Heftet Matematikk-katten – Monsterjakt om tala frå 1 – 10 er første hefte i serien om talrekka. Heftet er laga for elevar som synes at matematikk kan vera vanskeleg. Heftet har difor mange gjentakelsar, noko som er bra for elevar som strevar med talforståinga.

I dei første oppgåvene får eleven støtte i ei tallinje. Oppgåvene stig sakte i vanskegrad, dei startar med at eleven skal finna eitt tal og sluttar med at ein må finna seks tal.

## Om «Matematik i vanskeligheder»:

«Matematik i vanskeligheder» er dansk og lagar produkt og undervisningsmateriell til elevar som synes at matematikk kan vera vanskeleg. Dei jobbar ut frå ein positiv filosofi om at det er matematikken som kan vera eit problem og ikkje at den enkelte elev har eitt problem.
