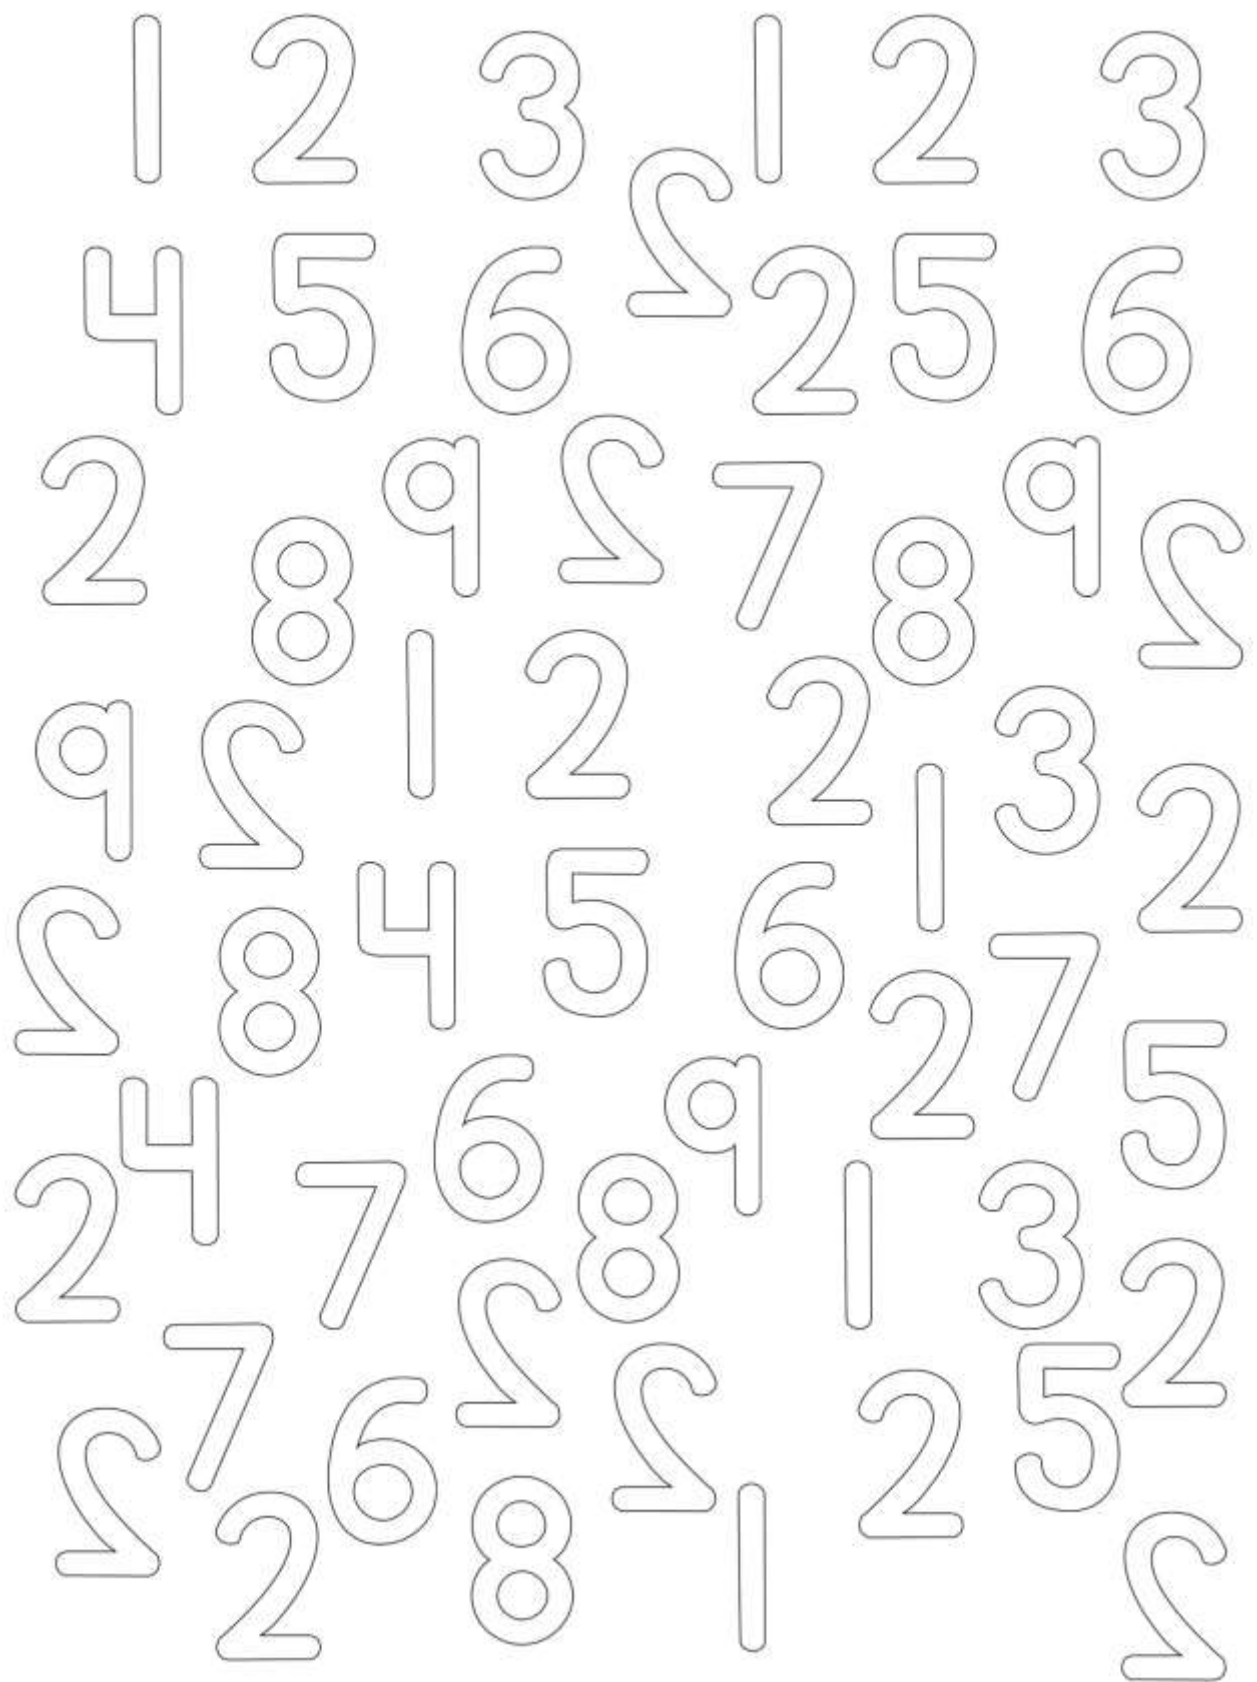

Skriv 2-tall:

Fargelegg bitene i det 2-tallet som er rett vei:

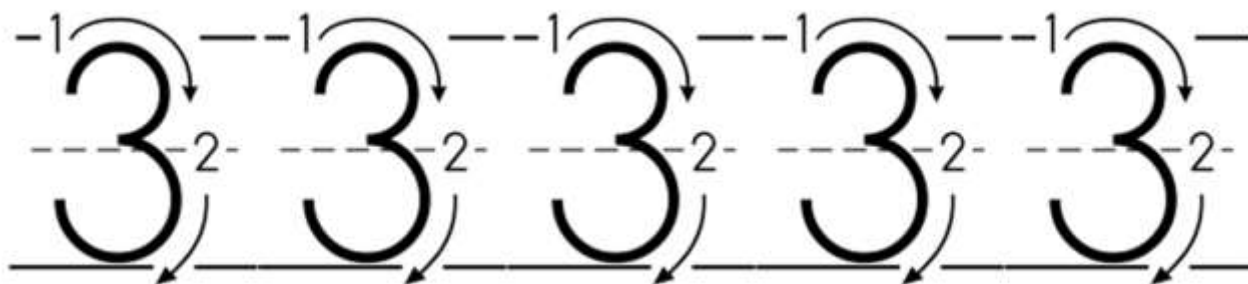

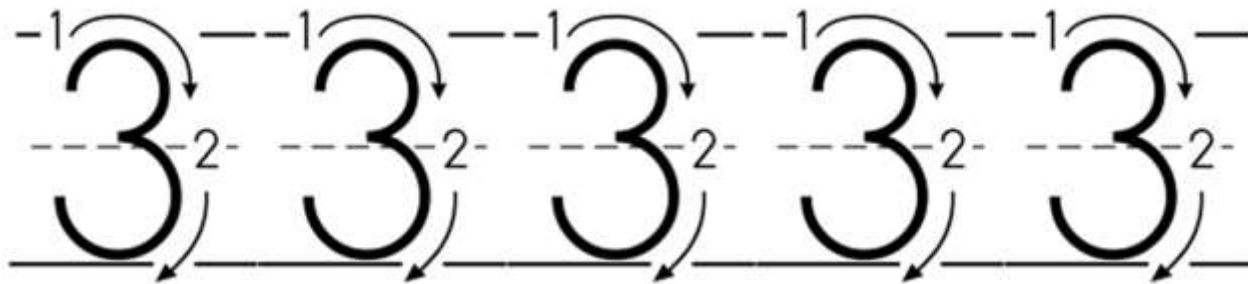

Fargelegg bare de 2-tallene som er rett vei:

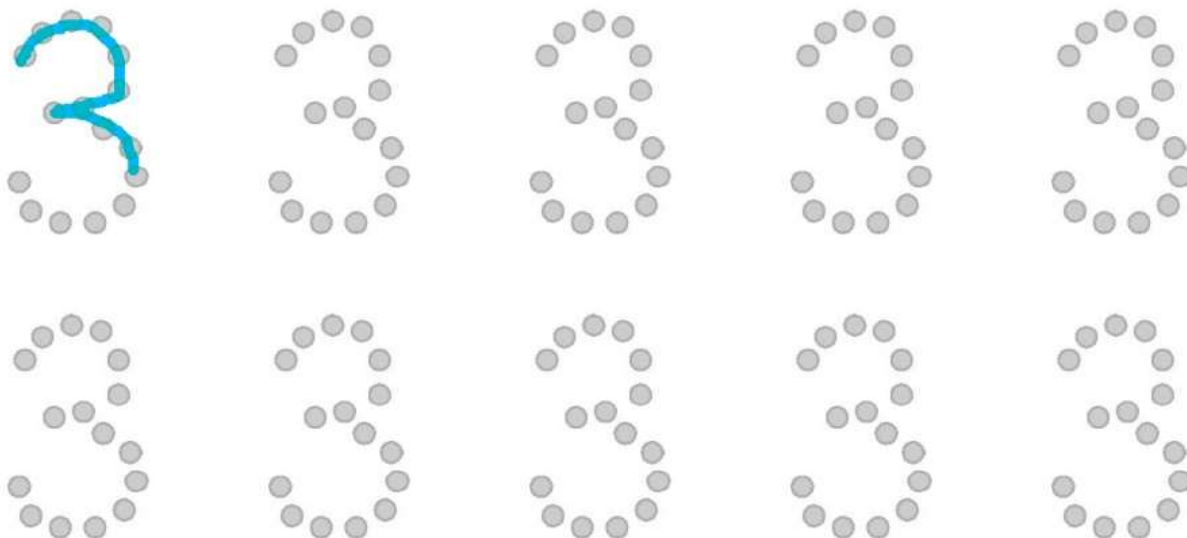

Skriv 2-tall:

Skriv oppå tallene:

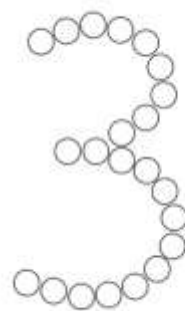

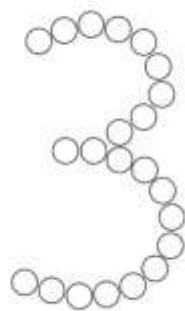

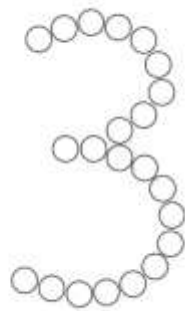

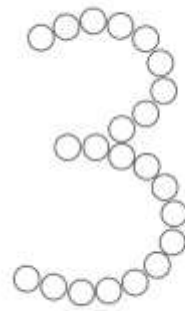

Skriv oppå tallene:

Fargelegg tallene:

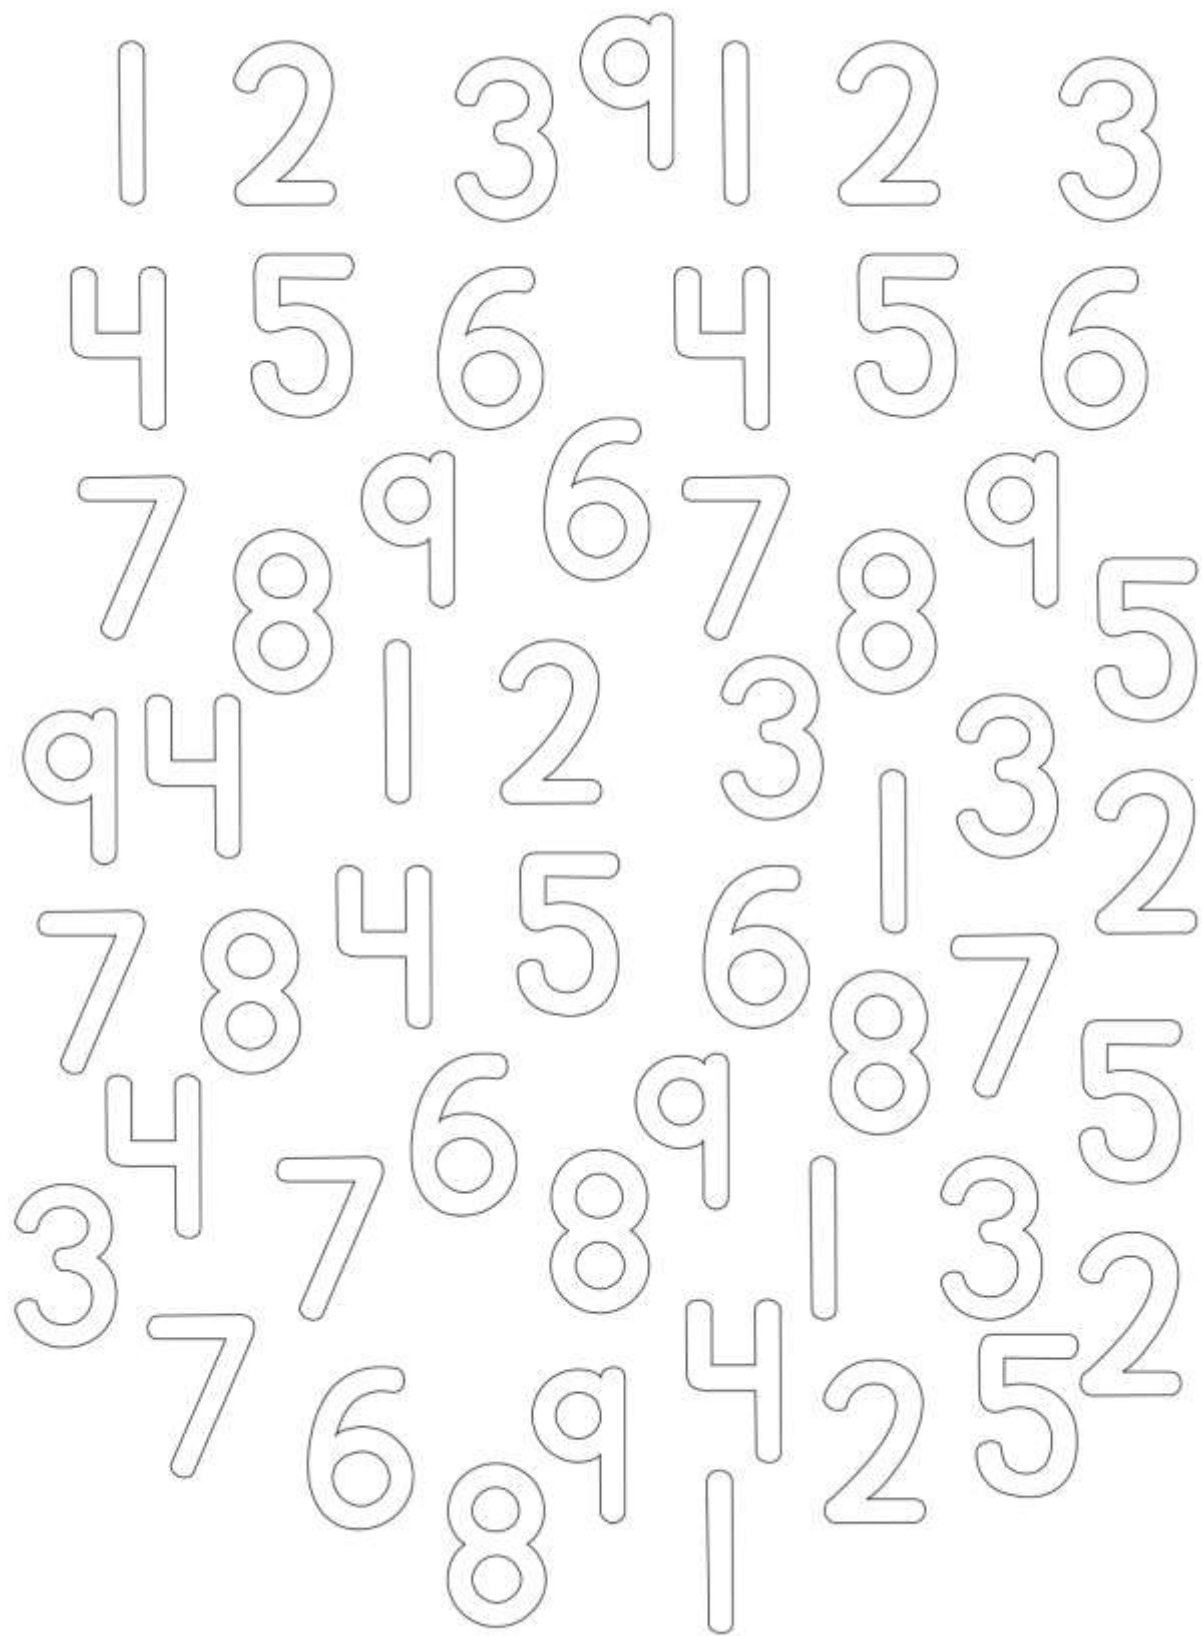

Fargelegg prikkene i tallene:

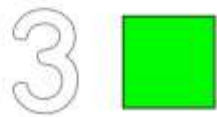

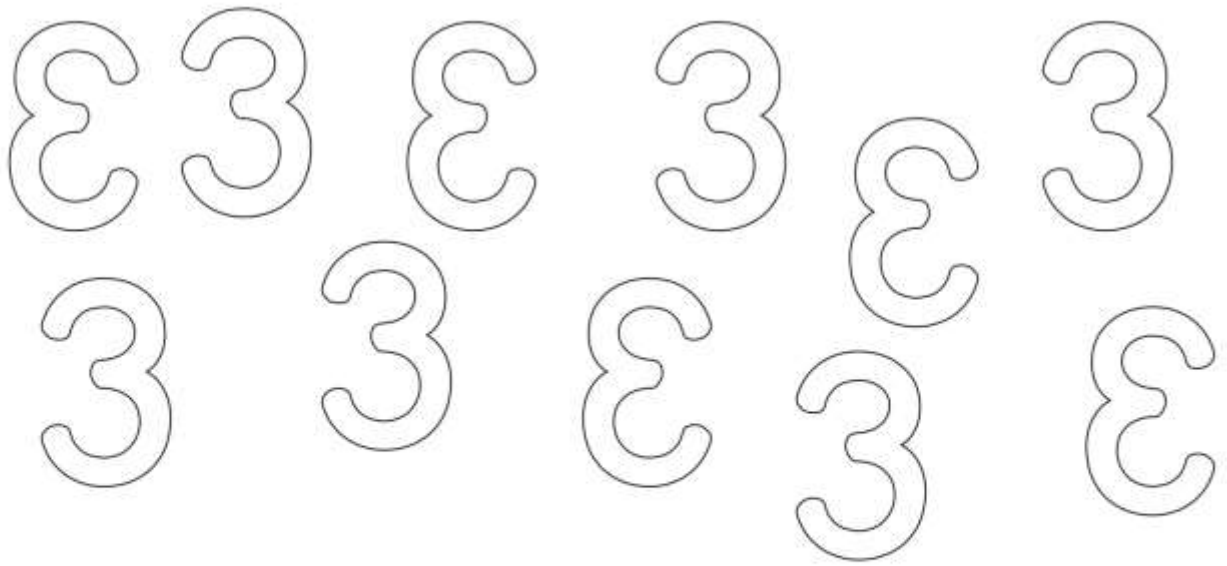

Fargelegg det riktige 3-tallet grønt og det som er feil vei svart:

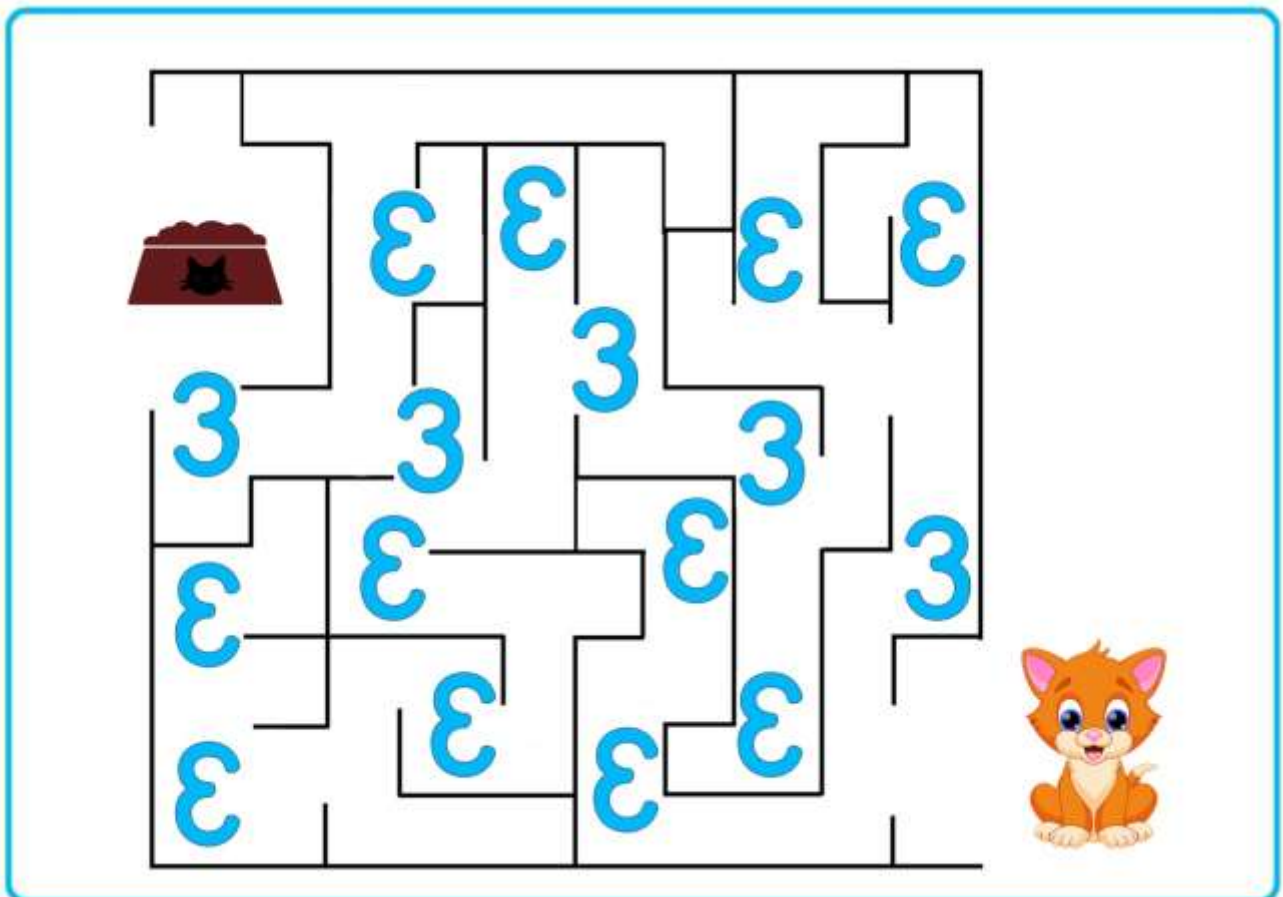

Fargelegg alle 3-tallene:

Fargelegg de riktige 3-tallene grønne og de som er feil vei svarte:

Hjelp katten ned til maten sin. Følg 3-tallene som er riktige:

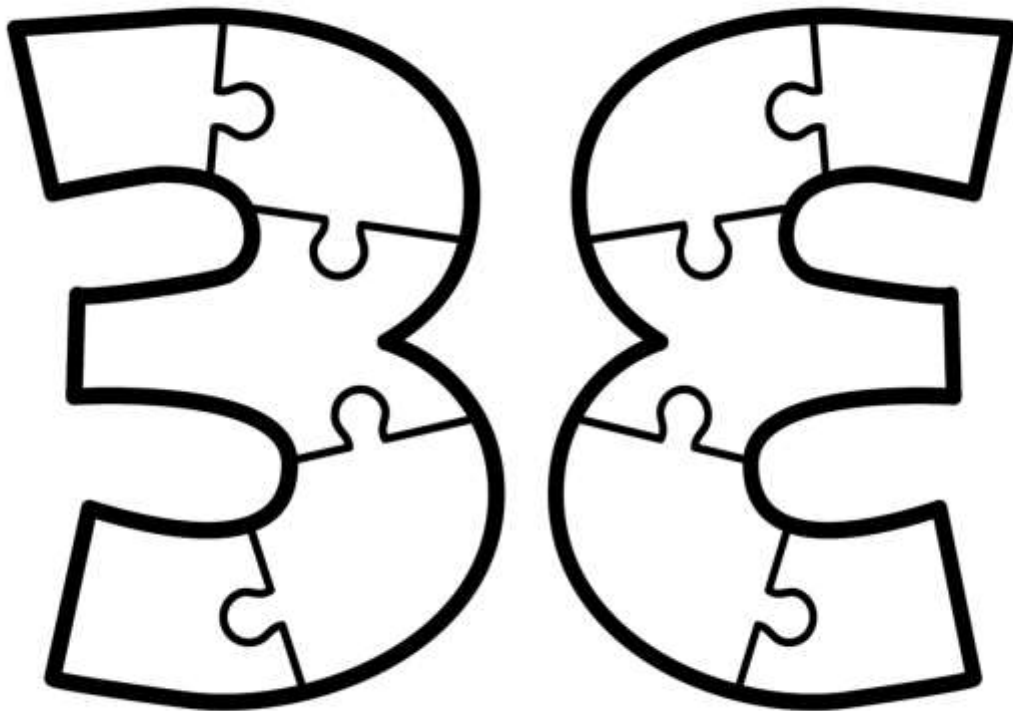

Skriv 3-tall:

333

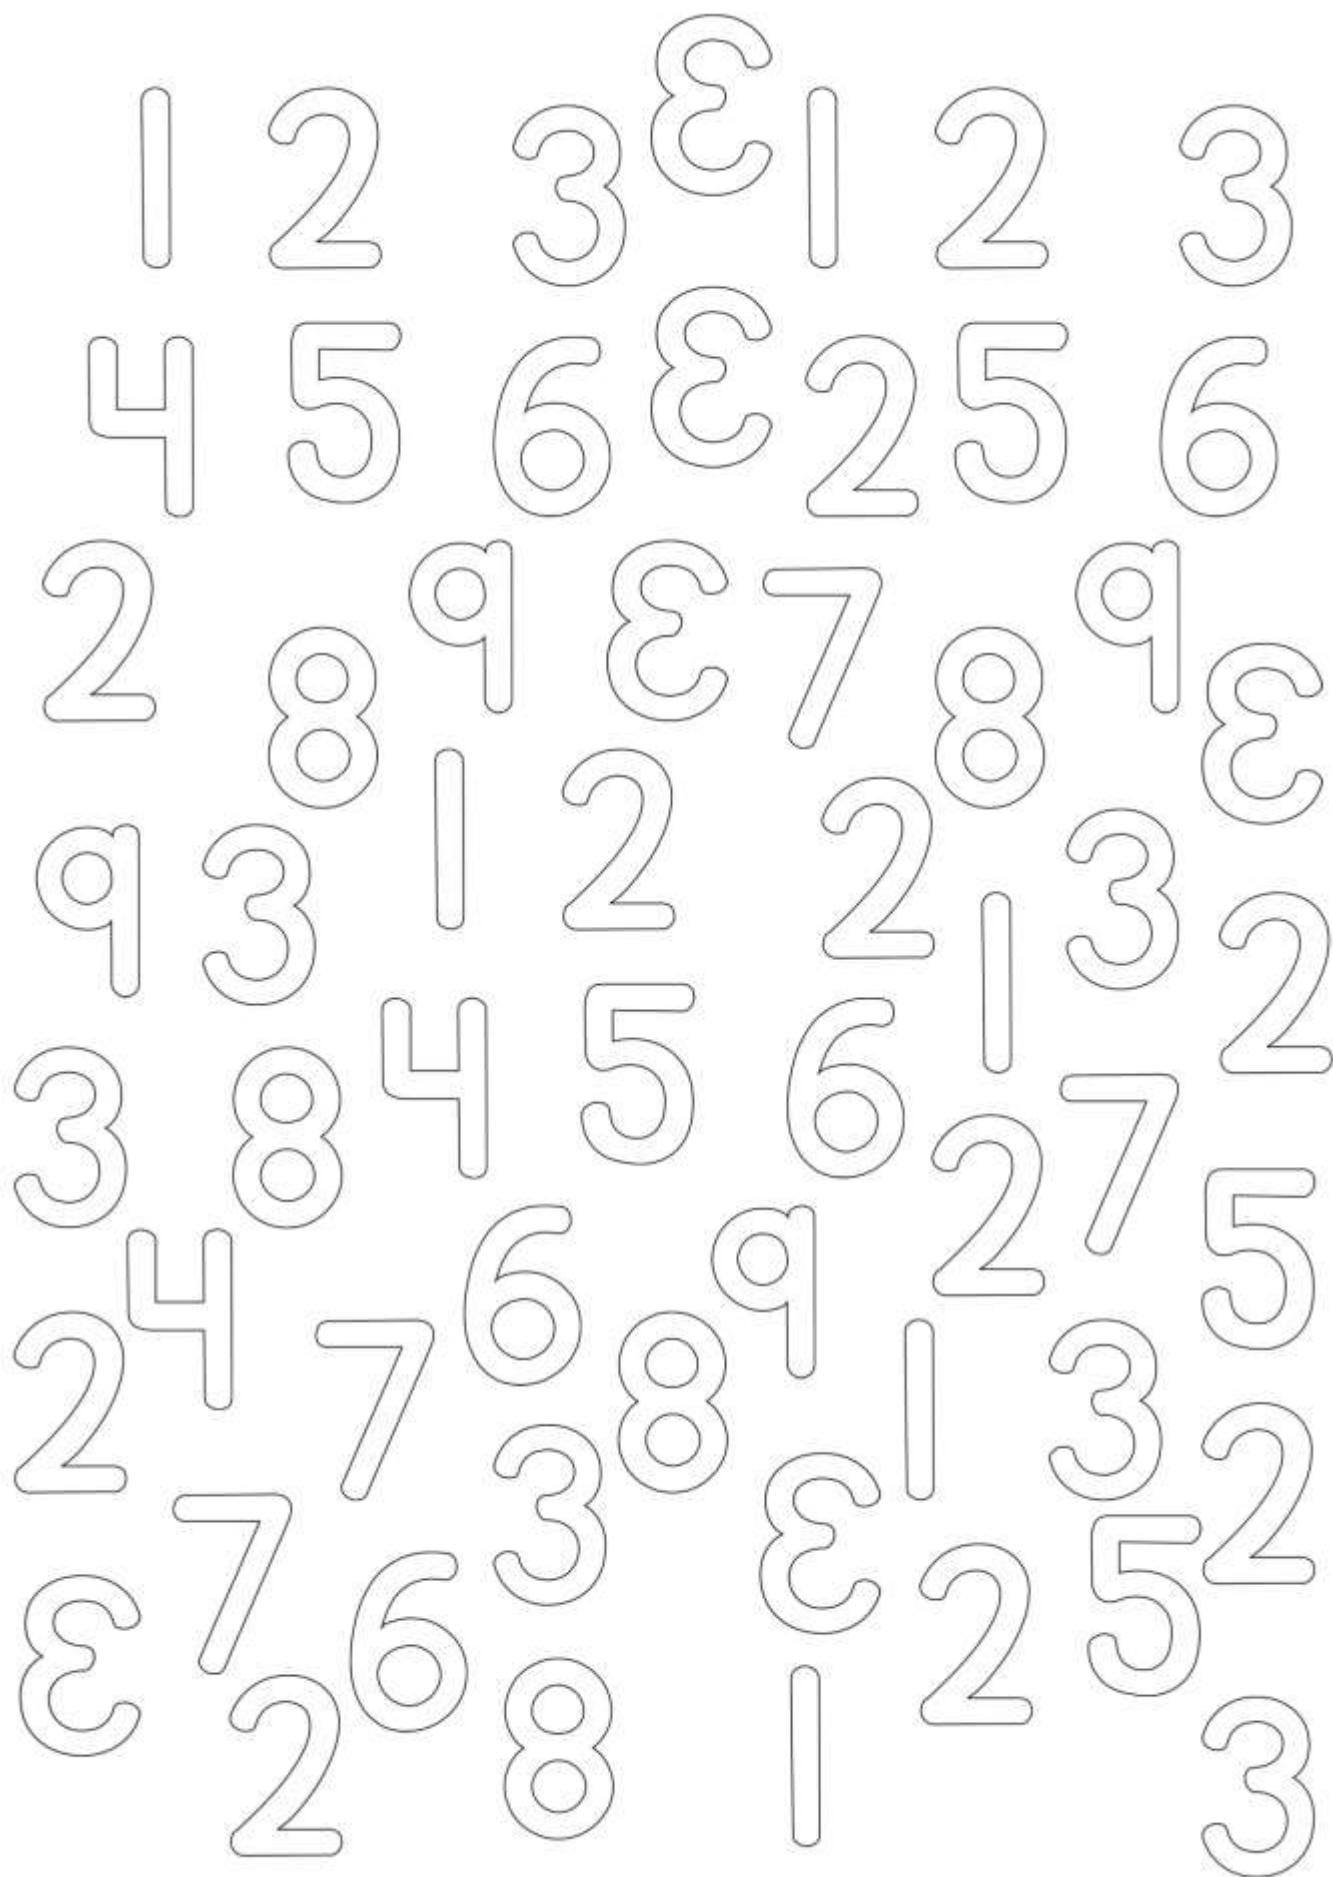

333

333

Fargelegg bitene i det 3-tallet som er riktig vei:

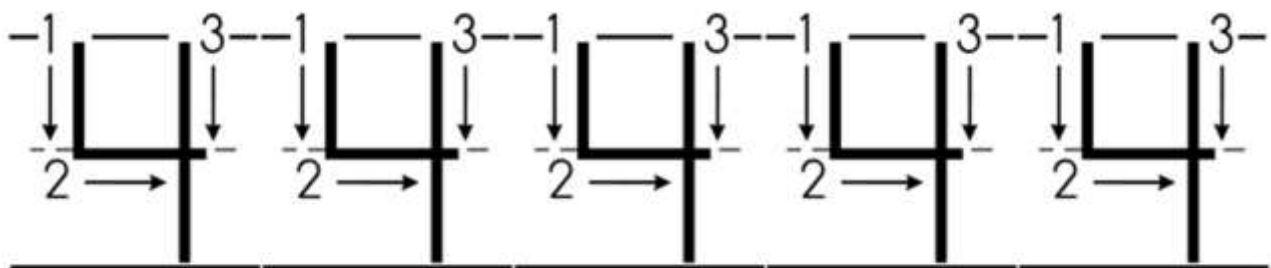

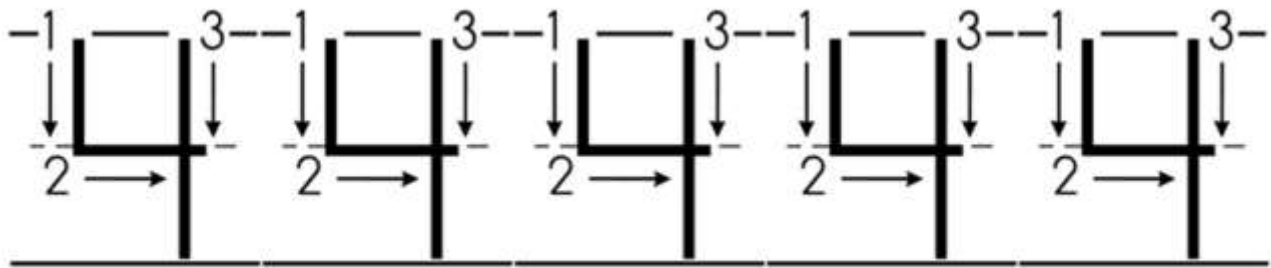

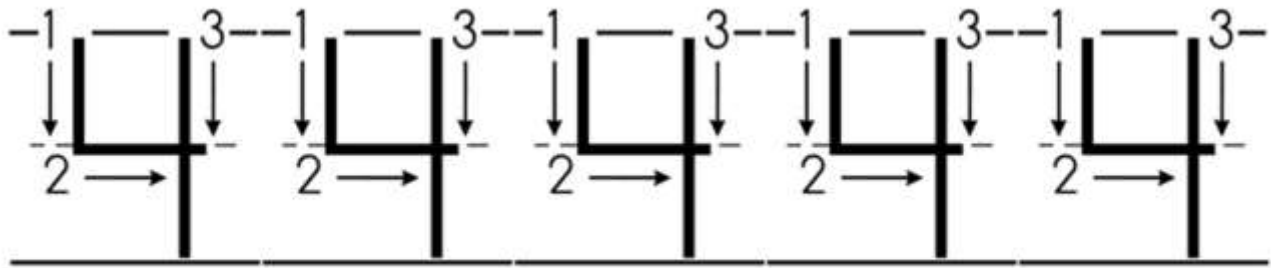

Fargelegg bare de riktige 3-tallene:

Skriv 3-tall:

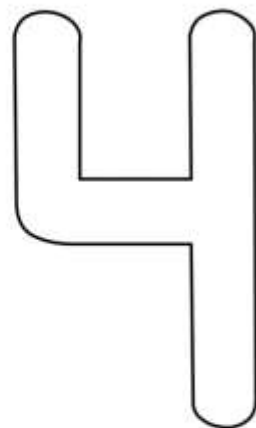

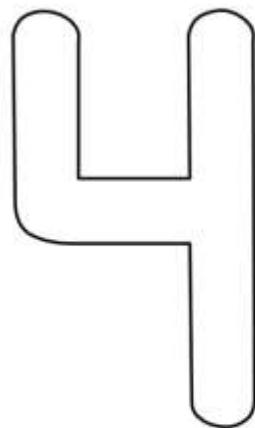

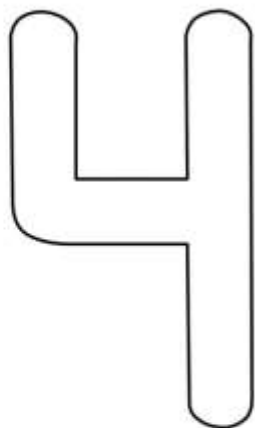

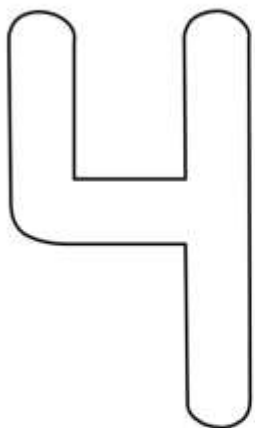

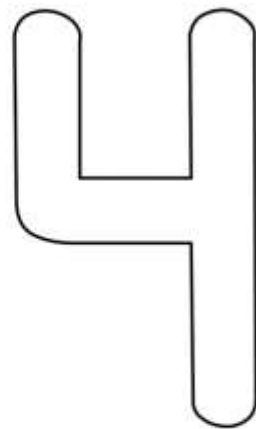

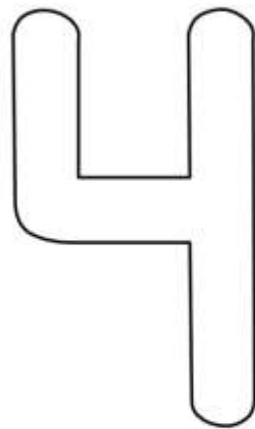

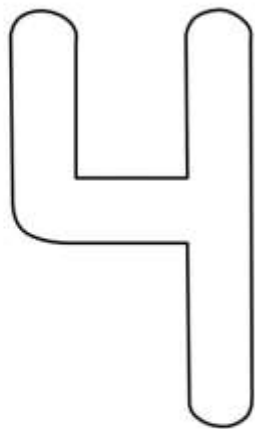

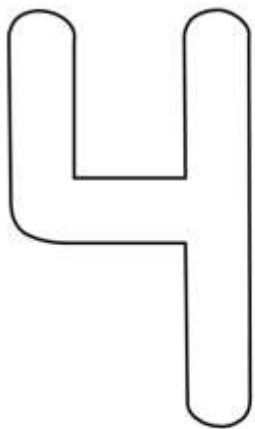

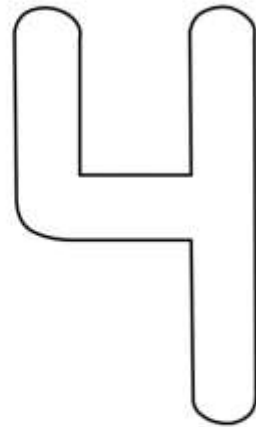

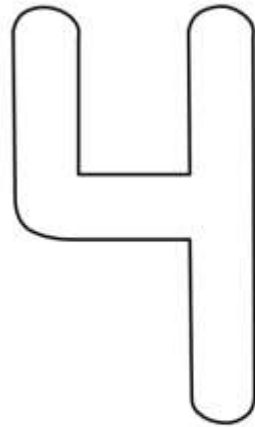

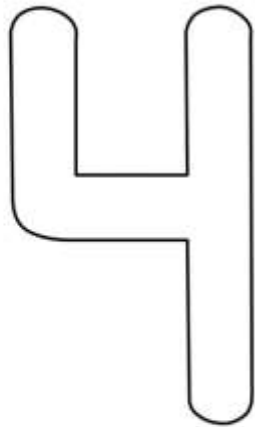

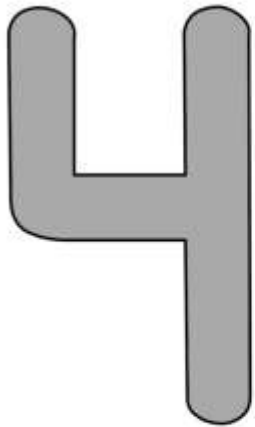

Skriv oppå tallene:

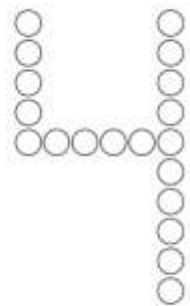

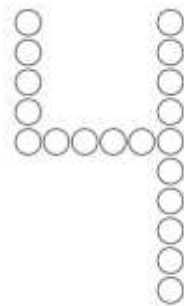

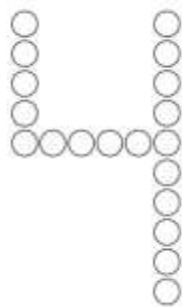

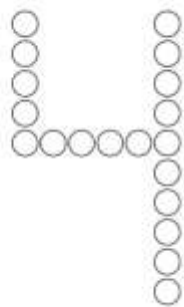

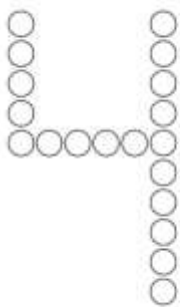

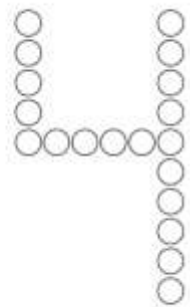

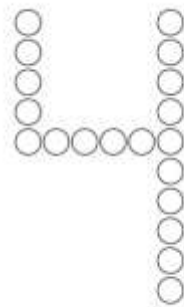

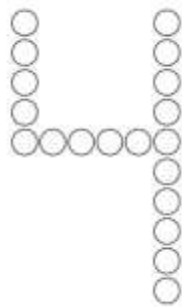

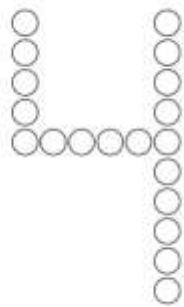

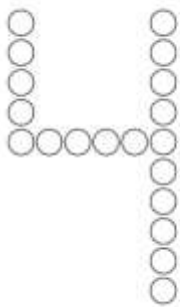

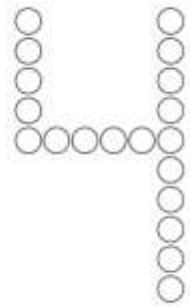

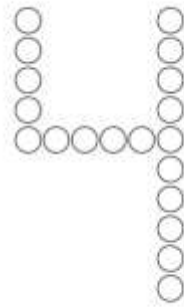

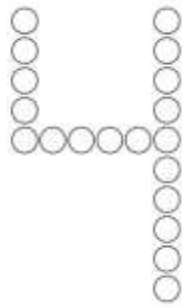

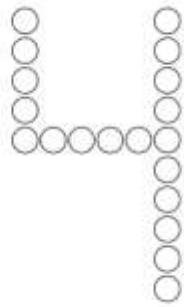

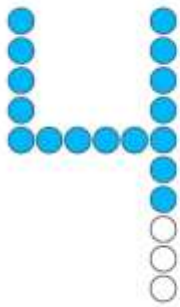

Skriv oppå tallene:

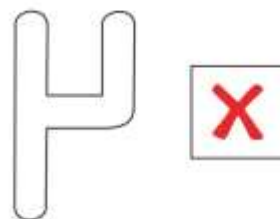

Fargelegg tallene:

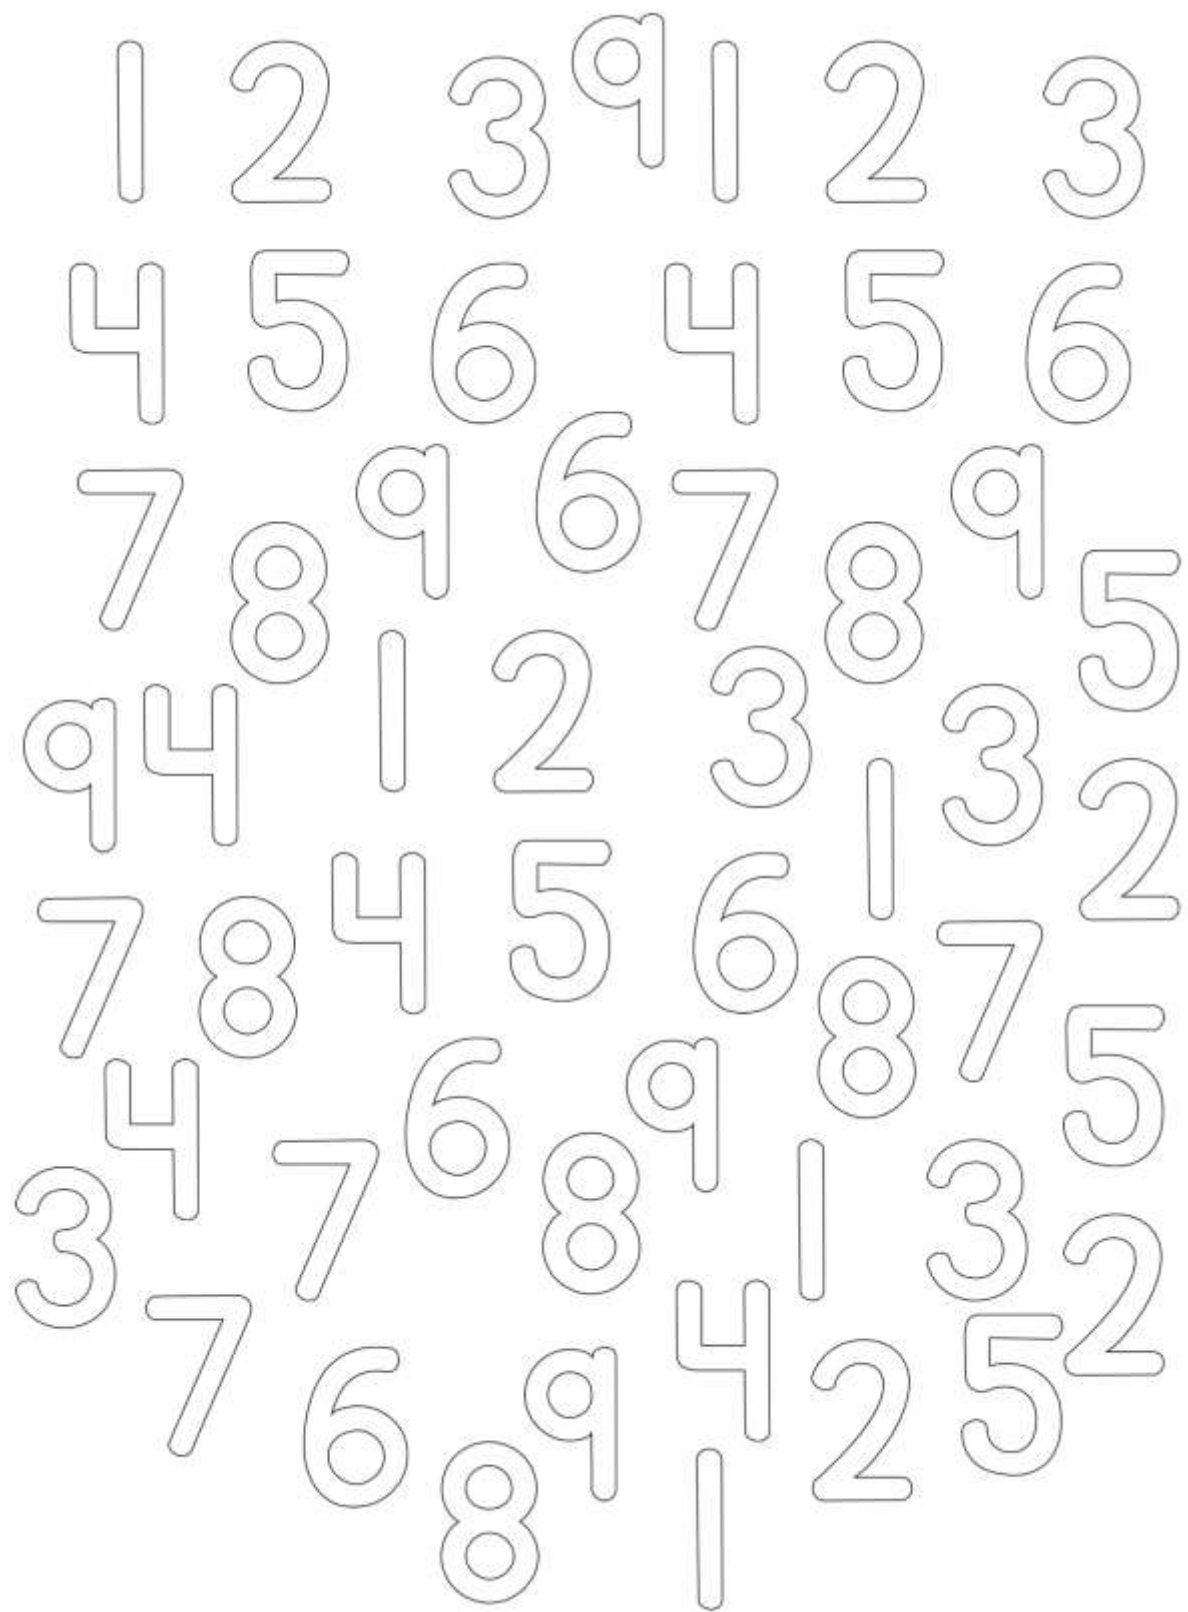

Fargelegg prikkene i tallene:

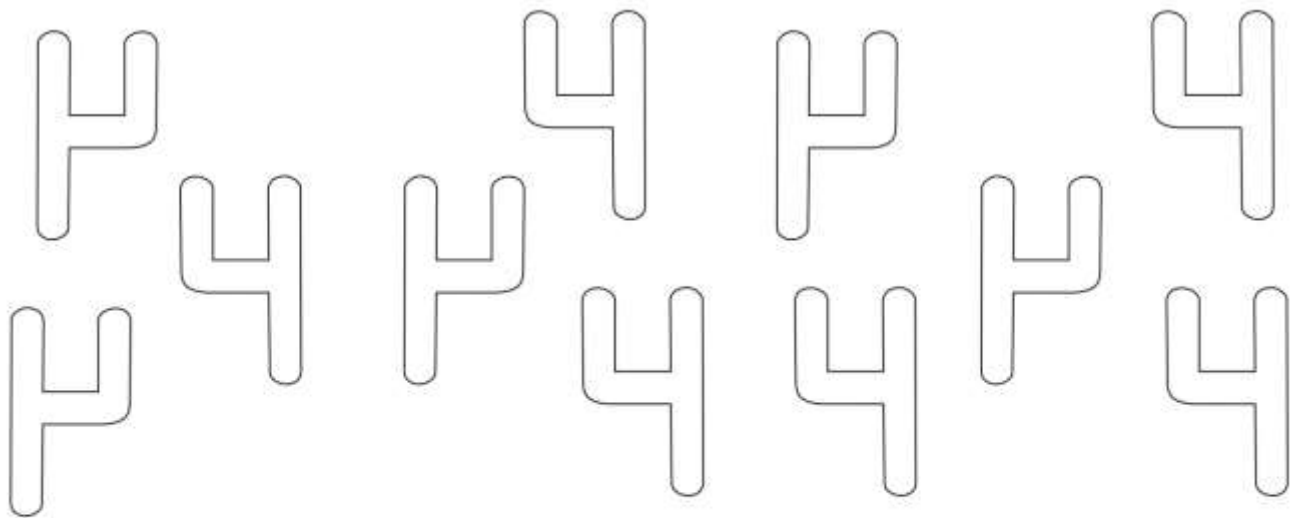

Fargelegg det riktige 4-tallet blått og det som er feil vei brunt:

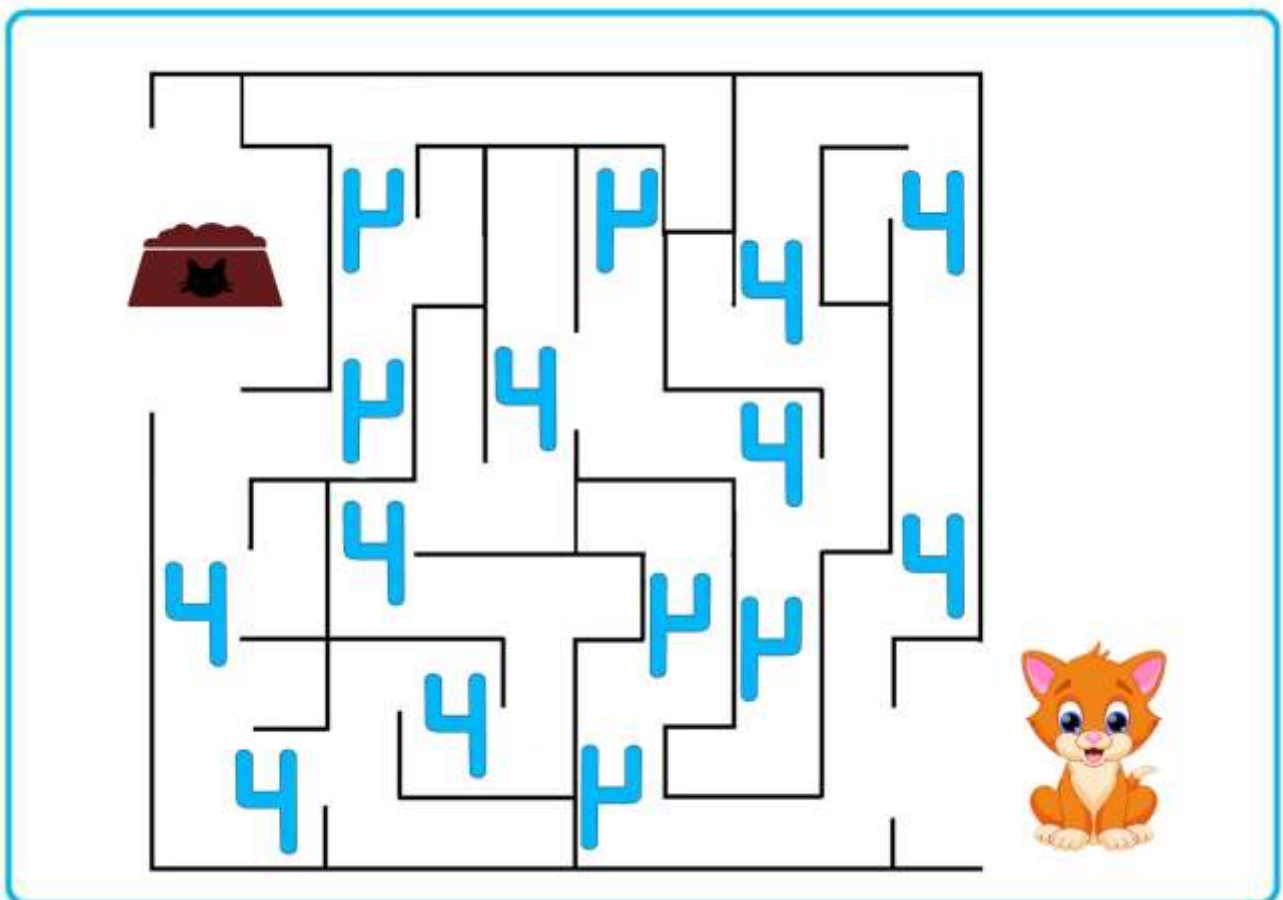

Fargelegg alle 4-tallene:

Fargelegg de riktige 4-tallene blå og de som er feil vei brune:

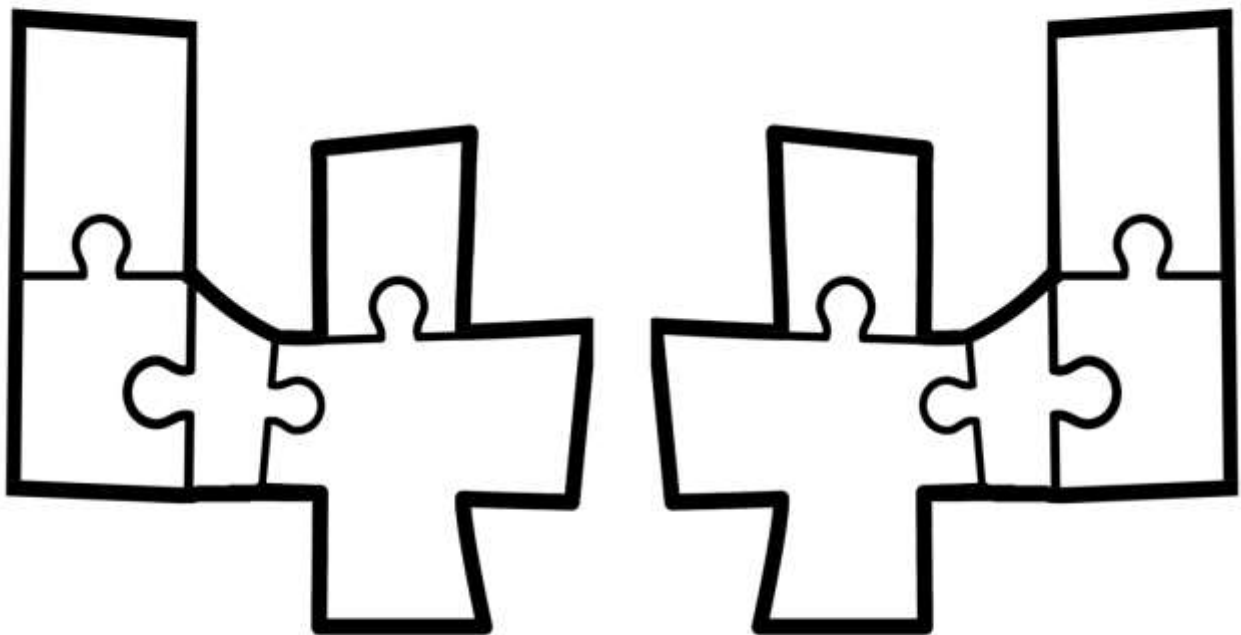

Hjelp katten ned til maten sin. Følg de riktige 4-tallene:

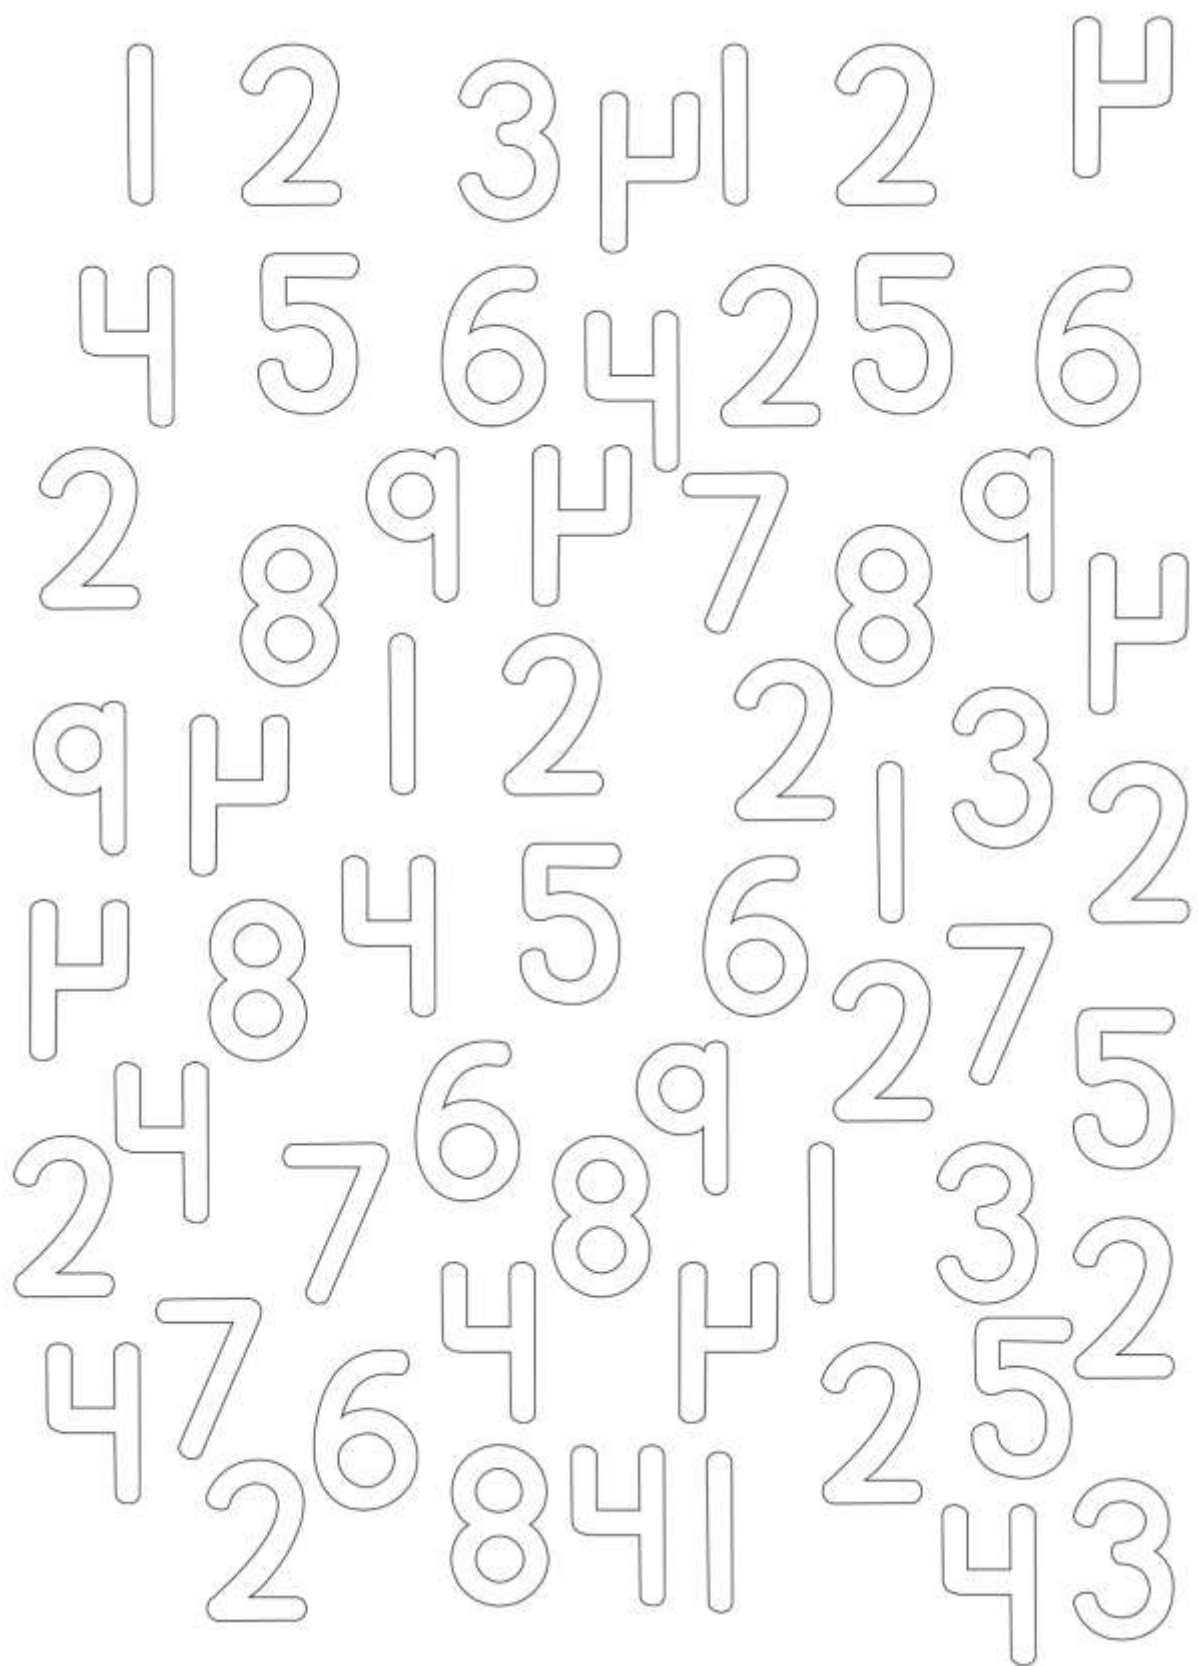

Skriv 4-tallene:

Fargelegg bitene i det riktige 4-tallet:

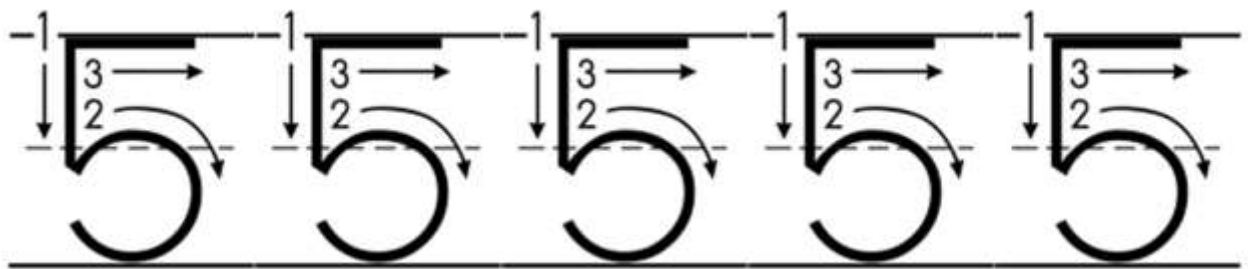

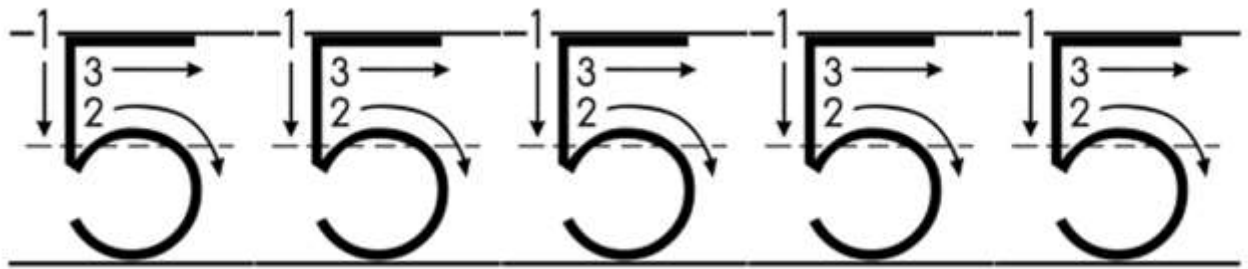

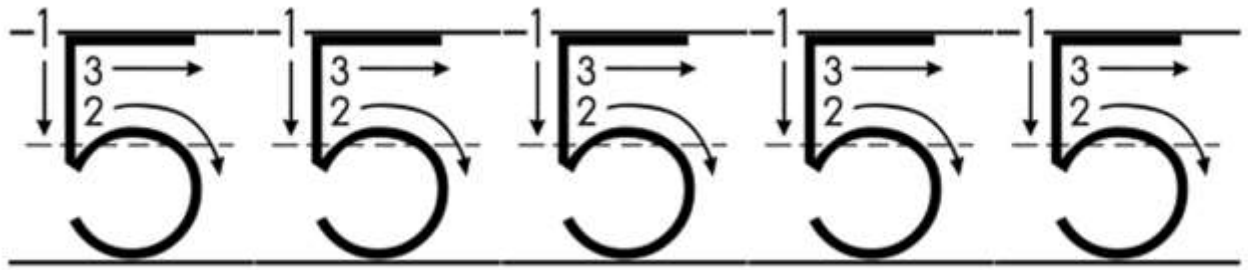

Fargelegg bare de riktige 4-tallene:

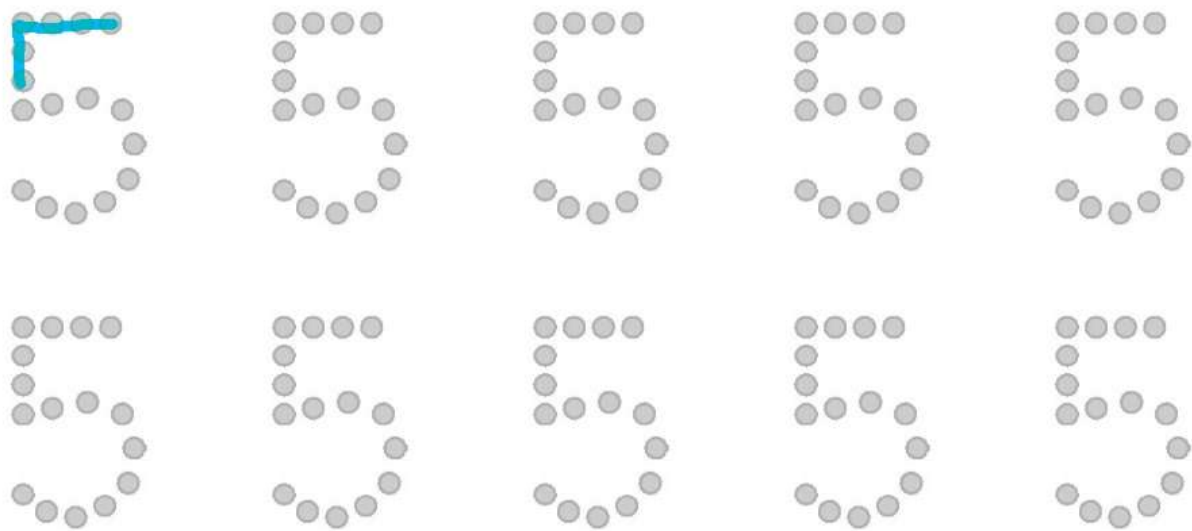

Skriv 4-tall:

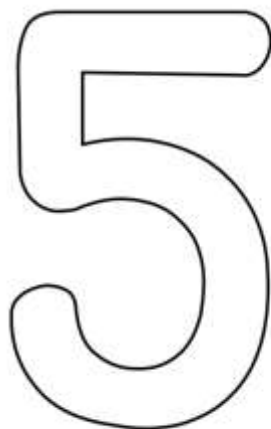

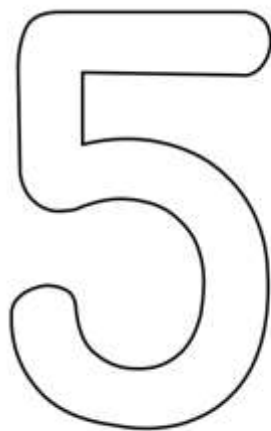

Skriv oppå tallene:

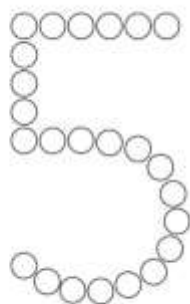

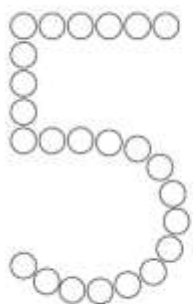

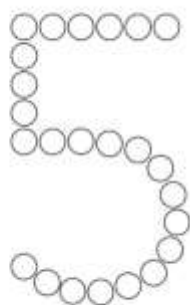

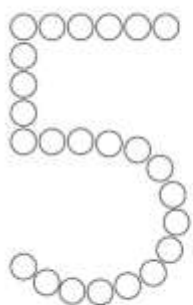

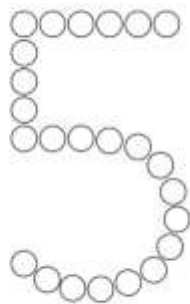

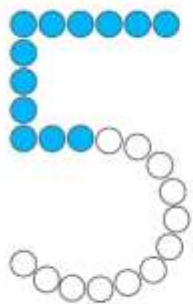

Skriv oppå tallene:

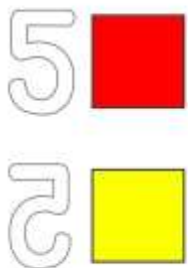

Fargelegg tallene:

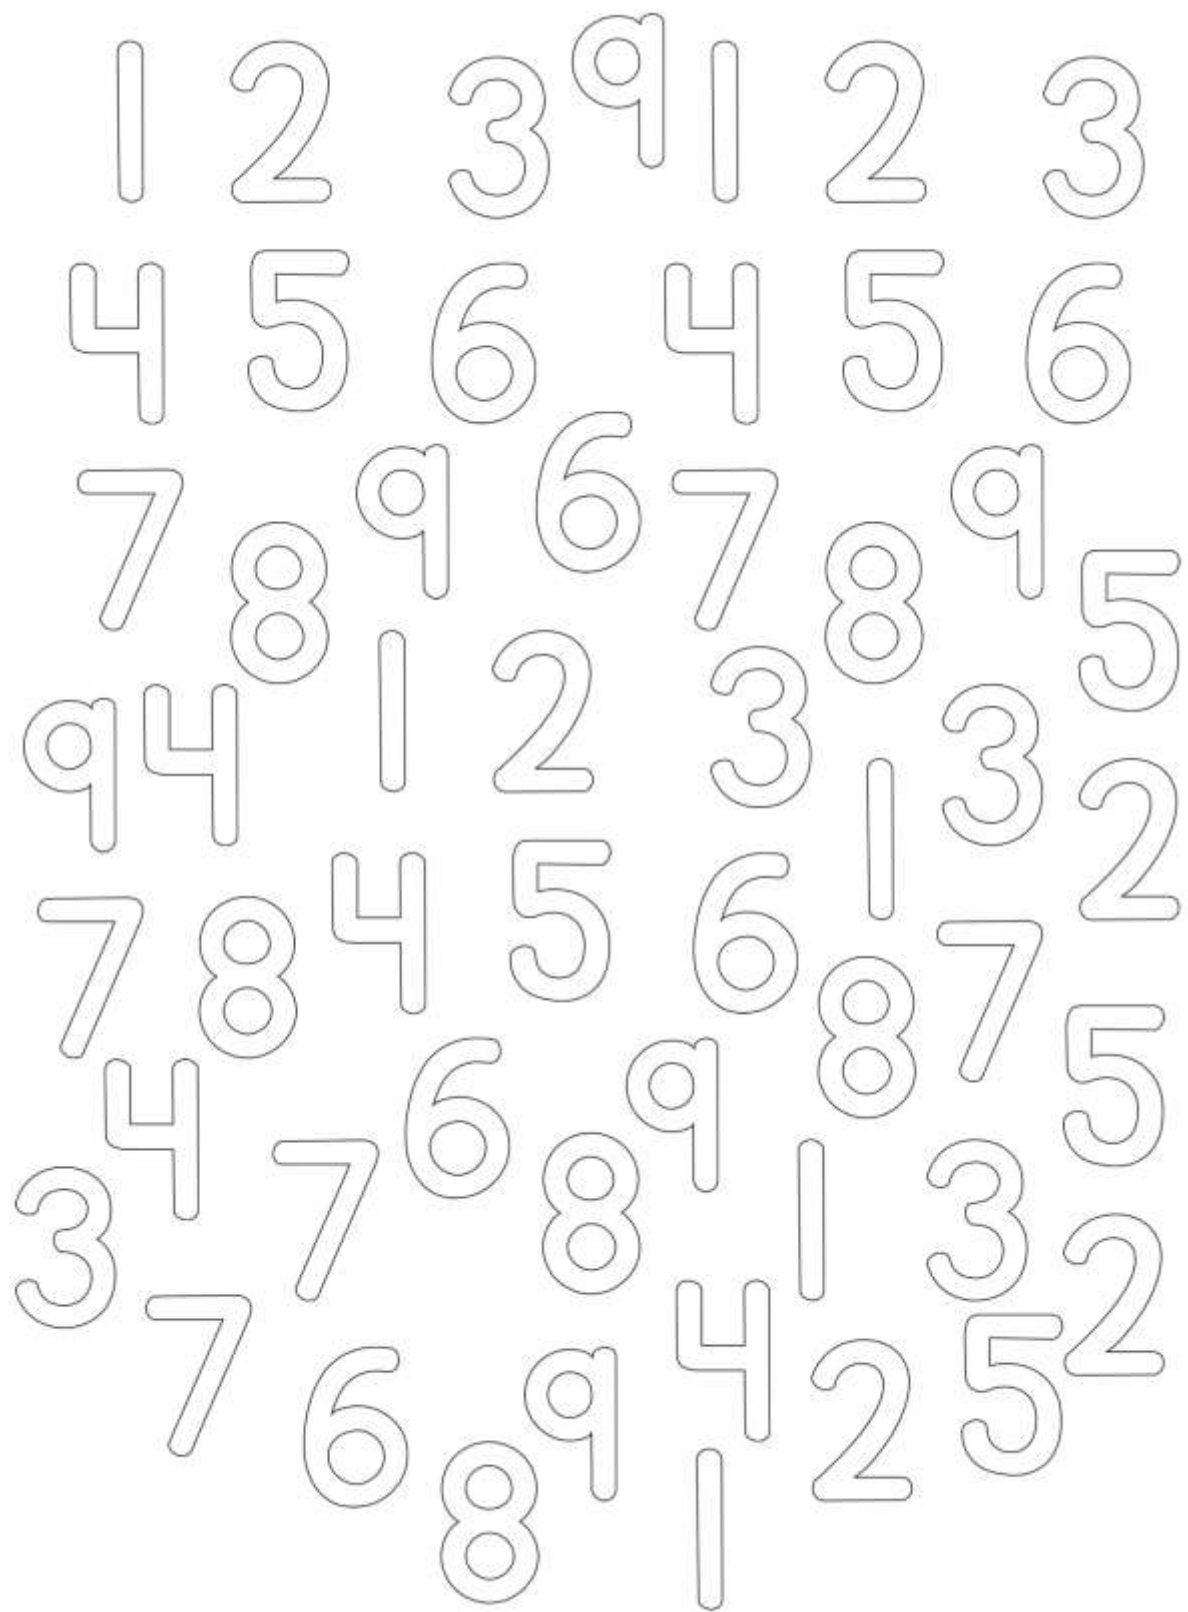

Fargelegg prikkene i tallene:

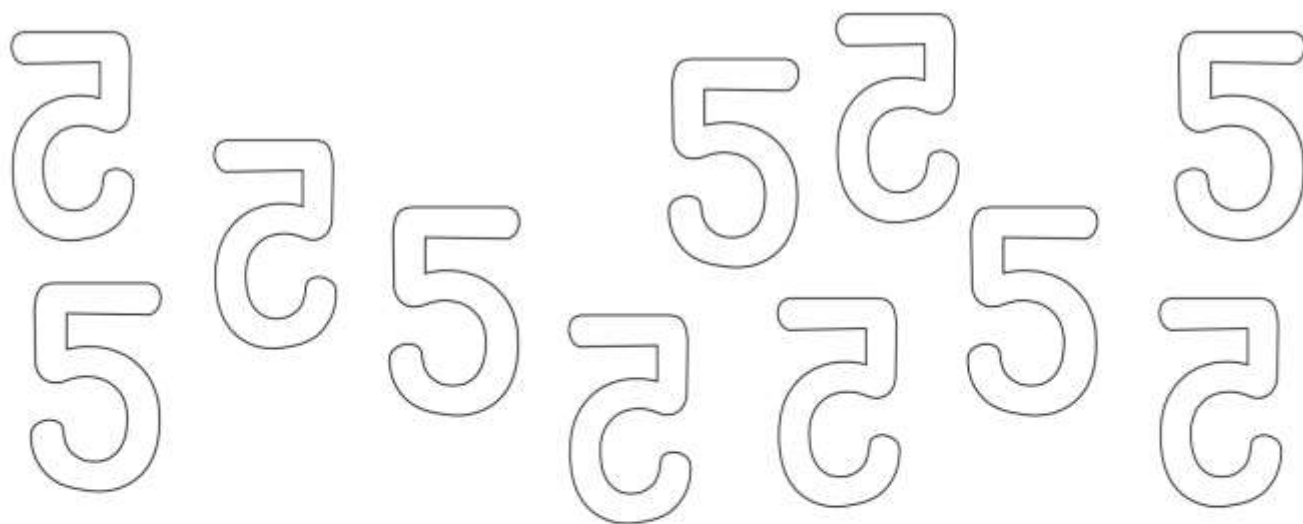

Fargelegg det riktige 5-tallet rødt og det som er feil vei gult:

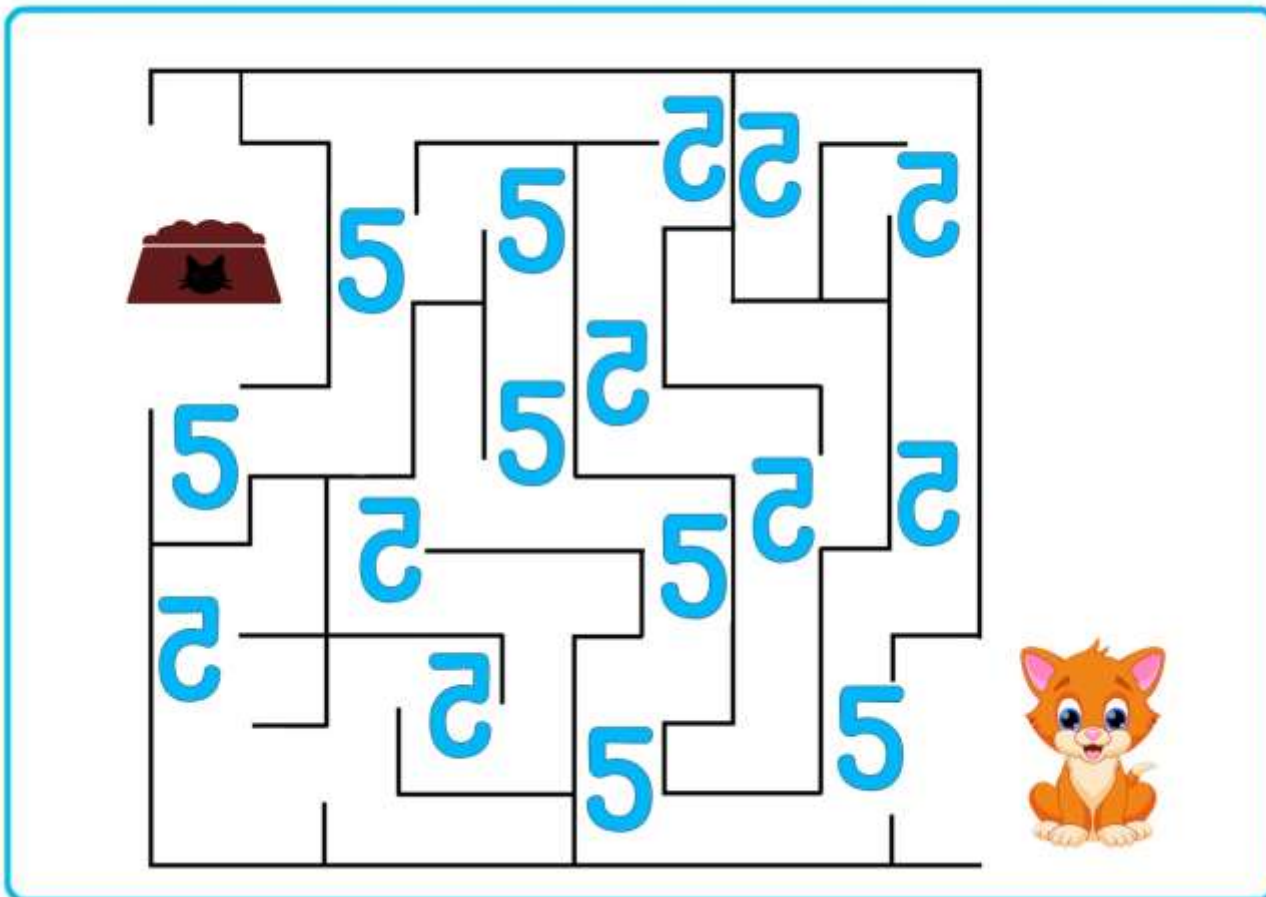

Fargelegg alle 5-tallene:

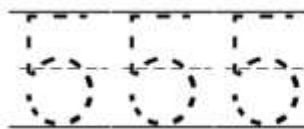

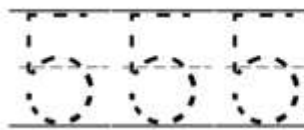

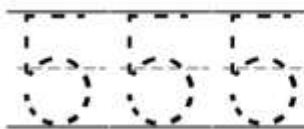

Fargelegg de riktige 5-tallene røde og de som er feil vei gule:

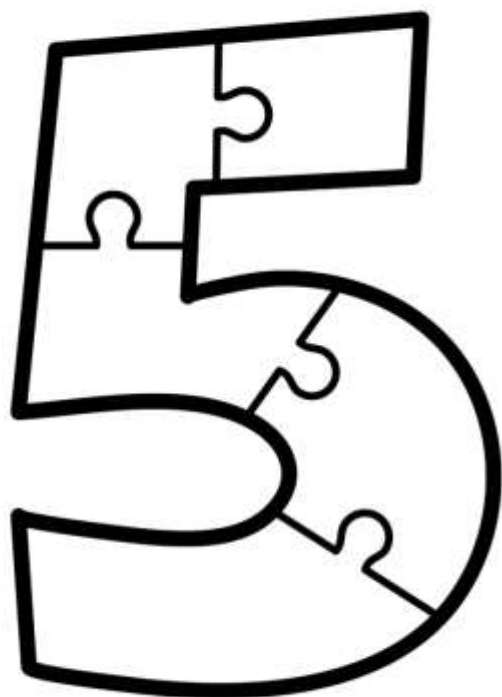

Hjelp katten ned til maten sin. Følg de riktige 5-tallene.

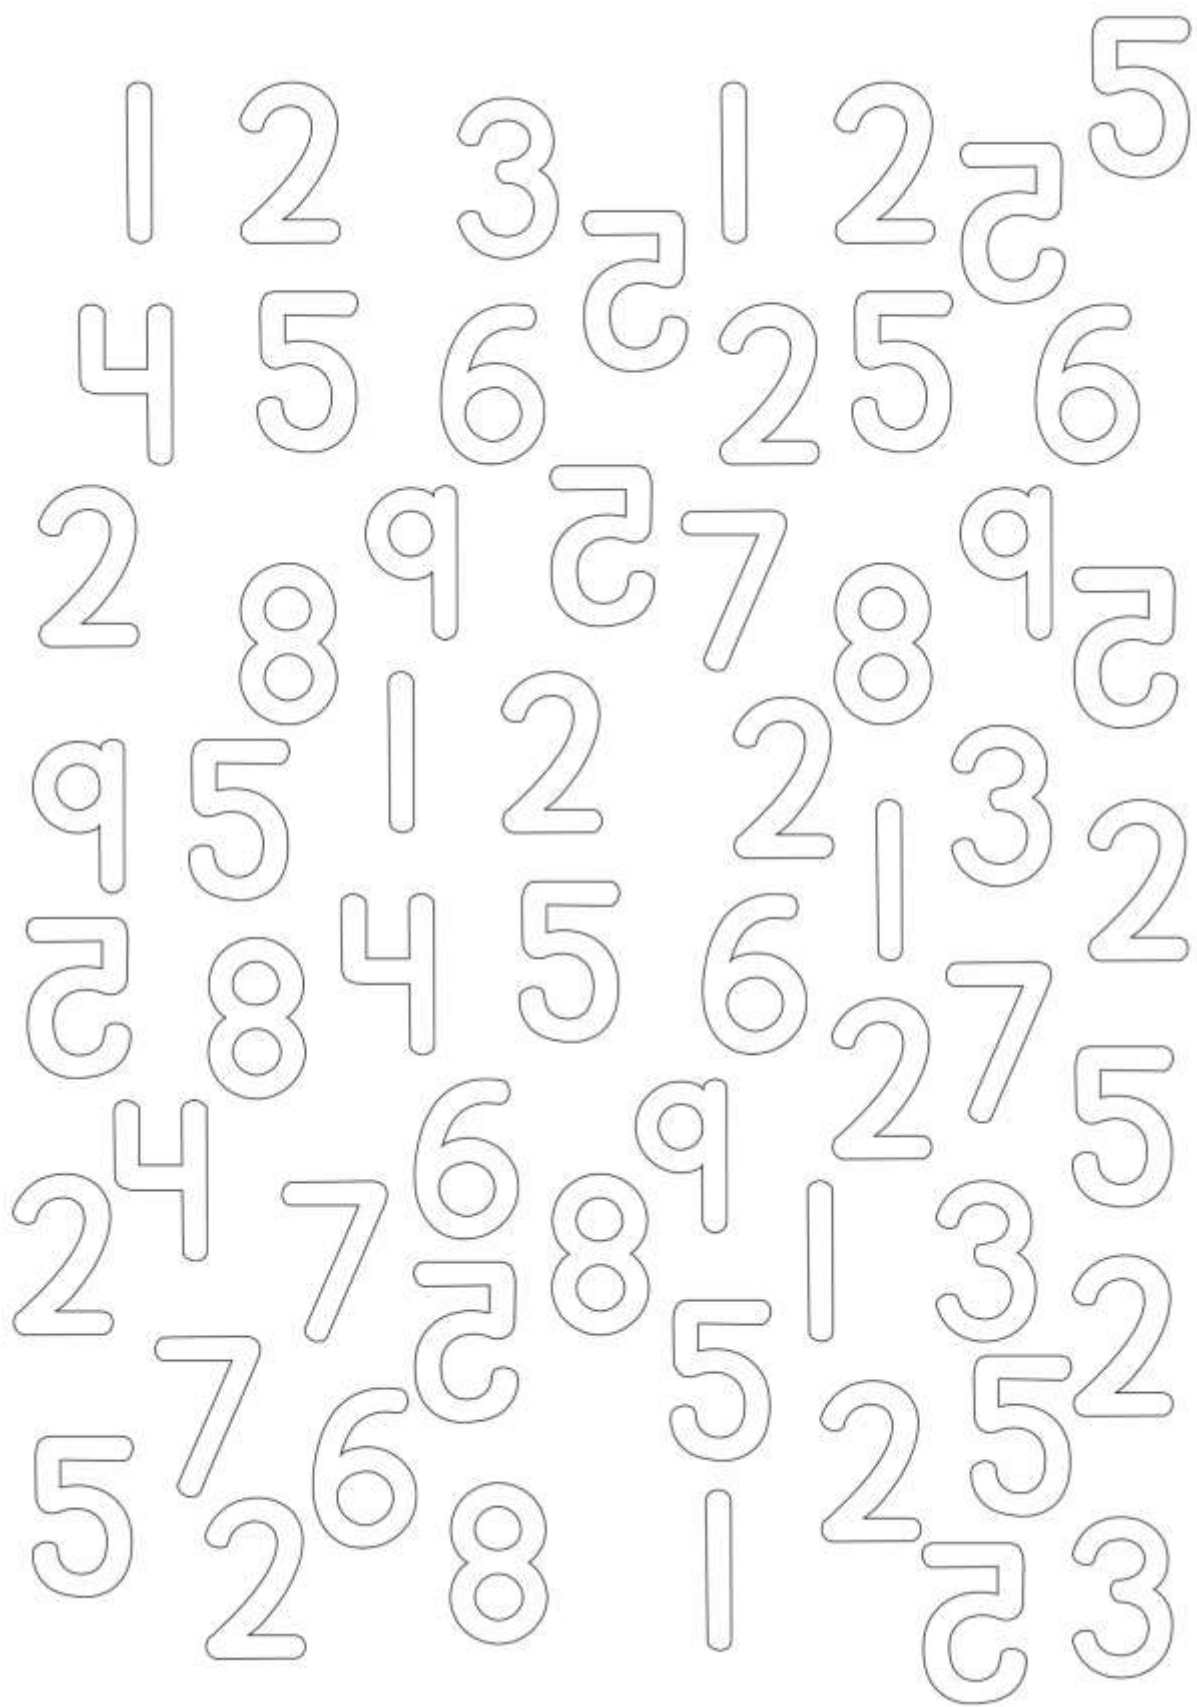

Skriv 5-tallene:

Fargelegg bitene i det riktige 5-tallet:

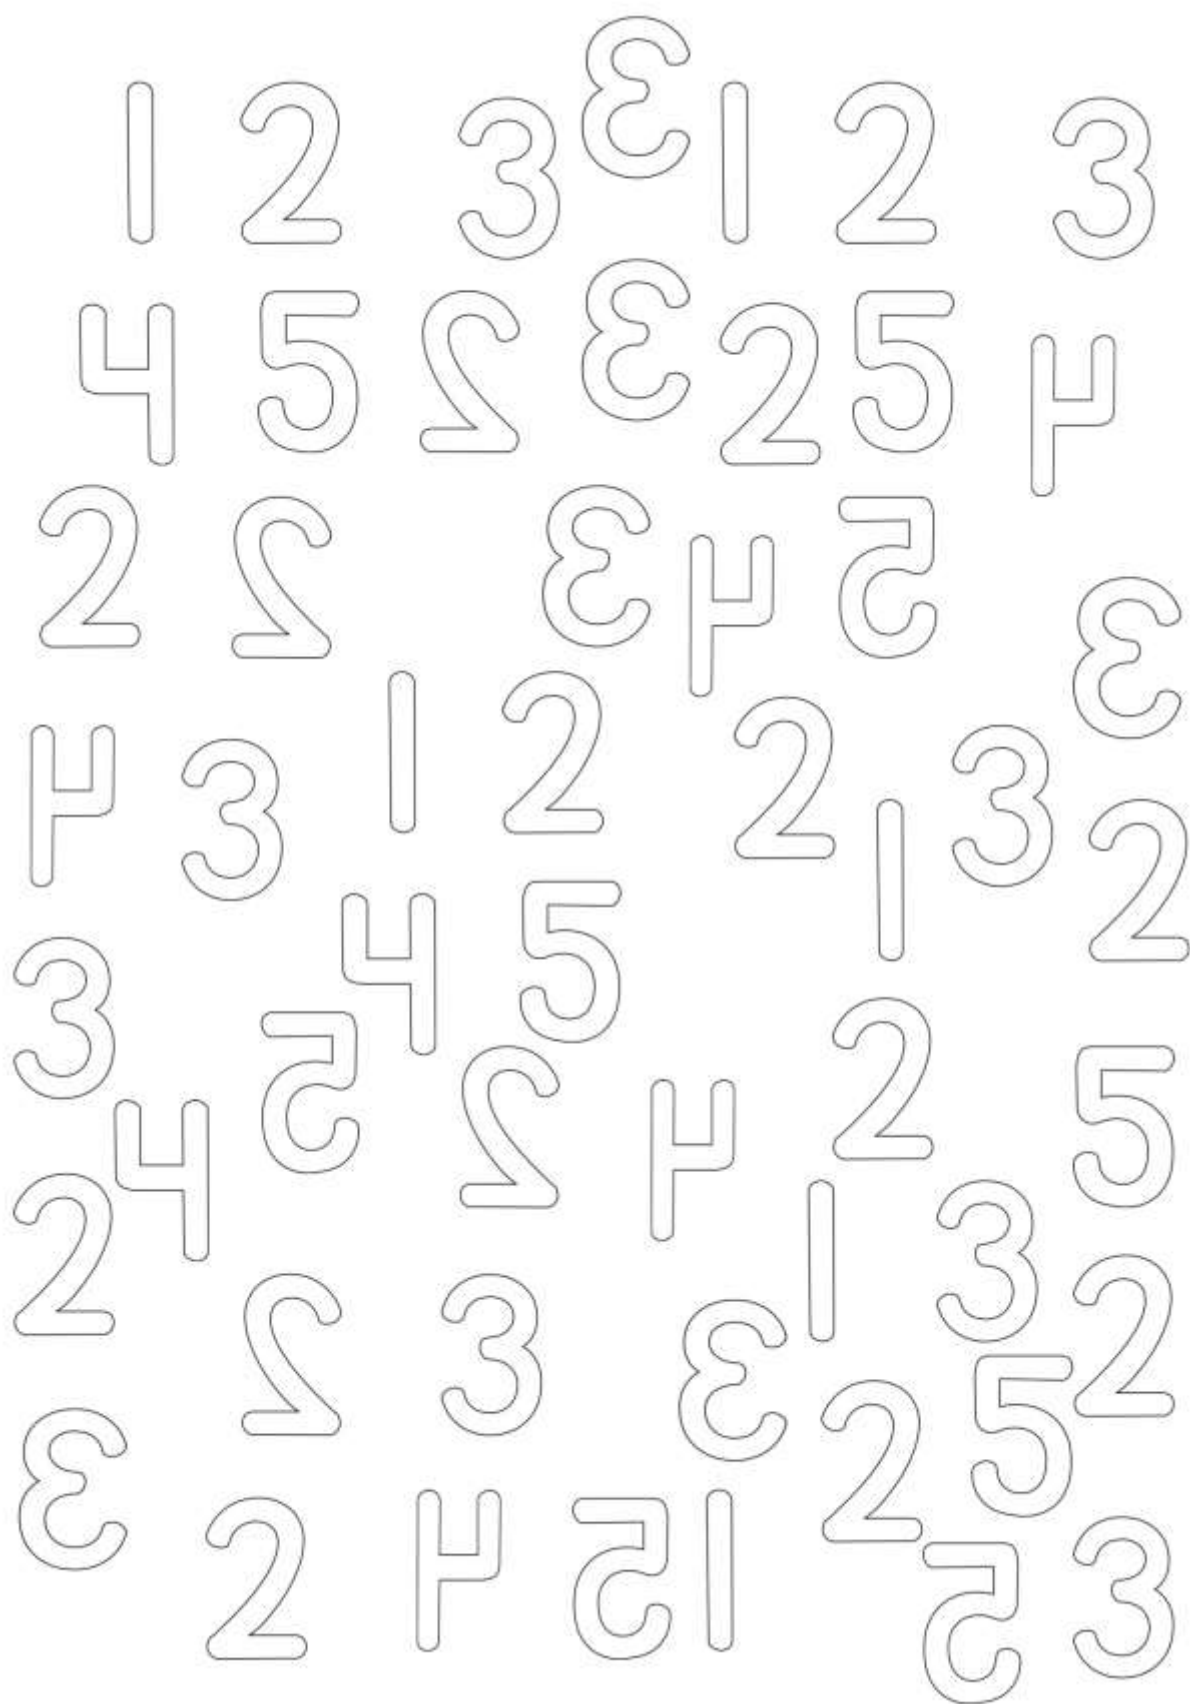

Fargelegg kun de riktige 5-tallene:

Skriv 5-tall:

Fargelegg alle tall som er rett vei grønne og alle tall som er feil vei røde:

Til læreren

Heftet "Matematikk-katten speilvending 1-5" er første hefte i serien om speilvending av tall og er laget for elever som synes at matematikk er vanskelig. Elever som opplever at matematikk er vanskelig trenger at ting er lett gjenkjennelig og har gjentakelser. Heftet har derfor på mange gjentakelser og oppgaver som er lette å kjenne igjen.

Heftet "Matematikk-katten speilvending 6-9" kommer ut snart.

1-tallet kan ikke skrives feil, men er likevel tatt med. Heftet også kan brukes til elever som lærer å skrive tallene eller må øve på det.

God fornøyelse med heftet.

Om «Matematik i vanskeligheder»

«Matematik i vanskeligheder» er dansk og lager produkt og undervisningsmateriell til elever som synes at matematikk er vanskelig. Det jobbes ut fra en positiv filosofi om at det er matematikken som problematisk og ikke den enkelte elev.

Det finnes mye gratis materiale på hjemmesiden:

<http://matematikivanskeligheder.dk/>

Du finner også gratis inspirasjon til egen undervisning på:
